Aluminum & Stainless Construction

www.ScreencoSystems.com

PORTABLE

- High Capacity! ~ 500 gal. per minute
- Can be mounted above an open pit or standalone application can be stationed virtually anywhere.
- Ideal for screening lagoon headworks
- Aluminum construction with stainless steel screens.
- Custom built applications available
- 100% stainless steel option
- 3/8" gapped steel bar screens meet ecology 503 requirements.
- 19.5 square feet of screening area
- Collection sump located under screens.

SIMPLE

Tired of not finding a septic receiving station that works and is affordable?

We developed this effective solution to remove trash from septic and grease trap waste. Can be setup virtually anywhere. Simply connect the receiving hose to your pump truck.

Receiving station is designed for gravity offload. Septage and grease are screen filtered to remove 99% of garbage.

NON-MECHANICAL

- Telescoping 4" dump hose with 6" truck dump adaptor allows for FAST garbage filtering.
- 6" outlet insures constant outflow to onsite storage.
- Receiving station is easily cleaned with water. Filters out rags, rocks, roots, etc.
- Removes garbage & debris prior to land application
