

I woke up dizzy one morning and it stayed with me until Dr. Sanders successfully treated me. I had never had dizziness before, and did not know why it was happening. It made me nauseous, I couldn't drive, and it exhausted me. Dr. Sanders scheduled me within a week of calling, tested me, diagnosed the problem, and with medication, I am now back to normal. It seemed miraculous! I have a very treatable migraine-induced dizziness. Thank you Dr. Sanders!
