

Miss Faith, Kangaroo, a Flyer, and Lexi Lou. Baby, a Joey

Named in honor of a brave little girl who has been through many surgeries already in her young life, and continues to live her life with optimism and enthusiasm

Birthday: March 6

A **kangaroo** is a hopping animal with a long tail from Australia, famous for carrying around its young in a pouch on the mother's body. They are the largest marsupial mammals. There are 47 varieties of kangaroos. Kangaroos are shy and retiring by nature. They live in varied habitats, from forests and woodland areas to grassy plains and savanna

A **joey** is a baby kangaroo. At around six months, once the youngster is sufficiently well developed, it will leave the pouch for short periods, returning when it needs to feed.

"It's not so much what we have in life that matters. It's what we do with what we have." Fred Rogers
