Construct a tape diagram to match the story.

1. Sana has 4 pounds of green beans. She gives 2 pounds of them to her friend. Sana's family eats $\frac{3}{4}$ of the remaining green beans. How many pounds of green beans does Sana have left?

Use the Read–Draw–Write process to solve each problem.

2. Tyler has 6 cups of blueberries. He uses $2\frac{1}{2}$ cups of blueberries for pancakes. He uses $\frac{3}{7}$ of the remaining blueberries for muffins. Tyler puts the rest of the blueberries into bags. He puts $\frac{1}{4}$ cup of blueberries into each bag. How many bags of blueberries can Tyler make?

3. Lacy's cat weighs 8 pounds. Her cat weighs $\frac{1}{3}$ as much as her dog. Noah's dog weighs $2\frac{1}{2}$ pounds less than Lacy's dog. How much does Noah's dog weigh?
