

Community Garden

Partnering with Catholic Social Services' Refugee and Immigration Services, St. Anthony's community garden is composed of well-maintained, sustainable, and chemical-free garden plots available for a small rental fee to parishioners and members of our ethnically, economically, and religiously diverse community. The garden serves to grow community as well as vegetables. Produce may be grown for personal use or shared through on-site sales following weekend masses from harvest to freeze-up. Volunteers are called upon to help with special projects as needed. (Mike and Amy Reidell 907-338-6169)
