Geoff,

I want to take the opportunity to thank you again for all your help and preparation you provided to enable me to obtain my Private Pilot license. Being a pilot was a childhood dream and until yesterday I didn't realize how satisfying it is to make an ambition come true – no matter how long it takes!

Your love of flying, and more particularly, your desire to train competent, capable, and well rounded pilots comes through in every aspect of the training you provide. You intuitively grasped how I best learn, by repetition, doing it (as often as it takes) and analyzing the weak points so that they can be corrected. Your 'mantras' (e.g. Performance = Pitch + Power) have allowed me to absorb and retain the fundamentals as well as the complex issues.

I appreciate your patience and persistence in getting me to this point. Your attention to detail and thoroughness is legendary, every landing, every maneuver, every aspect of the training is recorded and referred to as needed, I always felt you knew exactly at what point I was at and what I needed to focus on. Throughout the 15 months of training with you I always felt confident and trusted that you were providing what was needed for me to become a capable pilot, rather than what was needed for Orlandi Flight Center

Geoff, I intend to continue my development as a pilot, and looking forward to more learning with you.

Sincerely

Erwin Metius
