The radical left playbook

The radical left uses the book *Rules for Radicals* by Saul Alinsky as their tactical manual. Saul Alinsky dedicated the book to the devil. Here is the dedication:

"Lest we forget at least an over-the-shoulder acknowledgment to the very first radical: from all our legends, mythology, and history... the first radical known to man who rebelled against the establishment and did it so effectively that he at least won his kingdom — **Lucifer.**"

Saul Alinsky Purpose was to create mass organizations to seize power. He said it was for the Have Nots and how to take it away from the Haves. The idea was social change. The goal was for Totalitarianism. He grew up during the depression (Born 1909). He was committed to Socialism (Communism) At the time of the writing Communism would have been rejected so he professed to not have a fixed truth. Like Niche he believed that traditional Christian philosophy in the West was weak and negligible

In war, the ends justify the means. The issue is pragmatic and strategic in that the followers should only ask of ends are they achievable and whether they will work because success or failure is a mighty determinate of ethics. His followers were to infiltrate the system from within, use the tools of freedom against itself, always forward, do the conversion incrementally and make the enemy (Freedom) live up to its book of rules. The only price of a successful attack is a constructive alternative. The followers are to use ridicule because it is man's most potent weapon. It is to be used in place of a logical argument.

To counter the radical left point out that they are using Saul Alinsky techniques. Keep the pressure on. Call a lie a lie and keep calling it a lie and tell the truth.

Remember when a left-wing democrat (Most are) says something it may or may not be the truth.
