

## **Carpet Cleaning**

The method of steam cleaning involves spraying of a cleaning solution with the help of a hydra force pre sprayer, which enables the pre-spray to penetrate deep into the carpet fibers. As a result, dirt, debris trapped in the fibers of the carpet are loosened up. Then the dirty residues are extracted from the carpet with powerful vacuum suction system.

### **Pricing**

We offer rates that are comparable to other companies that offer similar services. When it comes to service rates it depends on many different things including method, size of the building and or residence, empty home, square footage, condition of carpet, stain removal, high traffic areas, moving furniture, and upholstery fabric.
