

## 2030 Complete Wet dry filter Package

Packaged for use on standard, NON pre-drilled aquariums, that requires an external overflow assembly.

Aqua-Link 2000 series filters are manufactured with ¼" thick, high grade cell-cast acrylic. These durable hand crafted units are "Smart Chassis Design" that provide exceptional biological, and mechanical functionality; they are extremely versatile allowing you to tailor units by adding additional accessories to meet your specific needs and enhance life support for any freshwater or marine aquaria.

Your purchase inquiry is for a new Aqua-Link 2030 Complete Dual Chamber, Wet/Dry filter system designed and rated to provide biological life support for standard size aquariums up to 200 gallons. This package provides the main core unit, bio-media, and 2 pre-filter/surface skimmer assemblies. Dimensions: 30" x 10" x 16" (plumbing fittings and lid removal require an additional 3" inside height). Provides a hefty; 20.8 gallons sump capacity to reduce evaporation maintenance.

Your purchase will include most of the items shown in the main photo of this variation.

**(NOTE)** Due to multiple styles and set-up applications, it is not practical to include a "One Size Fits All" water pump. Therefore a water pump, return line plumbing, air pumps, and water heaters are not included with this package but can be purchased separately. Please browse the supplemental photos that demonstrate various attachments and/or possible applications

### This Package Includes :

Bio-Media, Foam Pad, Pre-filter Assembly & Hose.

- (1) Core "Smart Chassis" Dual Chamber Filter/Sump unit. (Nitro chambers hold 10.4 gallons of primary bio media) with built-in submersible heater chamber and air injection tubes.
- Primary Bio Media; PVC Bale or polyamide netting (DLS) (to cultivate Nitrosomonas bacteria) *{\*note\* Bio Media may vary depending on availability at time of request} (Colors may vary). Other bio-medias may be available as an option if requested but may result in an additional up charge in both materials and shipping)*
- (4) Styrene egg crate bio-media support trays.
- (2) Secondary foam media pads (to cultivate Nitrobacteria, to aid in the removal of nitrates). This important step is often deleted in other brands.
- (2) Chamber Lid with 1", 90 degree PVC bulk head drain fittings.
- (2) Split design chamber drip tray is supplied by default. (a spray bar assembly, in lieu of drip plate may be requested at time of purchase)
- (1) Sump lid; removable and hinged to provide easy access to sump pump and added peripherals.
- (2) 2110-Long Pre-filter box 550 gph each. Self leveling, anti bleed feature, allows auto restart after power failure. The longer build provides an aeration mixing chamber to enrich water with much-needed oxygen. Includes a 5/8" accessory tap.
- (2) Reusable/replaceable 20 PPI foam mechanical filter pad.
- (2) Skimmer box; one hand adjustable with anti-tilt locking feature.
- (2) Siphon u-tube (1-1/4" o.d. acrylic) Self leveling, anti bleed feature. (Auto restart after power failure)
- (2) 1-1/4" od x 36" Flexible drain hose.
