Additional forms are available at dmv.ca.gov and at all DMV offices. Refer to Vehicle Verifiers Handbook (OL 31), available at dmv.ca.gov , for instructions.
When inspection of a VIN reveals evidence of tampering, alteration or obliteration of the number, immediately notify the nearest DMV, Investigations Section.
For Specially Constructed Vehicles (SPCNS), enter "0000" for the year model. SPCNS vehicles are not manufactured vehicles and do not have a year model.
The Gross Vehicle Weight Rating (GVWR) is found on the US Federal Certification Label. NOTE: GVWR is Gross Vehicle Axle Rating, not GVW/R. Pickups over 11,499 GVWR are BTM "VA". Pickups under 11,499 GVWR have the following BTMs: 3C, 4C, PC and PK.
Pursuant to federal law, a 17-digit VIN that passes check-digit is required on all 1983 and newer year model motor vehicles, and all 1985 and newer year model trailers. The model year of 1983 and newer vehicles is encoded in the 10th digit of VIN.
Trailer Coaches do not exceed 40' (480") (L) or 8 1/2' (102") (W). Camp Trailers do not exceed 16" (192") (L) or 8' (96") (W). Motorhomes do not exceed 45' (540") (L) or 8 1/2' (102") (W). *(overall length (L))
A 2003 and newer year model OHV with a "3" or "C" in the eighth position of the VIN are non-complying OHVs and are issued a red OHV sticker.
DO NOT use the Federal Certification Label as the primary source for the VIN. If any damage has been done to the label or it cannot be read, you must go to another source for secondary verification, such as: Under the hood, Firewall/Manufacturer's label.
For large commercial vehicles, the emissions label on the doorpost is often the noise emissions label and is not the EPA acceptable label. The emissions label is often under the giant hood in the engine compartment.
The following multi-designed vehicles are pickups (PK): Chevrolet Avalanche, Cadillac Escalade EXT, Hummer H2 SUT, Nissan Frontier, and Ford Explorer Sport Trac.
Pickups with a permanently attached camper shell must also meet the definition of facilities for human habitation or camping purposes to have BTM "PM".
Licensed vehicle verifiers cannot perform the VIN inspection for certain vehicles including, revived junk, revived salvage, specially constructed (SPCNS), motorcycles with an unavailable California record (last registered in CA, but record no longer appears on DMV's database) or with documents from a foreign country, motorcycles with engine changes.
Only a verification form completed by an authorized DMV employee is acceptable on an application for on-highway (street) motorcycle registration of any motor vehicle currently registered as an OHV or titled with type license "C2" (title only).
Golf Carts are motor vehicles designed to carry golf equipment, and carry no more than two persons, including the driver, and have at least three wheels in contact with the ground, and weigh no more than 1,300 pounds unladen, and not exceed a speed of 15 miles per hour (MPH).
Optional digital photographs are not required, but may be attached by licensed vehicle verifiers to further substantiate this verification. State number of photos and briefly describe photos in the REMARKS section.
