

Go Green!

Available August 1- November 16, 2018.

**Northern Sonoma County
Air Pollution Control District**
150 Matheson St.
Healdsburg, CA 95446
(707) 433-5911

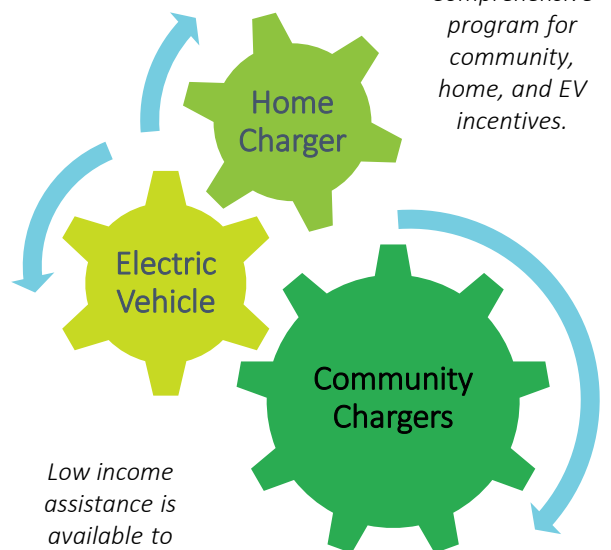

Go Green! Your Community, Home, & EV Program

The Northern Sonoma County Air Pollution Control District proudly presents *Go Green!* A grant and rebate program to support the development and proliferation of a clean air, electric vehicle (EV) community in our District.

The fossil-fuel transportation sector accounts for ~65% of the state's green house gas emissions. It also emits toxics, fine particulates, and pollutants that form smog in the air we breathe. A transition to an EV community protects our air quality and fights climate change.

Go Green! Offers grants for public chargers, and rebates for home chargers and EVs to residents of the Northern Sonoma County Air Pollution Control District.

Comprehensive program for community, home, and EV incentives.

Low income assistance is available to qualifying applicants.

See back for rebate and grant incentive amounts.

For more detail and applications visit us online at: NoSoCoAir.org
