

Flexible Spending Accounts help you offer more for your employees...

More value

Section 125 FSA plans deliver a full menu of benefits to your employees **with pretax savings**. They pay for the benefits they want, and not for ones they don't.

More participation

We help you launch your Section 125 program with tools to educate your employees. They're **more likely to participate** because they can pay eligible expenses with pretax dollars.

More money

The bottom line? Section 125 benefits can **reduce employee's taxes and increase their take-home pay**. FSA plans give workers more coverage—and more money in their pockets.

And offer more for you!

When your employees participate in Section 125 FSA plans, they reduce their taxable income—so your **company's payroll taxes are reduced, too**. Plus, you can offer a wider range of benefits and services, which helps you retain good employees.
