

PETRA PATTERN OF ORION

In the new genre of Astro-Archeology, it is being discovered that most often than not, ancient sites around the world have a celestial correspondence to the constellations of the Stars. Thanks to the modern computer and GPS satellite imagery, ancient sites like Petra and others can be studied in a completely new way. This study suggests that Petra has this *Orion* Star pattern. This constellation depicts the 'hero', the 'mighty conqueror' that projects power and majesty, etc. horizontally. The Biblical name of Petra was *Sela* in the land of Bozrah. Petra is the Greek word for 'rock'. Another name for Petra is the *Rose City* due to the red color of the stone out of which it is carved. Petra is famous for its rock-cut architecture and water conduit system. Geographically, Petra is nestled in a basin among the mountains and the heart of *Mount Seir*, which forms the eastern flank of *Arabah Valley* that runs from the *Dead Sea* to Eilat in the *Gulf of Aqaba*. As Edom signifies 'red' and Petra, 'rock', so too now at this prophetic time will the true *Rock of Israel*, Jesus execute His Wrath, 'red hot' and with blood.

The core of the ancient Petra *Temple Complex* is situated at an approximate 45 degree counter-clockwise rotation from the *Great Pyramid* complex in Giza. It appears that there are 3 main ancient temple structures that correlate to not only the *Great Pyramid* complex of Giza but to the *Orion Belt Stars*. This *Orion 3-Star* alignment is as follows. The *Temple of the Winged Lions* or *Lion* corresponds to the *Great Pyramid* of Khufu and the *Orion Star* of Alnitak. The *Main Temple* at Petra appears to correspond to the pyramid of Khafre and the *Orion Belt Star* of Alnilam. The 3rd ancient Petra structure of *Ez-Zantur* appears to correspond to the pyramid of Menkaure and the *Orion Star* of Mintaka, etc.
