

TS22 KIT (DK22)

Tensioning Solutions is pleased to propose a set of inexpensive demonstration kits allowing you to discover and test the products.

The aluminum bars for these kits have a maximum length of 5' 8" to be shipped Fedex Ground. This length is sufficient to create a 3' x 2' frame to practice and test, for instance, different printed media.

<p style="text-align: center;">TS22</p> 	<p style="text-align: center;">(Product reference: DK22)</p> <p>This kit will allow you to test our TS22 product, especially designed for creating signs for:</p> <ol style="list-style-type: none"> 1. Box truck sides / semi-trailers sides 2. Stores / Malls interior decoration 3. The TS22 can be bent to fit curved walls
