719-687-1887

Date 3/21/25

Dear Valley Maintenance Corporation Members and Spring Valley Property Owner and Recreational Corporation Members,

This letter is to inform you of future water augmentation that will occur from Burgess Reservoir for Valley Maintenance Corporation (VMC). Per the VMC water augmentation decree that was issued by Water Division 1, District Court, on January 29, 1993, VMC is required to release water from Burgess Reservoir based on a percentage of water used from our wells, and to release water based on calls from senior water right owners downstream. These releases will occur monthly from May 1<sup>st</sup> through October 31<sup>st</sup> each year. You may notice significant fluctuations in the water level of Burgess Reservoir during this time frame.

VMC has contracted with a water engineer to help ensure that we are in compliance with the court issued water augmentation decree and to track and report the water releases to the Colorado Division of Water Resources.

Feel free to contact us at [vmcdivide@gmail.com](mailto:vmcdivide@gmail.com) if you have any questions.

Yours Truly,

Bill Burton

VMC President
