DATA SHEET

Rabbit Anti-Glut1 [EP141]: RM0100, RM0100RTU7

Intended Use: For Research Use Only

Description: Glucose transporters are integral membrane glycoproteins involved in transporting glucose into most cells. There are many types of glucose transport carrier proteins, designated as Glut-1 to Glut-12. Glut-1, also known as SCL2A1, is a major glucose transporter in the mammalian blood-brain barrier. It is expressed in high density on the membranes of human erythrocytes and the brain capillaries that comprise the blood-brain barrier. Glut-1 is expressed at variable levels in many human tissues. Overexpression of Glut-1 has been linked to tumor progression or poor survival of patients with carcinomas of the colon, breast, cervical, lung, bladder and mesothelioma. Glut-1 is a sensitive and specific marker for the differentiation of malignant mesothelioma (positive) from reactive mesothelium (negative).

Specifications:

Clone:	EP141
Source:	Rabbit
Isotype:	IgG
Reactivity:	Human
Localization:	Membrane
Formulation:	Affinity purified, in 10 mM PBS pH 7.2, containing ¸1% BSA and 0.09% sodium azide (NaN3)
Storage:	Store at 2°- 8°C.
Applications:	IHC

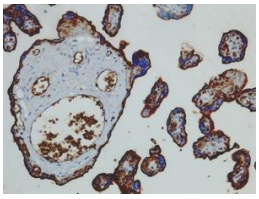
Package:

Description	Catalog No.	Size
Glut1 Concentrated	RM0100	1 ml
Glut1 Prediluted	RM0100RTU7	7 ml

IHC Procedure*:

Positive Control Tissue:	Human colon carcinoma, mesothelioma, placenta
Concentrated Dilution:	50-200
Pretreatment:	Citrate pH6.0 or EDTA pH8.0, 15 minutes using Pressure Cooker, or 30-60 minutes using water bath at 95°-99°C
Incubation Time and Temp:	30-60 minutes @ RT
Detection:	Refer to the detection system manual

* Result should be confirmed by an established diagnostic procedure.



Human placenta FFPE tissue stained with anti-Glut1 using DAB
