igures to the Orion constellation. The ancient city was centered on an approximate 1 square mile platform that incorporates the many temples and main avenues. Based on aerial observation from Google Earth, it would appear that the location has several layers of motifs that this t. These 3 temples appear to correspond to the 3 Belt Stars of Orion in size and thus also to the Great Pyramids of Giza. Based on this scale, the constellation of Orion would thus match the overlay and with 2 additional and amazing correspondence. The hippodrome would correduce to the Great Pyramids of Giza and the Great Pyramids of Giza and thus also to the Great Pyramids of Giza and thus also approximate the Cosmic Cardinal Points of the Galactic Meridian and the Celestial Meridian that. In another illustration, it will be suggested also that face when the entire site is rotated 45 degrees to the east. The configuration on Earth is exactly as it would be depicted as a 'cross' with the intersection of the Galactic Meridian and the Celestial Equator, thus a 'Man on the Cross, the Christ Crucified.
