Group Overview

YARNS&COLORS GROUP

1.Established time

Founded in 1970, adhering to the attitude of "sincere, simple, positive and innovative", It is a diversified and innovative enterprise with a full industrial chain integrating yarn, dyeing, garments and design.

2.Company size

With professional senior management talents and R&D, design, technology and production personnel, the total investment is as high as 60 million US dollars. It has service platforms in Italy, the United States, the United Kingdom, Japan and other countries, and has established advanced R&D and digital production management centers in China to provide customers with high-quality services.

3.Main business and achievements

The Group is committed to building an advanced global trade platform for the entire knitting industry chain and becoming a digital, international enterprise with sustainable development. It has a number of core technologies, patents, and certifications, and has won high recognition from customers and the industry.

YARNS&COLORS GROUP

■ Group Vision

To Be One Of Best Knitting Yarn And Product Supplier In Global Brand Sweater Sourcing Chain.

YARNS&COLORS GROUP

■ Group Values

CORE-VALUES OF
YARNS&COLORS GROUP

“Sincere, simple, positive and innovative” each have unique connotations and meanings that constitute our corporate culture.

SINCERE

We uphold a sincere attitude to establish and maintain a good relationship of trust.

01

SIMPLE

We uphold a simple and authentic style and are committed to achieving intrinsic value and long-term development.

02

POSITIVE

We have a high sense of responsibility and mission, are brave to take on responsibilities, and constantly pursue excellence.

03

INNOVATIVE

We have a high sense of responsibility and mission and constantly pursue excellence.

04

■ Main Business

■ Main business-yarn manufacturing and sales

---YARNS&COLORS

Employees: More than 300 people

Main business: Developmental integrated spinning mill, more than 1,000 kinds of special yarns, integrating worsted, woolen, fancy twist, and new integrated yarns. The main raw materials used include wool, acrylic, alpaca, mohair, nylon, polyester, silk, cotton, viscose, linen and other yarns of various specifications.

Product innovation and upgrade

Continuous investment in R&D of more than 1,000 types of fancy, functional and sustainable yarns to lead the industry trend

Independent development

Development-oriented integrated spinning mill, achieving sustainable development guided by market trends

Environmental protection equipment

Imported first-class spinning equipment, such as Italian Meisdan air splicer, rewinding machine

Annual production capacity

The annual spinning capacity can reach more than 8,500 tons

Quality Control and Management

Strict quality standards to improve customer satisfaction

Social Responsibility

Passed RAF, GRS, GOTS, FSC®, SFA, ISO and other certifications

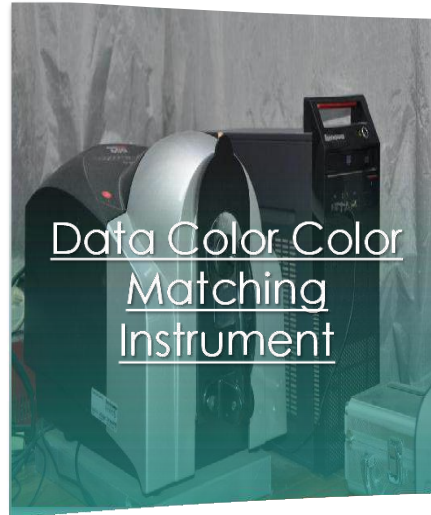

■ Main Business-Yarn Dyeing

---HighView Technology Co.,LTD

LA-SPC dyeing machine central monitoring system

Data Color Color Matching Instrument

Intelligent energy-saving dryer

Infrared simulation cylinder

Oscillator simulates cylinder spraying

Environmentally friendly
dyeing factory

Professional R&D team

With more than 10 years of experience, we can develop various functional tie-dyeing and special dyeing processes

Annual production capacity

The annual spinning capacity can reach more than 7,000 tons

Advanced dyeing equipment

The whole plant has production line equipment: intelligent energy-saving dryer, LA-SPC dyeing machine central monitoring system, Data Color color matching instrument, automatic dye weighing equipment, and auxiliary agent automatic weighing equipment

Proofing equipment

Tubeless dyeing automatic metering system, infrared simulated vertical cylinder, oscillator simulated spray cylinder

Energy saving and pollution reduction

Reduce carbon emissions through photovoltaic power generation, steam recovery, heat recovery, etc.

■ Main business-knitting and weaving

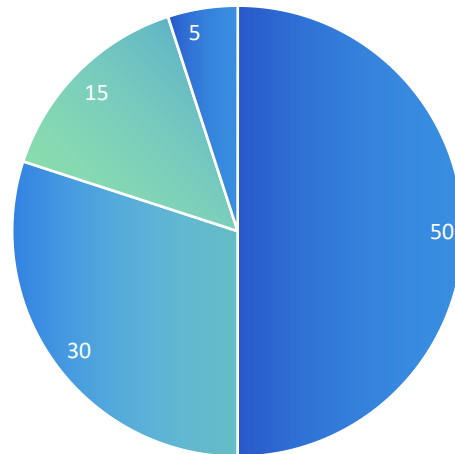

---Asia Nuance Apparel Co.,LTD

SEDEX

GREENHOUSE GAS

■ Main business-knitting and weaving

---YARNS&COLORS International Co.,
LTD@Taiwan

Annual production capacity: More than 300,000 pieces.

Main business: A team dedicated to whole garment. It is also the first knitting design center in Taiwan's current precision textile industry to use Japan's SHIMA SEIKI 3D automatic control and computer automatic precision weaving.

■ 3D Knitting

Smart production
Minimal use of raw materials
Seamless knitting, recyclable
Reduce CO2 emissions
Reduce waste textiles
Waterless production

■ Talent cultivation

Industry-university cooperation
Cultivating design and programming talents
Digital design and intelligence
Industry 4.0 model of
Taiwan manufacturing

■ Equipment delivery date

■ Main business-AI design and development

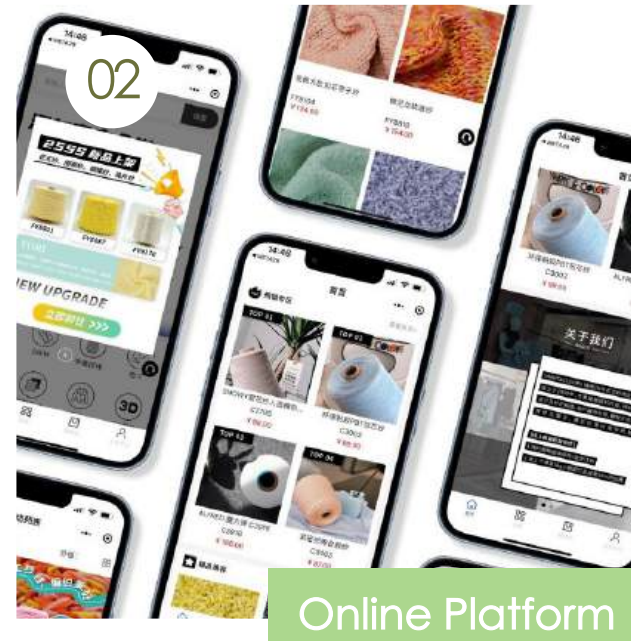

---META28 Design Center

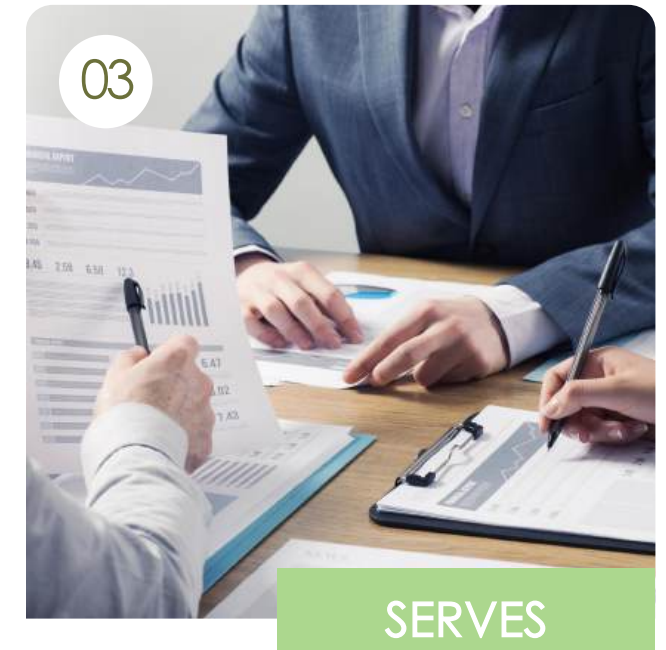

Scan the QR code to view the online platform

Paper patterns, fabric types, and special processes can be modified at any time, which can reduce costs, shorten product development cycles, and allow customers to view the effects of paper pattern trials through the Internet, shortening customer approval time and improving processing quality and efficiency.

The spot service provides knitters with a quick response tool, supports 1KG minimum order, dedicated customer service, a variety of spot products, quick purchase. Easy to check, no surcharge.

META28 provides services and support such as brand planning and packaging, intelligent product sales, intelligent design services, intelligent garment weaving, social media sharing, and sample yarn stock.

■ Main business-yarn and fabric testing

---JH TESTING CENTER

Advanced Instruments

Constant temperature and humidity laboratory

Pilling box, fully automatic single yarn strength tester, yarn evenness test analyzer, Martindale abrasion tester, pilling rating box, yarn length measuring instrument, twist meter, electronic balance.

Normal temperature laboratory

Sunlight climate test machine, European standard shrinkage test machine, perspiration fastness test machine, perspiration color fastness oven, tumble dryer, washing color fastness test machine, capillary effect tester, laboratory pH meter, water bath oscillator, fabric water penetration tester, oven, friction fastness meter, standard light box, European standard, American standard shrinkage scale, electronic balance.

Test Items

Test categories: yarn, fabric

Testing standards: National standard GB International standard ISO American standard AATCC

Testing time: 2-3 days for sun exposure, 1-2 days for other items

Test items: pH value, rubbing fastness, washing fastness, soaping fastness, perspiration fastness, anti-pilling, water fastness, splicing inter-color fastness, strip uniformity, light fastness, twist, strength, elongation, count.

Laboratory Qualification

02

Core Competitiveness

■ Core Competitiveness

CORE COMPETITIVENESS YARNS&COLORS GROUP

01

Global layout

With an international vision, we are based in China and have a global layout, with sales and design centers in different countries around the world.

02

The entire industry chain

We are good at yarn research and development, yarn dyeing, clothing design, development and production, and ultimately online sales platform.

03

Smart Manufacturing

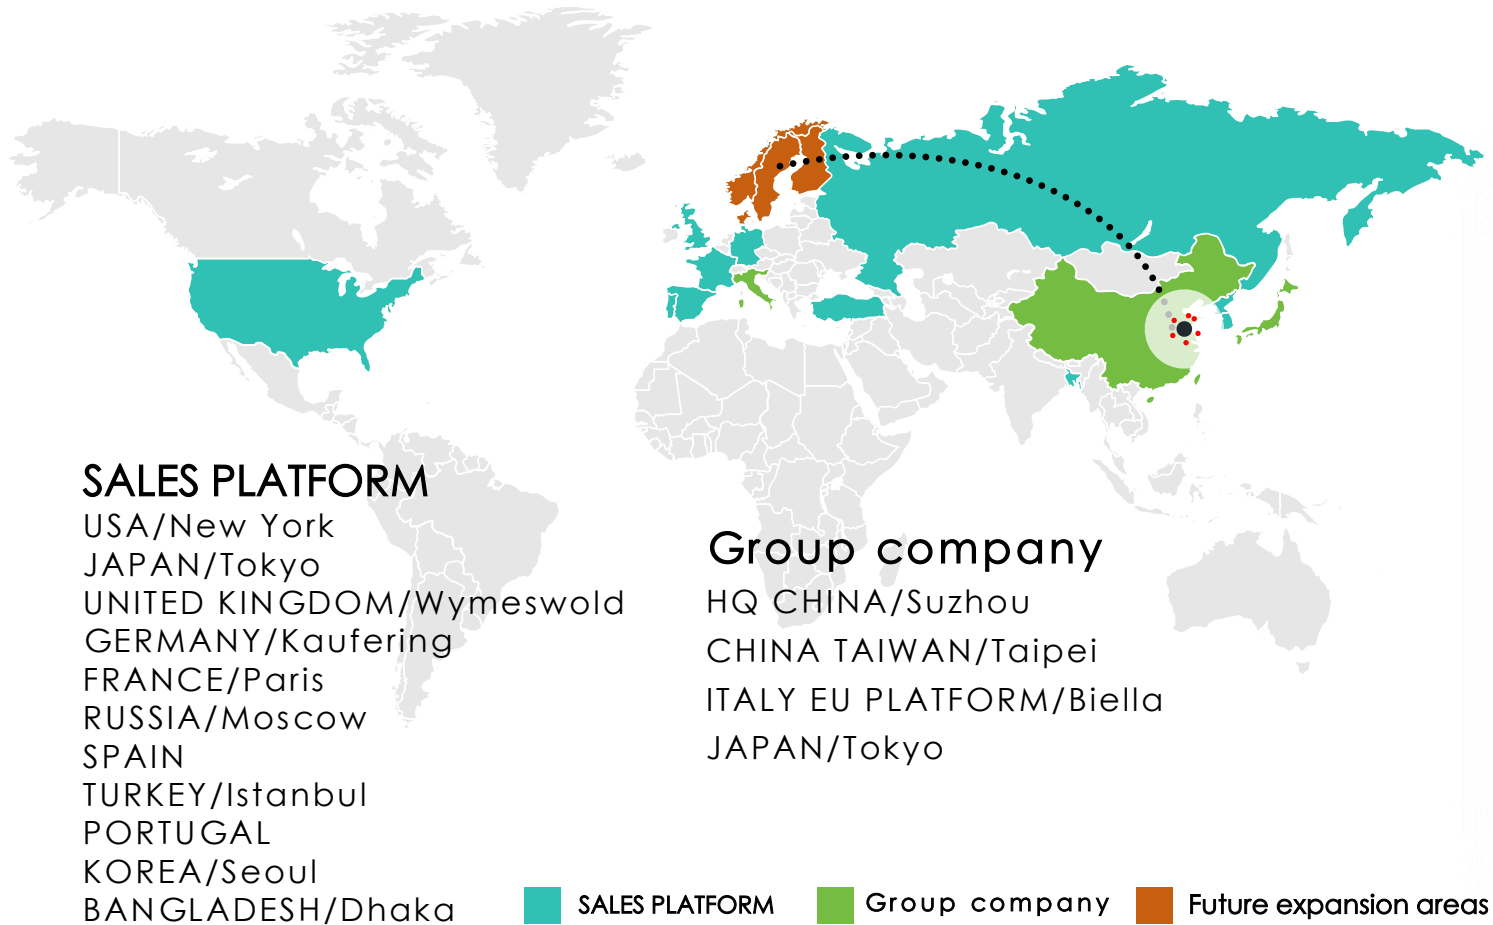

Advocate deep integration with new-generation information technologies, such as the Internet of Things, big data, artificial intelligence, etc., to build an intelligent environmental protection system.

04

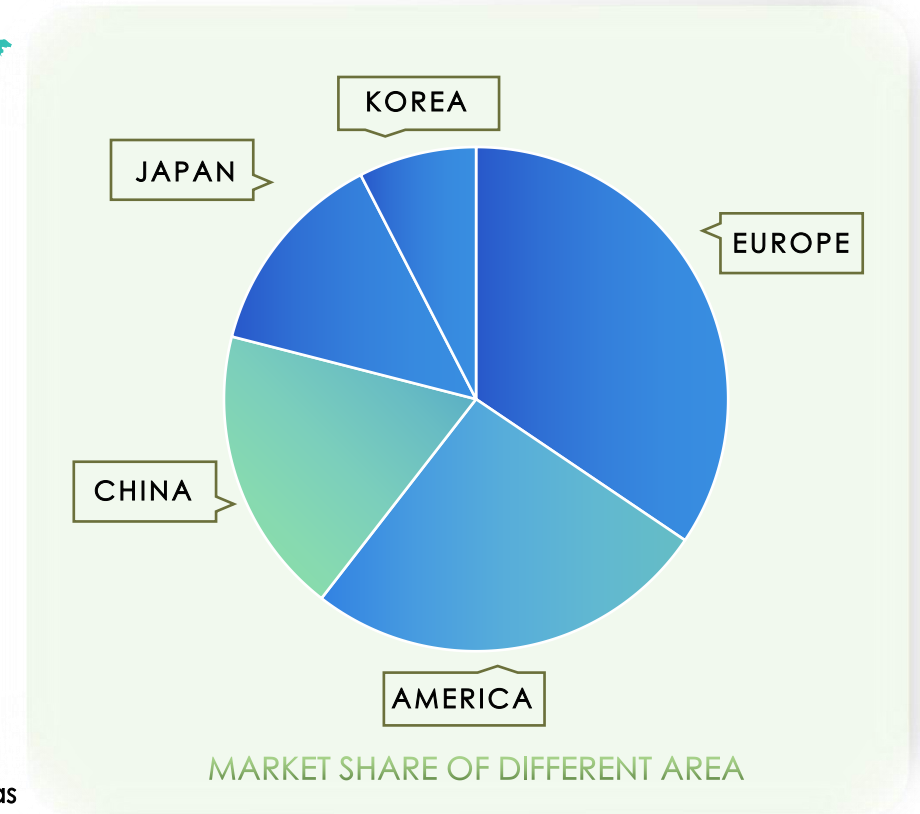

Global talents

"Global talents" are the vital force of the Group's development. The Group is committed to establishing long-term and stable cooperative relations with "global talents".

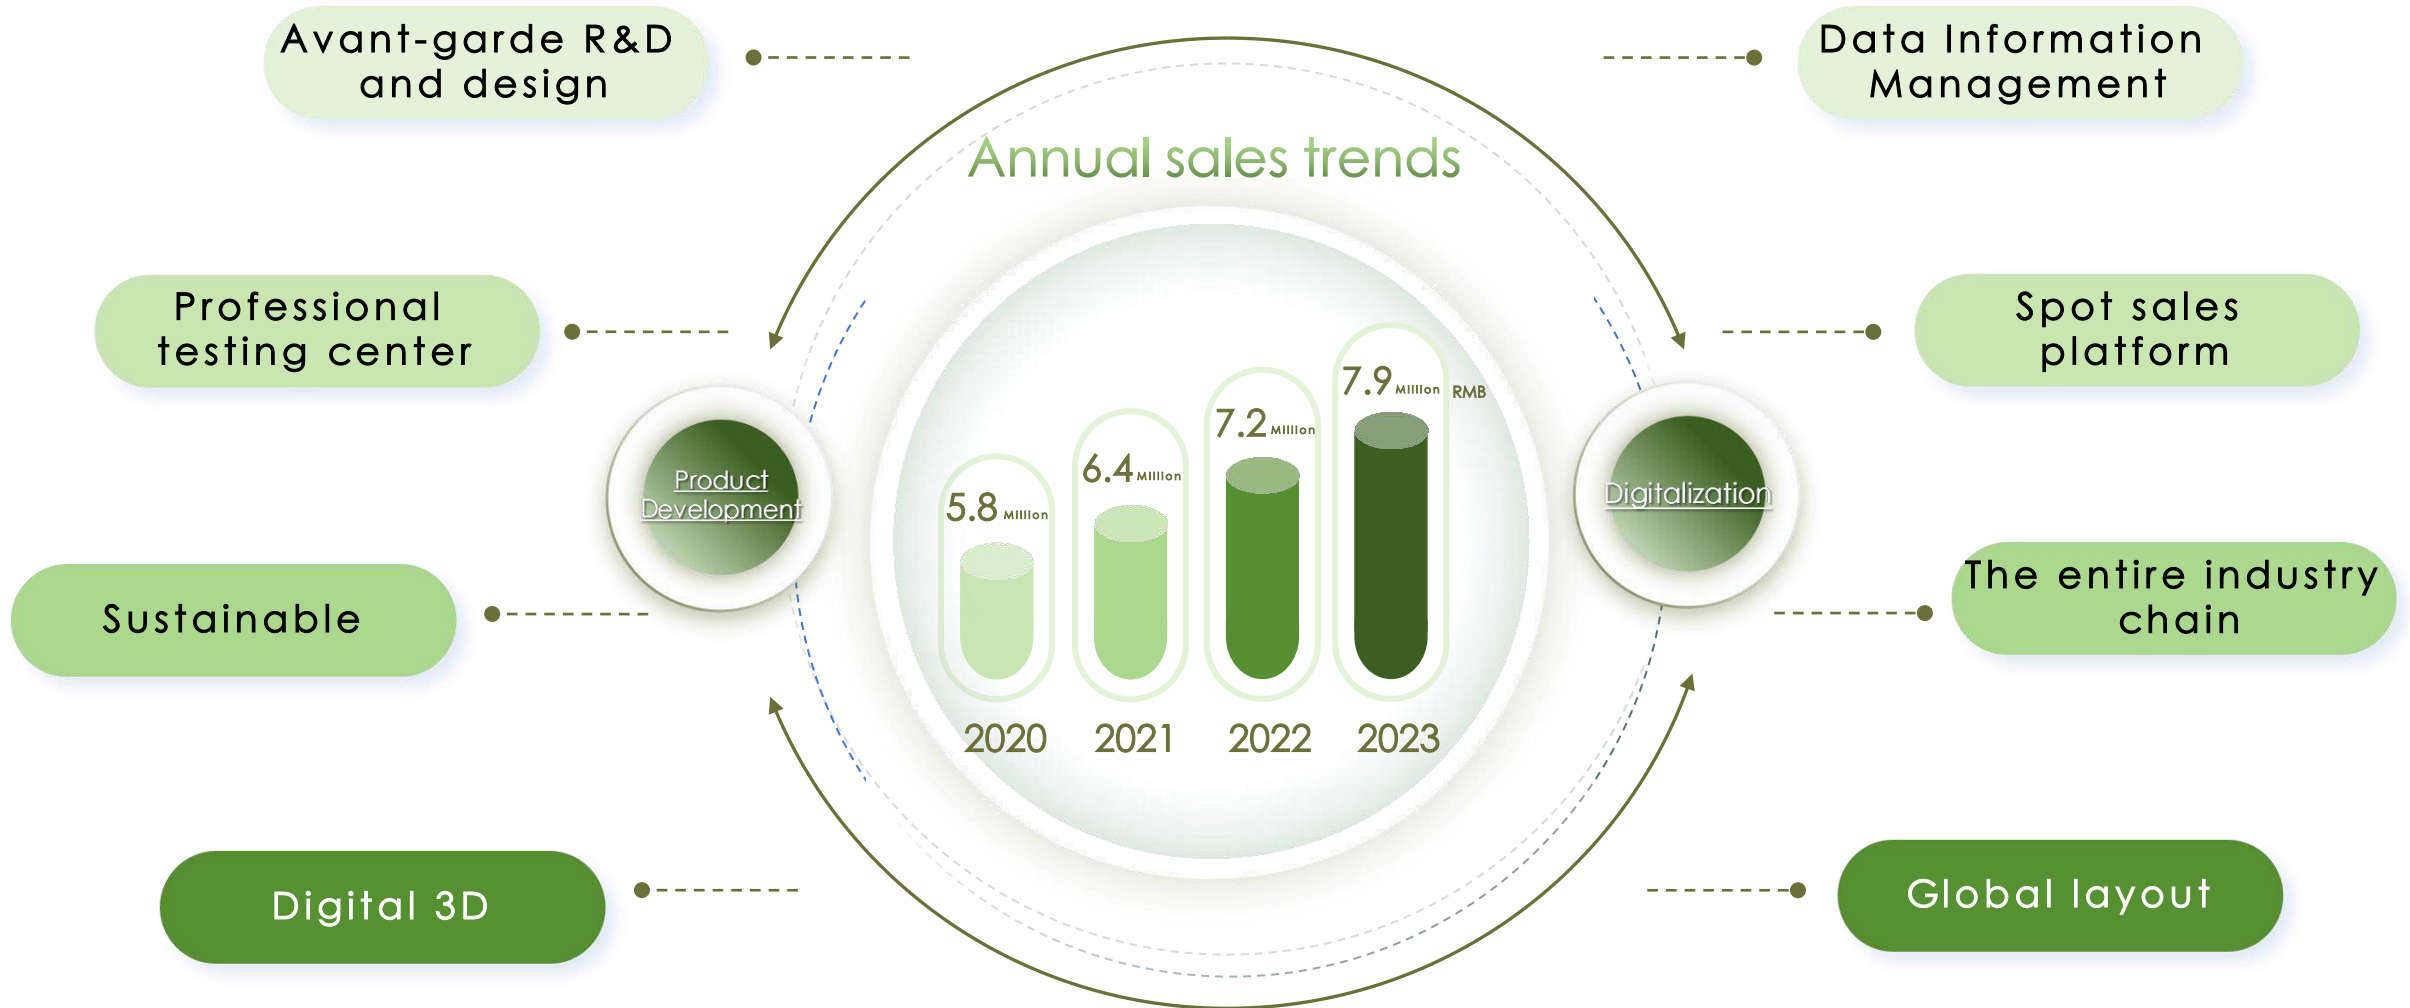

■ Core Competitiveness-Global Layout

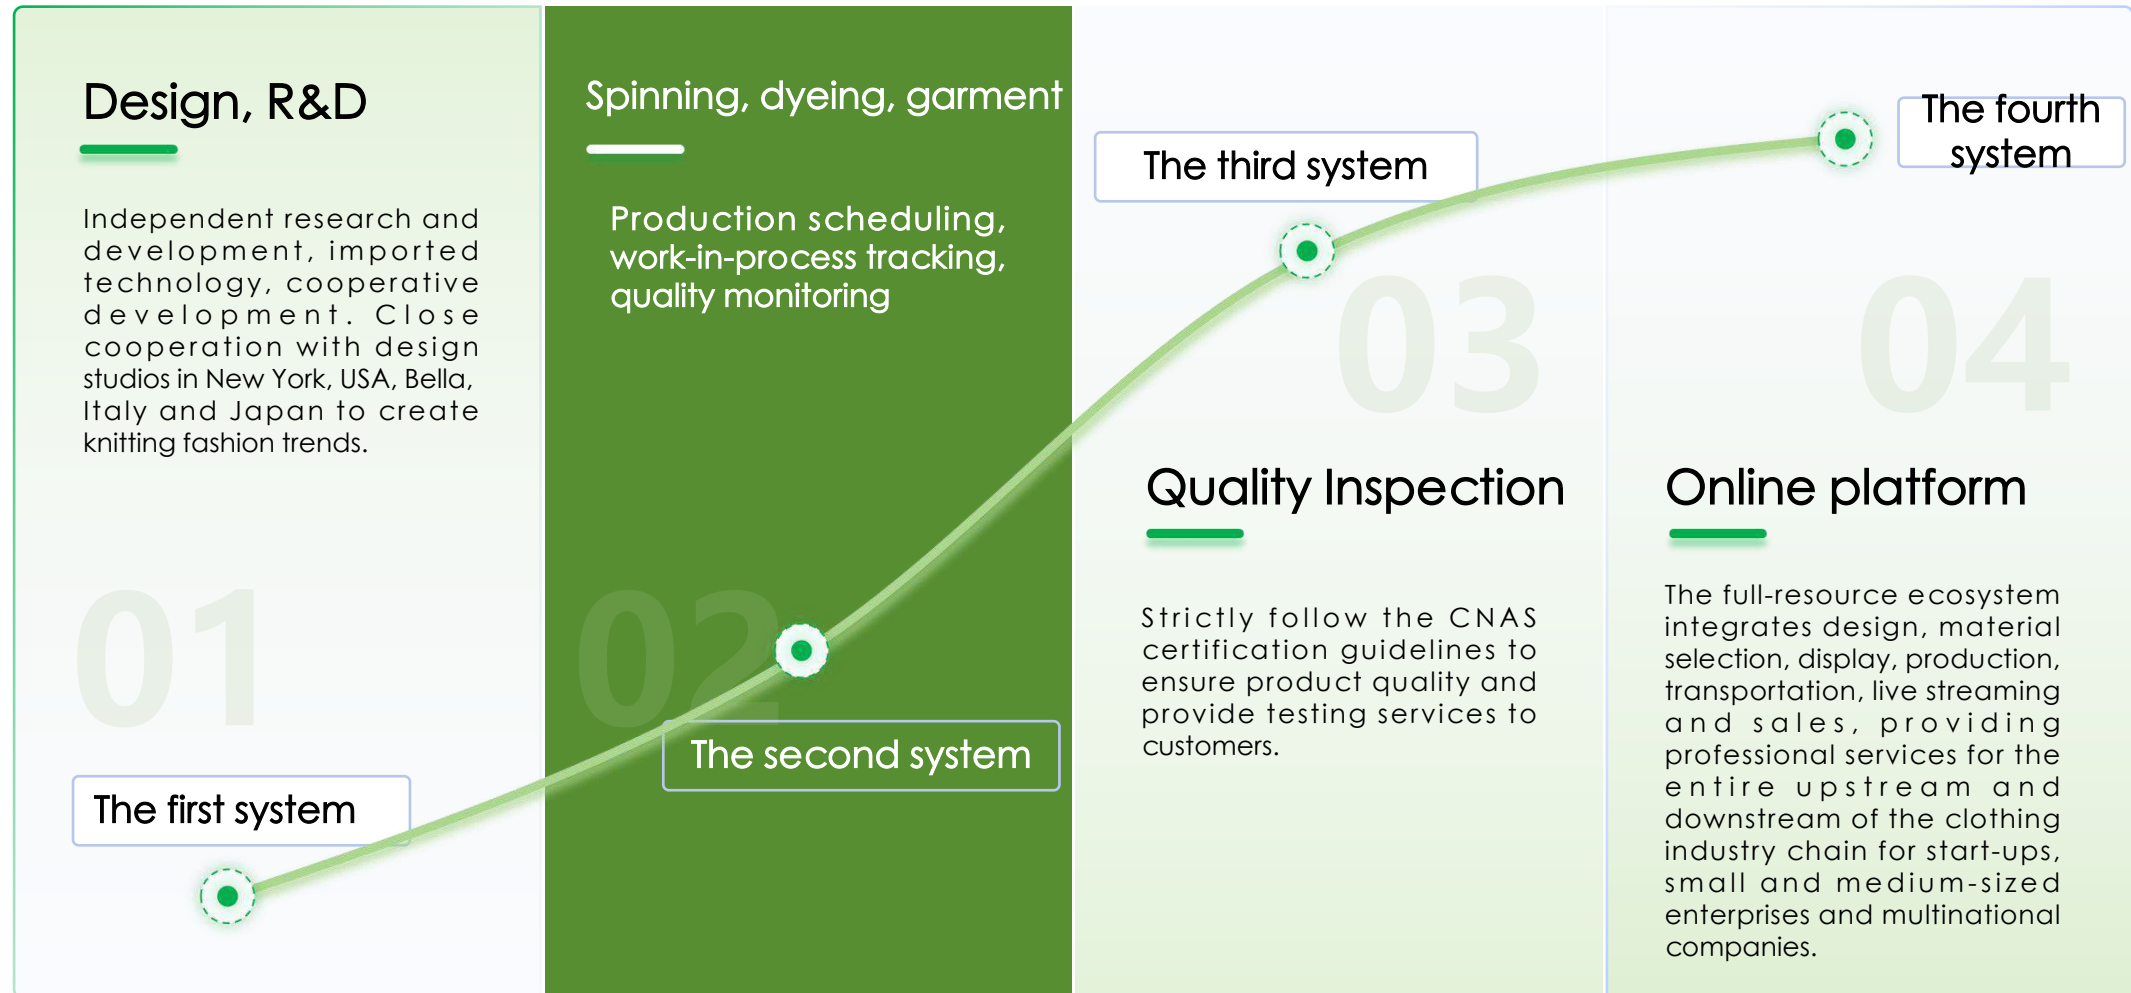

Sales network covers more than 50 regions and countries around the world

■ Core Competitiveness-Entire Industry Chain

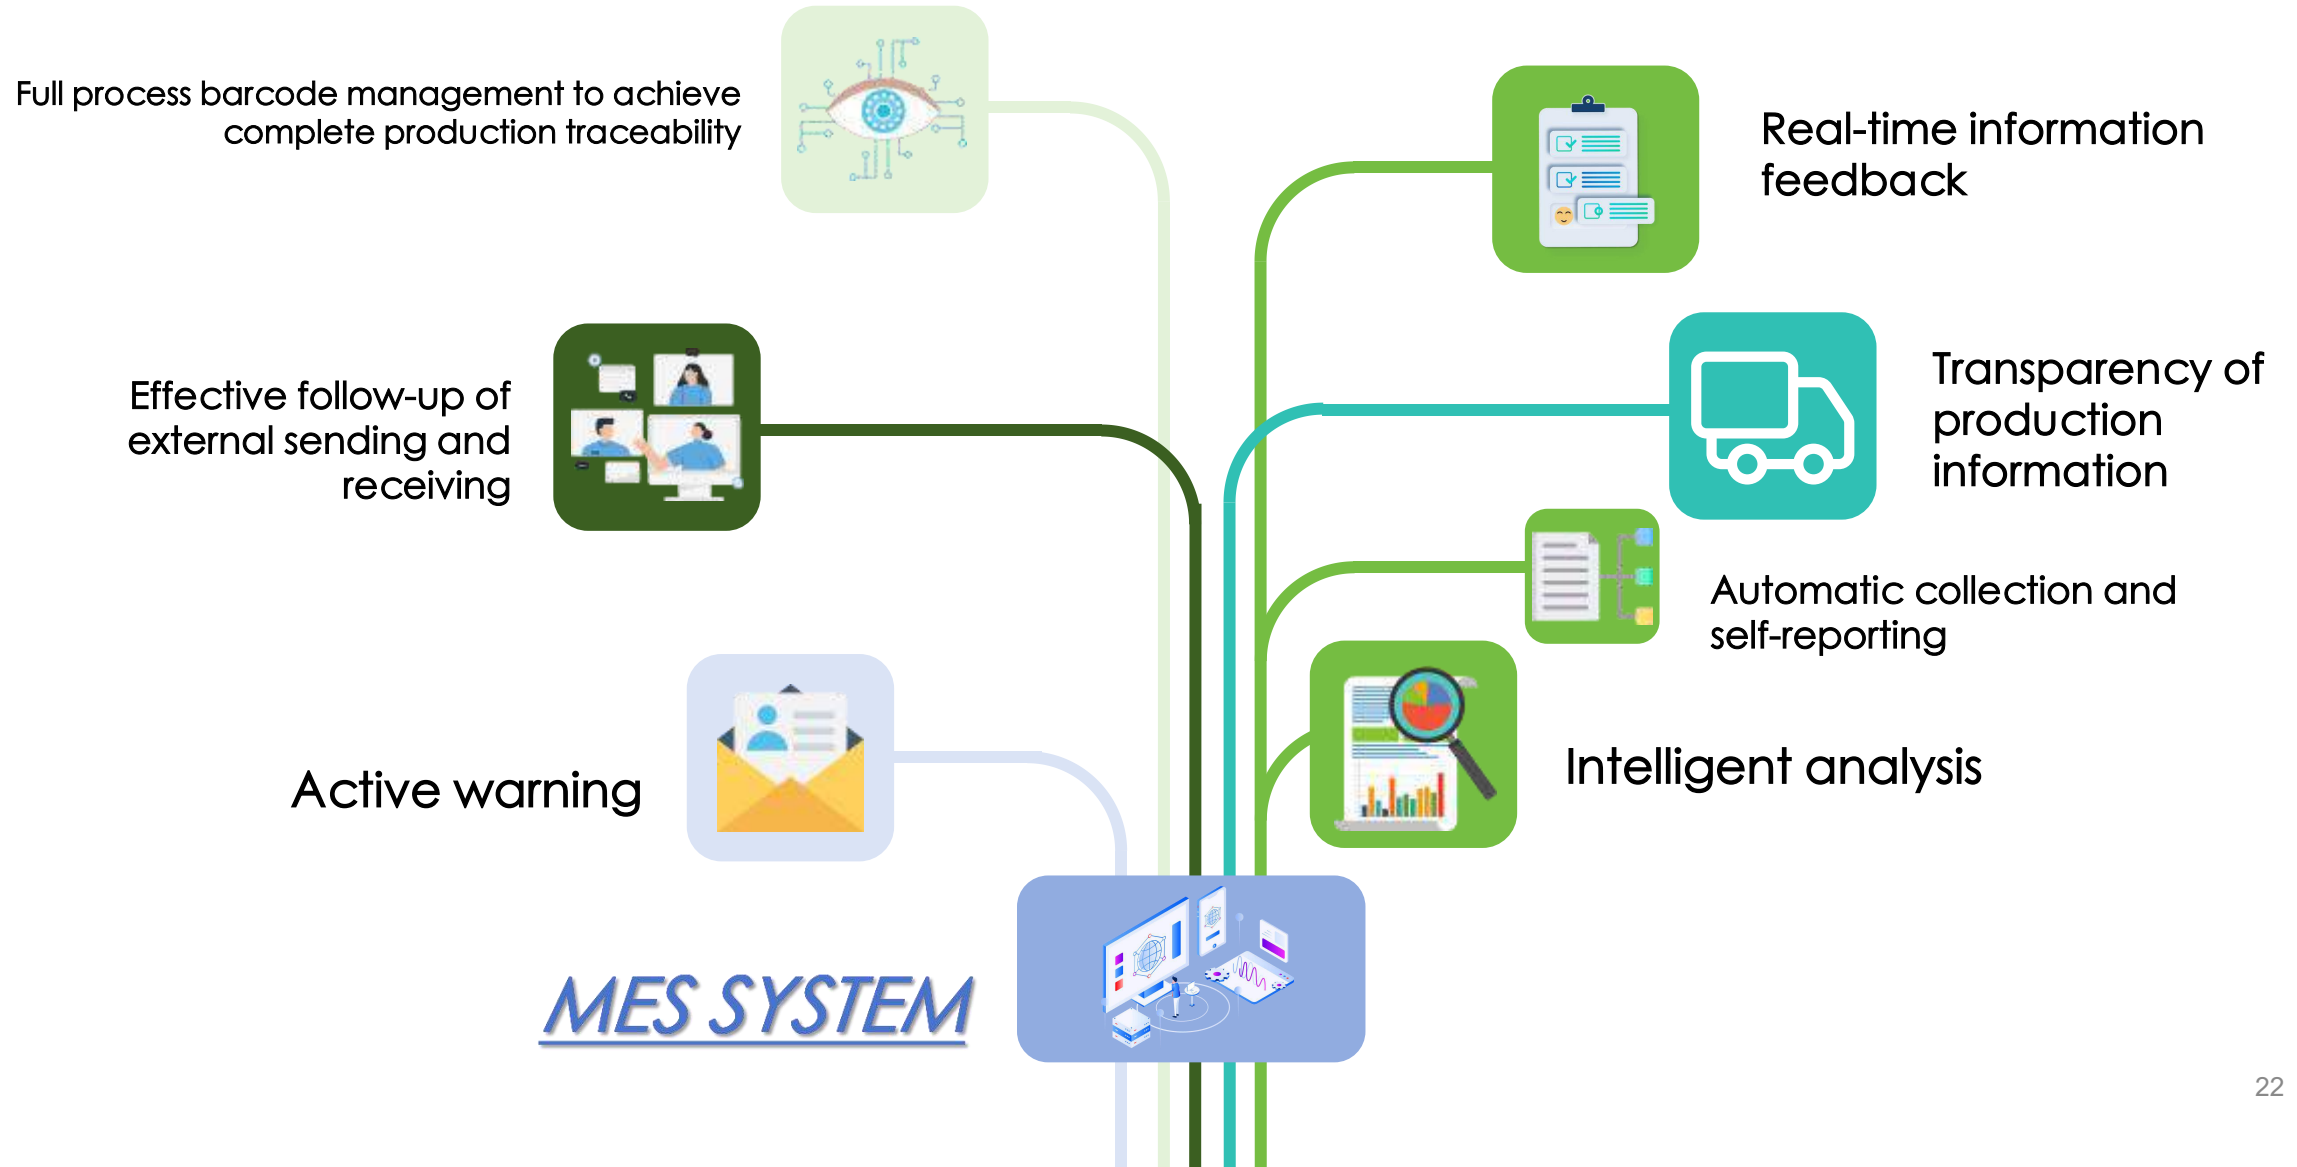

■ Core competitiveness-full industry chain management system

■ Core Competitiveness-Intelligent Manufacturing

■ Core Competitiveness-Intelligent Manufacturing

■ Core Competitiveness - Global Talent

---Creative design, technology research and development

Research trends, make reports, and provide customers with product design suggestions and directions

European designer team

With a large sample room to meet the needs of different customers; knitting patterns, colors and functional development and research.....

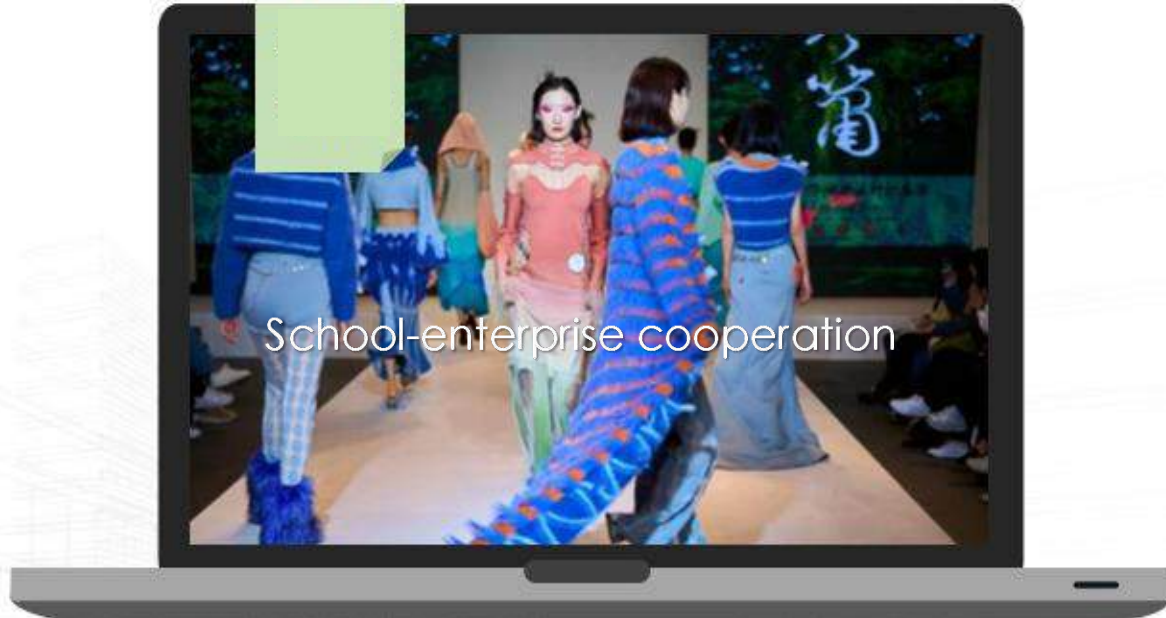

Chinese designer team

Market research on customer preferences, using big data for analysis and research.....

Japanese and Korean designer team

■ Core Competitiveness - Global Talent

Planning together

Building together

Mutual benefit

Co-management

Four In

..... Talent plans, product trends, industrial projects, and industrial needs enter the campus.

Four Out

..... Produce models, experience, results and benefits.

A Base

..... Internship practice base

03

Digital Fashion

■ Sustainable Fashion - Global Mainstream Sustainable Certification

SUSTAINABLE

Adhere to the concept of green and environmentally friendly development
Focus on sustainable development plans.

Green raw materials

Social Responsibility

Sustainable Fashion-Practicing Sustainability

■ Sustainable Fashion - Compliance and Regulation

Code of Ethics

In 2024, YARNS&COLORS obtained the three-in-one ISO system certification, and all employees work under the strict 6S standard management system.

Customers and Services

We actively cooperate, understand and realize the requirements put forward by customers, focus on the market and respond quickly. We provide customers with one-to-one consulting services and personalized customization services.

Sustainable Fashion - Multi-dimensional Qualifications

We attach great importance to the protection and application of patented technologies, own more than 50 patents and computer software copyrights, and have reached excellent partnerships with industry peers many times; we will continue to launch more competitive products to create greater value for customers and society.

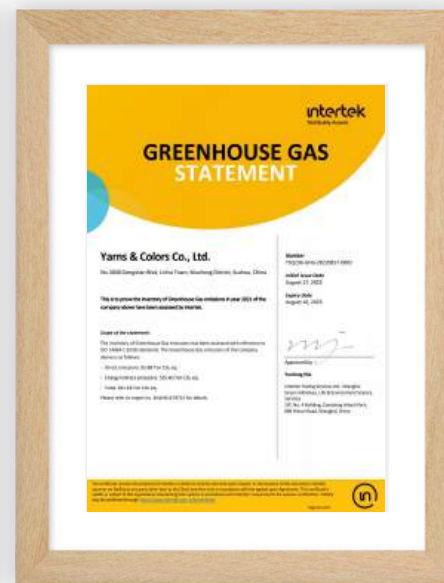

Yarn patent certification

Product Trademark

Excellent Partner

Carbon Inventory

Computer copyright

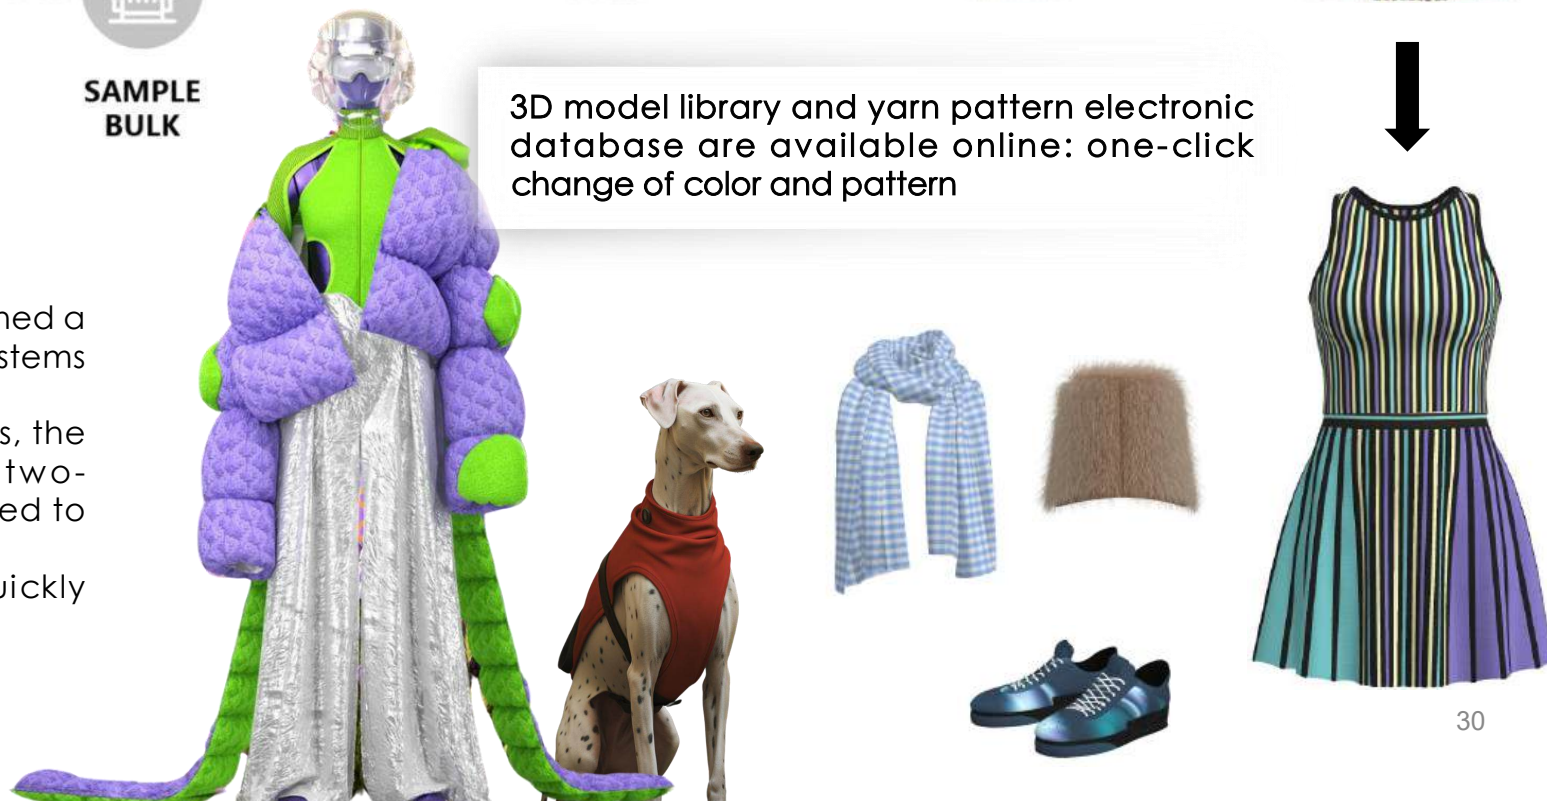

■ Sustainable Fashion-AI, 3D Design and R&D

3D Process

3D model library and yarn pattern electronic database are available online: one-click change of color and pattern

- A professional 3D designer team has established a digital clothing design process through 3D systems and AI design.
- Through virtual stitching of sample garments, the proofing process is reduced, and the two-dimensional paper pattern can be presented to you through a three-dimensional effect.
- You can change the fabric online and quickly check the effect of the finished garment.

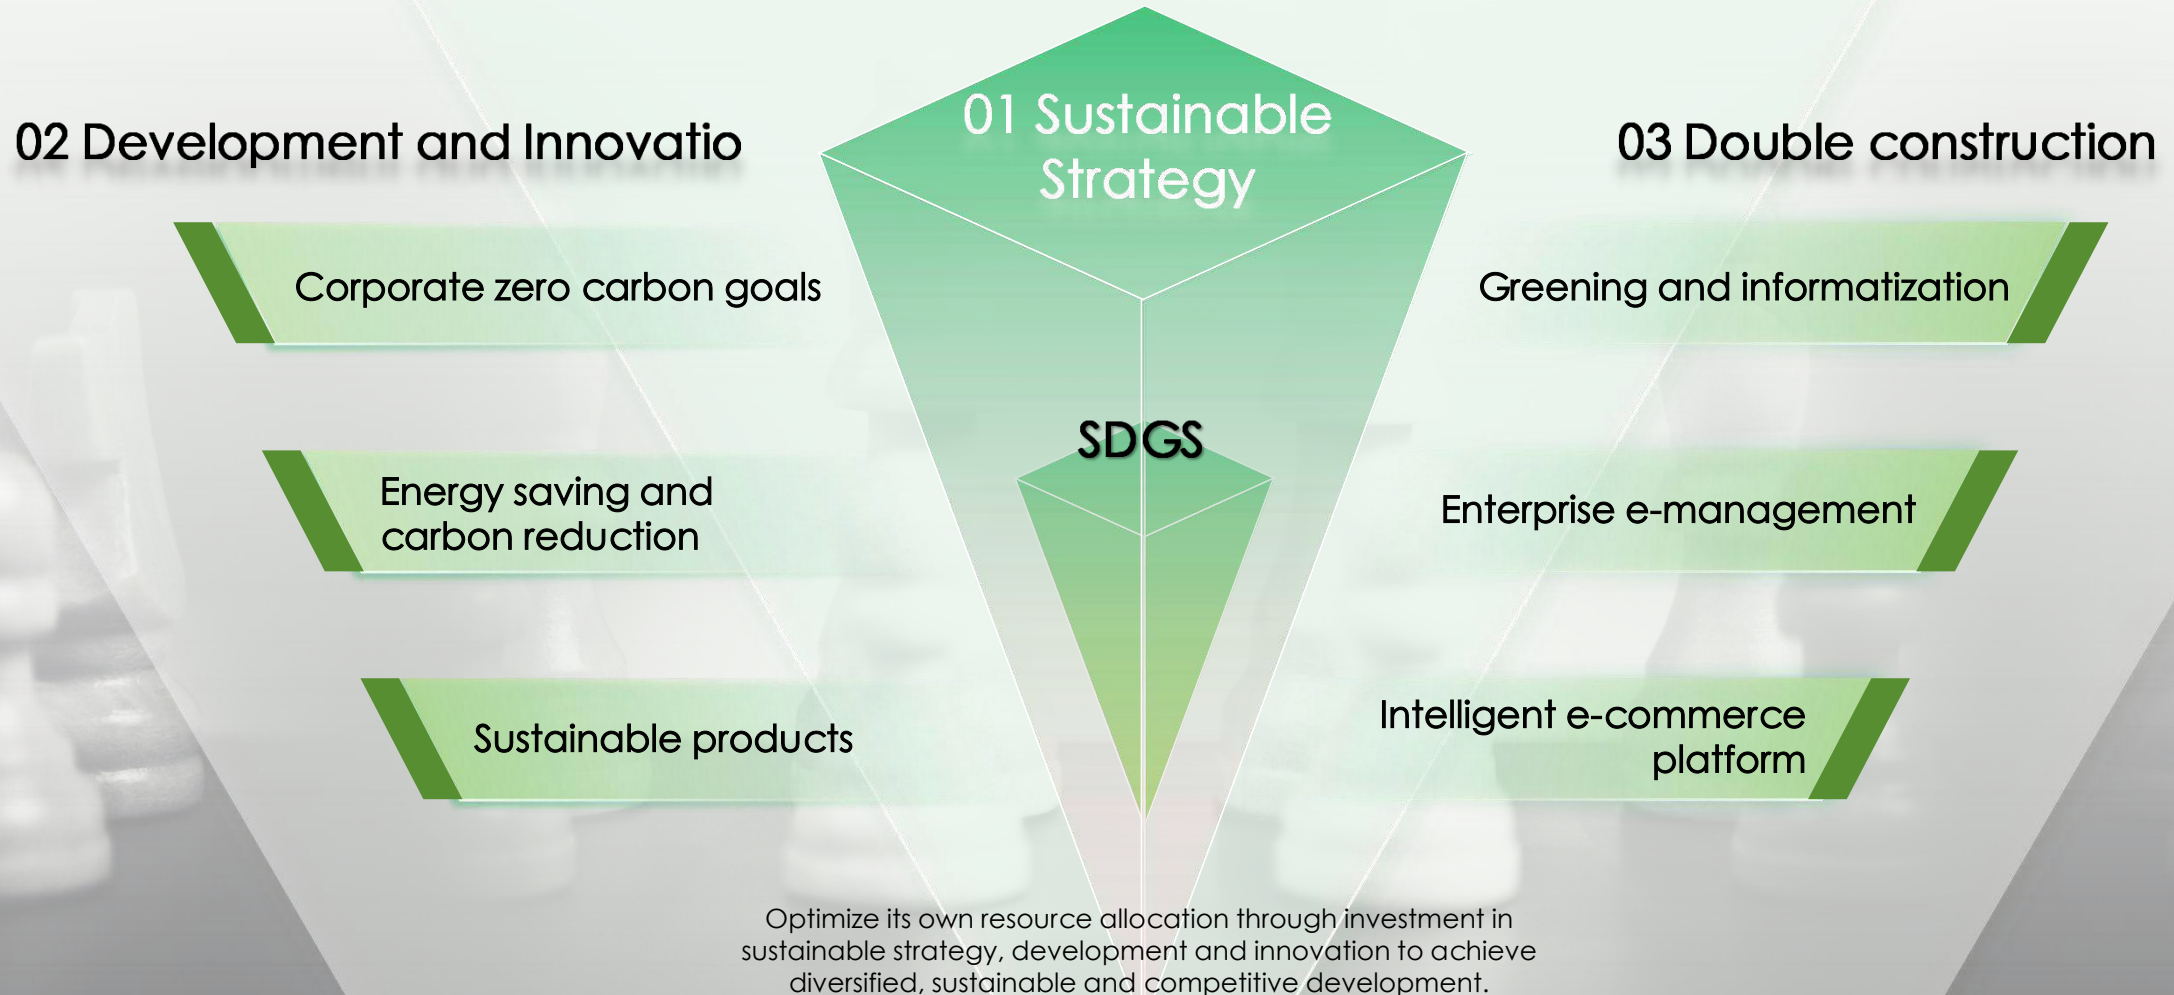

04

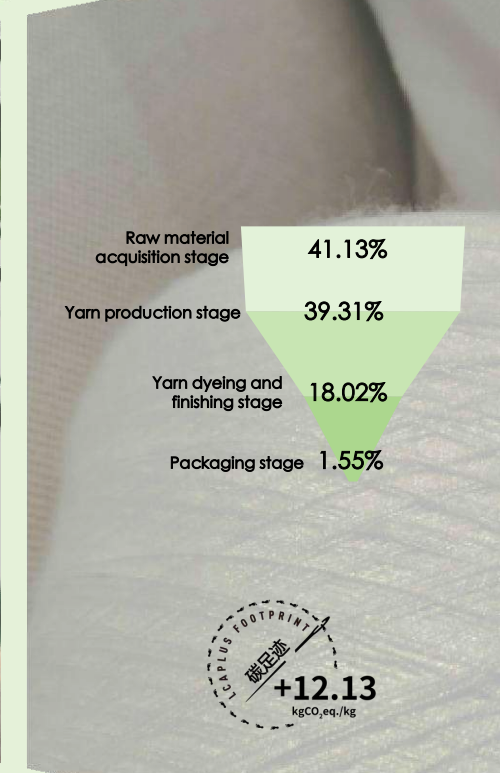

Future Development Plan

■ Future Development Plan-Strategic Investment

■ Future Development Plan-Carbon Targets and Commitments

Goal 1: By 2025, the company's carbon dioxide emissions will be reduced by 30% compared to 2021;

Goal 2: By 2050, truly achieve "carbon neutrality";

Goal 3: There will be more product carbon footprint certification.

■ 10,000+ Global Partners
