WINTERIZE YOUR LAWN

Delong 24-0-12 Turf Food blend makes an excellent Winterizer for your Lawn when applied in October. Use with established lawns; apply when lawn is dry and water following application. For newly seeded grass, use 20-12-8 Lawn Starter Fertilizer.

24-0-10 TURF FOOD PCSCU

GUARANTEED ANALYSIS

Total Nitrogen (N) 24.0%
24.0% Urea nitrogen*

Soluble Potash (K2O) 10.0%

Plant foods derived from: Urea, Muriate of Potash and Poly Coated Sulfur Coated Urea.

*4.8% slowly available urea nitrogen from poly coated sulfur coated urea.

Density - 63 lb./cu.ft.

20-12-8 SEED STARTER All Mineral

GUARANTEED ANALYSIS

Total Nitrogen (N) 20.0%
4.7% Ammoniacal nitrogen
15.3% Urea nitrogen

Available Phosphate (P2O5).... 12.0%

Soluble Potash (K2O)..... 8.0%

Plant foods derived from: Urea, Muriate of Potash and Diammonium Phosphate.

Density - 63 lb./cu.ft.

DIRECTIONS FOR USE:

- Apply when turf or foliage is dry.
- Water following application will enhance performance of the fertilizer.
 - Slightly overlap application to avoid striping turf.
 - Uniform broadcast distribution of this product is essential. Spreaders should be calibrated for accurate and uniform application of this product.
 - This product may contain materials that can stain sidewalks, patios, driveways, containers, etc. Sweep or remove immediately after application if product comes in contact with these surfaces to avoid staining.
 - Avoid applying targeted areas when air temperatures exceed 85 degrees.
 - Avoid applying when weather conditions favor drift from target areas.

New 2022 Product Guide

Get your corn and soybean orders in early to ensure that you get the variety you want. We can start taking pre-pay orders on October 18.

The Hohlsfarmsupply.net will again feature the Jung's corn and soybean availability. Keep in mind that this is Jung's availability, **not** Hohl's stock items; however, Hohl's can order anything for you from that availability.

Food Plot 101: AUSTRIAN WINTER PEAS

Winter Peas are a rapid, low growing annual Legume used across the country as a legume fixing cover crop and/or a quickly decomposing green manure crop. The forage value of the winter peas along with their overall management are benefited when planted alongside a cereal grain, such as oats.

BENEFITS:

- Strong Nitrogen fixer and very high in biomass potential (*organic matter, resulting from plant decomposition, which adds to soil nutrition – aka: green manure crop*). Superior choice for soil improvement.
- Perfect cover crop before planting corn.
- Quick growth, good for weed suppression.
- Hardy to temperatures as low as -5 to -10 °.
- Will work with soil pH levels as low as 6.0.
- Economical way to attract deer, turkey and quail.

PLANTING:

- **Rate:** 50 lbs. per acre.
- **Depth:** ½"
- **Time:** September - October
- **Method:** Well-prepared, firm seed bed, alone or with a small grain. (*Cut rate if planting with grain*).
- **Grazing:** Not suited to grazing because of livestock damage from trampling. Excellent for wild game food plots and as a plow down green manure crop. Austrian winter peas, if planted in the fall, will also return to growth in the spring; will die after mowing down.

Old Farmers Day, October 12th: Honors the hard labor of farmers throughout American history. On this day, **Hohl's Farm Supply will offer a 12% savings on all prepaid Jung Seeds from the 2022 catalog.**

As Americans, we tip our hat to all farmers for their contributions to American culture, values, society, and the economy. Happy Old Farmers Day!
