

Working Together: Weather Resistant Barriers (WRB) and Continuous Insulation

Provider: Hunter Panels

Course #: XCI307-23

Learning Units: 1 AIA LU/HSW

Approved
Continuing
Education

This course explores the critical relationship between weather-resistant barriers (WRB) and continuous insulation (CI) in modern building design. Participants will examine the evolution of air and water barrier materials within the construction industry and understand their mutual importance in achieving a high-performance building envelope. The course will provide insights into the benefits and limitations of different WRB and CI materials across various building applications, helping professionals make informed decisions. Additionally, attendees will discuss strategies for designing simplified, more effective building envelopes that enhance durability, energy efficiency, and long-term performance.

To schedule this AIA presentation please email hunterxci@schwabgroup.net or [fill out this online form](#).

Hunter Xci Polyiso Wall Insulations - Portland, ME

Hunter has been the leader in thermal efficient polyiso insulation for roof and wall applications since 1997.

Thermal efficiency and sustainability are two cornerstones for Hunter.

Hunter products contain no HFCs, CFCs or HCFCs and are made using recycled materials. LEED credits can be given by utilizing Hunter products in the areas of optimizing energy performance, thermal comfort, building life-cycle impact reduction and more.

Hunter Panels currently manufactures its product in eight facilities in New York, Illinois, Florida, Texas, Utah, Washington, Pennsylvania & Missouri.
