

HRS IRG Blend

Italian Ryegrass Blend

HRS IRG Blend—The best of both worlds, that's what you get when you plant HRS IRG blend. HRS IRG blend is a combination of diploid and tetraploid Italian ryegrasses, blended together in one convenient package. It combines the dense undergrowth of a diploid for excellent grazing, with the high yield and maximum quality of the tetraploid for maximum productivity. Add to this, the prolonged growth period in the early summer that Italian ryegrasses provide and you've got the ideal product, whether you are using it for grazing or cut forage.

APPLICATIONS

- Excellent for early winter and spring/early summer grazing
- Excellent for multiple harvests of high quality haylage or baleage.
- Excellent for seeding into barn lots or winter sacrifice areas

MANAGEMENT

- Planting Rate: 25—35 pounds per acre for pure stands
- Planting Rate: 10— 15 pounds per acre no-tilled into existing stands
- Planting Depth: 1/4—1/2 inch

FEATURES

- High tiller density
- High quality
- Prolonged growth period
- Quick regrowth

BENEFITS

- Improved grazing tolerance
- Maximum animal productivity
- More harvests or longer grazing season
- Faster animal rotations and more productivity
