

# 6-Ply Disposable Face Mask

Because of the COVID-19 pandemic, we have innovated a conversion of our Beverage and Lunch napkins into a form-fitting face mask for personal use. This is NOT a medical grade mask. This mask does NOT prevent you from contracting ANY disease.

**\*\*DISCLAIMER\*\***

We have developed this product to help with the country's demand for one time use face masks and assume no liability for any consumer contracting any disease from use of this product.

In World War II Americans came together to preserve and conserve precious materials to help with the war effort. Every little can, scrap of rubber, fixed leaky pipe helped **CONSERVE** for the men and women on the front lines and in the factories to make a difference.

The men and women on the front lines of COVID-19 need to **CONSERVE** the precious N95 501(K) FACE MASKS, and here's how you can help!

Our 3-Ply Napkin conversion Face Mask can be used for personal use, and also to elongate the effective use of N95 face masks. Hospitals have already adopted protocol to get more life out of their precious inventory levels of N95 face masks by using a non-surgical mask OVER the N95 mask.

**BLANK Pricing**  
\$.75 each

**\*\*WARNING: Latex Allergy**  
These face masks use a Natural Rubber Latex Band that fits around your ears. Please choose LATEX FREE bands (ORANGE) if latex allergy is a concern!

# Who is on the Front Lines?

**Police Officers** - The safety of our communities rely on local law enforcement officers and their willingness to engage dangerous situations. Help keep them safe and keep hospital inventory levels high so both can perform their ESSENTIAL jobs!

**Grocery Store Clerks and Customers** - Food will always be essential and all of our travel and shopping experiences should be protected. Help the clerks at these grocery stores from being exposed to thousands of patrons while they do their stressful jobs!

**Nursing Home Receptionists and Staff** - The most susceptible people to the COVID-19 coronavirus are the elderly. Help keep their risks low by getting the receptionists a barrier while the essential services in those facilities CONSERVE their N95 PPE (personal protective equipment) face masks!
