**Welcome to Hager Worldwide's  
Product Resource Catalog  
6th Edition**

***About Us...***

Hager Worldwide is an import/export company that manufactures and markets dental products. We've brought ideas from around the world to the dental industry for over thirty years and currently have over 3,000 different specialty and oral evacuation products to suit your needs.

***Our Commitment To Excellence...***

Hager Worldwide dedicates itself to providing the dental community with the highest levels of quality products and services.

Throughout the Hager Worldwide catalog you will see new, innovative dental products. On average, we introduce 30 new products to dentistry each year. If you can't find the product you are looking for in your preferred dental dealer's catalog, look to Hager Worldwide.

The Hager organization has become ISO 9002, GMP and CE Certified and follows the stringent guidelines of the European Medical Directives. We can therefore assure you and your patients that all of our products are manufactured and distributed under the highest standards possible.

***To Serve You Better...***

Hager Worldwide doubled its operational capacity when it acquired the Bull Frog Manufacturing Company of Vancouver, WA in April of 1995. Our facility in Vancouver, now the Bull Frog Motor Repair Division has complete Motor Repair capabilities to service North America. Product administration, distribution, and warehousing continue to be centered at corporate headquarters in Odessa, FL.

Together with our parent company, Hager & Werken, a German-based dental firm with over ninety years of dental experience, we have built a reputation for product innovation and quality.

**OneTouch****Topical Anesthetic Gel (Oral)**

- A light touch on top of the container dispenses the right amount of gel
- Unique dispenser minimizes waste and risk of cross-contamination

UNIQUE

OneTouch is an oral topical anesthetic gel indicated to minimize pain in the oral mucosal tissue arising from needle puncture, deep scaling procedures, prosthetic adjustments, clamp or crown placement, removal of primary teeth and suture removal. OneTouch produces topical anesthesia within 10 sec. of application and lasts for at least 15 min.

**QuickSwab****Foam Applicators, Non-Linting**

- For the application of topical anesthetics and for vitality testing
- Ideal for oral applications
- Economical and disposable
- Consistently sized molded foam tips

UNIQUE

QuickSwabs are the ideal oral applicator for many procedures. The molded polyurethane foam tip is highly absorbent and chemically resistant.

With 3/16" (.5 mm) dia. tip.

Pack of 50, 3" (7.6 mm) length	# 605 218
--------------------------------	-----------

## Perfect-Plast

### Custom Pressed Tray System

- Simple pressed tray, no vacuum unit required
- Easy to use: heat foil over a flame, place onto the model, press down with the putty, cut ... ready within 30 seconds
- Produces accurately fitting protective covers, rigid wound dressings, fluoridation trays, bleaching trays, matrices for temporaries

Perfect-Plast Complete Kit: Plastic Foils (50), Foil Holder (1), Silicone Putty (1), Non-Stick Silicone Spray (1) # 605 259

#### Refills:

100 Plastic Foils	(1.25 cm x 1.25 cm)	# 605 261
50 Plastic Foils	.6 mm Thickness	# 605 260

Foil Holder - large frame	(1.25 cm x 1.25 cm)	# 605 262
Foil Holder - small frame	(6.5 cm x 6.5 cm)	# 605 263
50 Soft Foils	(1 mm)	# 605 257
50 Soft Foils	(1.5 mm)	# 605 258

UNIQUE

## Occlu-Print

### Stamp for Fissure Design of Posterior Teeth

Occlu-Print is a small stamp used to modulate the occlusal surface before the composite material is polymerized. The use of these preformed occlusal stamps (or matrices) not only saves time by minimizing the number of necessary contouring adjustments, but also enhances the final product with perfect surface angulation.

- Saves time vs. manual modulation
- Available in different shapes and designs: molar and premolar stamps (upper and lower jaw and left and right side)

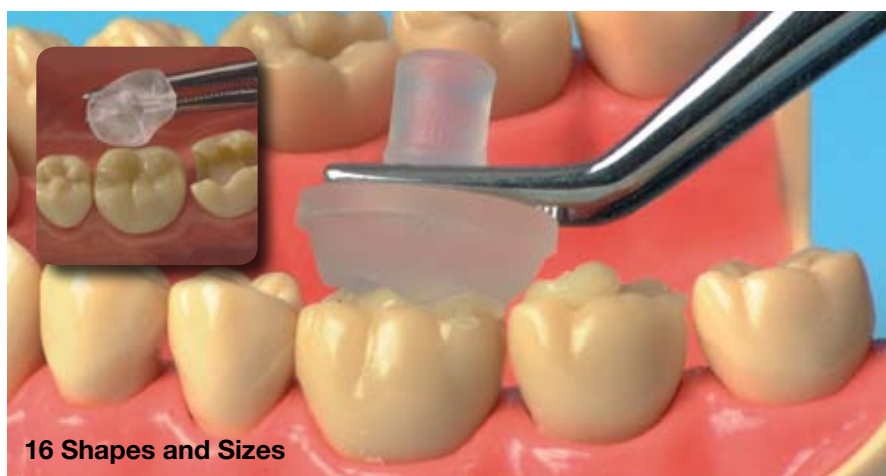

Occlu-Print Starter Kit: Includes 2 stamps

of each size/shape (total of 32) # 605 494

Occlu-Print Introductory Kit: Includes 10 stamps

of each size/shape (total of 160) # 605 477

UNIQUE

## Compo-Blitz

### Diamond-Impregnated Natural Felt Wheel

- Bufs composites, ceramic and porcelain to a high luster finish, polishes in 15 seconds
- Friction temperature >30° C. (82° F)
- Mounted for contra-angle
- Use light pressure and approx. 5000 rpm.
- Available in 2 sizes: 1.5 mm and 3.0 mm thick

Compo-Blitz (set of 12) for contra-angle

1.5 mm # 503 320

3.0 mm # 503 321

Assorted (6 of each size) # 503 322

## Diamond Glosser

### Diamond Impregnated Micro-Polisher

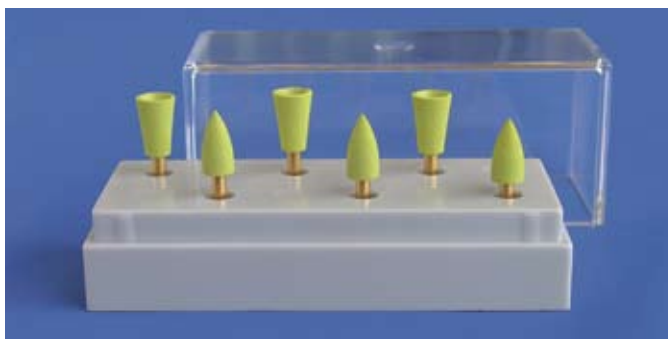

- Natural diamond grit for an optimum surface polish in one working stage
- Specially developed for composite and compomer fittings
- Easy to use and time-saving
- Operate at 5,000-7,000 r.p.m., Length 10 mm
- Reusable (*Autoclavable*)

(6/box, 3 ea. pointed and cup) # 304 220

#### Refills:

Pointed, 50 grain (6) # 304 221

Cup, 60 grain (6) # 304 222

## Miracomp®

### Application Instruments for Composites

- Allows easy contouring/condensing of composite
- Special nonstick surface
- Double-ended handle and 6 different tips
- (Autoclavable) handles only

#### Miracomp Introductory Kit

10 handles + 60 tips (10 ea.) # 355 060

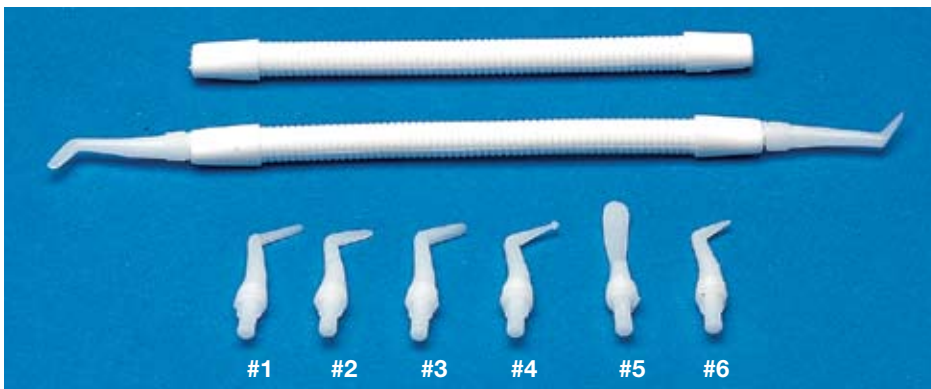

Mini Kit: 5 handles + 30 tips (5 ea.) # 355 062

#### Tips Separate (Bag of 10):

No. 1 # 355 063 No. 2 # 355 064

No. 3 # 355 065 No. 4 # 355 066

No. 5 # 355 067 No. 6 # 355 068

## Mirafill™ Composite Instruments

Mirafill instruments have an ergonomically designed finger tip handle with very fine blades. The special acrylic composition guarantees that no composite will stick to its surface. Mirafill is available in a set of five instruments: 3 double-ended filling instruments with tapered ends and 2 double-ended spatula instruments.

- (Autoclavable)

Mirafill Instruments (Set of 5) # 355 439

#### Individual Instruments:

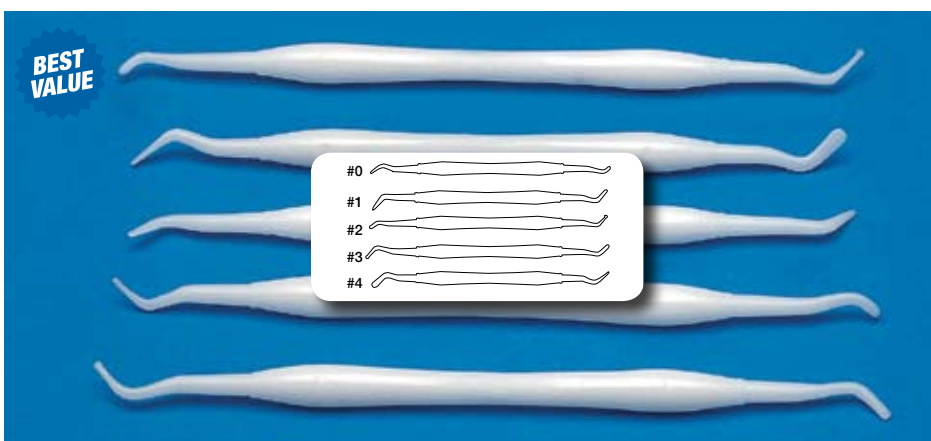

#0. Application: a larger ball-point end and spatula blade end. (1) # 355 442

#1. Application instrument: a very fine pointed end and a very thin bladed end. (1) # 355 440

#2. Filling instrument: a very fine tip end and a small spatula blade end. (1) # 355 441

#3. Filling instrument: Heidemann spatula with a small blade at each end. (1) # 355 443

#4. Filling instrument: double-ended Heidemann style with large blades at each end. (1) # 355 444

## MiraBrush

### Bendable Brushes for Easy Application

- Flexible: Bends to almost any angle
- Extra long handle 5.9" (15 cm) provides access even to hard-to-reach areas
- Safe: No cross contamination
- Yellow handle = pointed brush for precise application
- Blue handle = flat brush for use on larger surfaces

Box with 100 brushes:

Yellow (pointed) # 605 430

Blue (flat) # 605 431

## Mirafit BC

### Mirafit BC are New Polyester Cones

- Time Saving
- No Flow Off

Use with build-up material to produce an even stump on a build-up. The transparent polyester (non-stick) crowns come in 6 different slightly conic shapes which can be cut with a pair of scissors.

Starter Kit contains 72 crowns, 12 each of the 6 sizes.

Starter Kit: 72 crowns, 12 of each size # 605 470

Refills available in boxes of 10 crowns.

## Implant Tweezers

### With Locking Mechanism

- Special grooved ends grip and hold small parts
- Ideal for firm seating of ceramic inserts
- Chrome-plated

Implant Tweezers (1) # 304 451

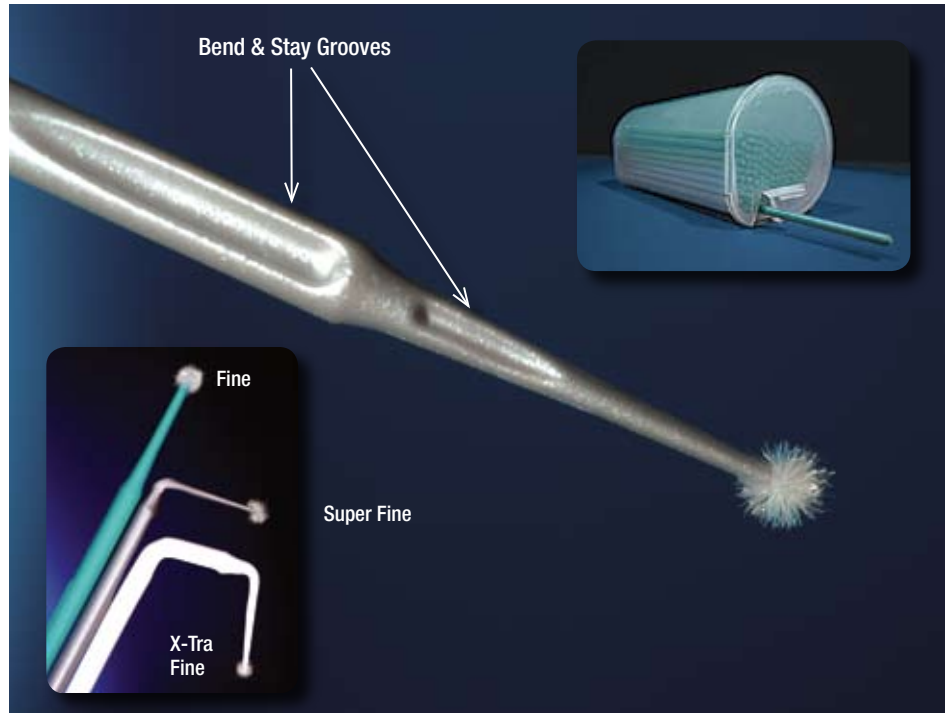

## Memory Tips

### Micro-Applicator Tips

- Bends and stays where you bend it
  - Holds and releases solutions well
  - Non-linting – no remaining fiber residue
  - Packaged in hygienic tamper-free boxes
- Medium (teal) is useful for scrubbing methods  
Small (silver) is the most popular size  
Extra Small (white), Ideal for controlled application to the upper or lower anterior from the lingual

Made of polypropylene

Super Fine Tip - White	(400)	# 605 175

## “Super” Quick-Tips

### Micro-Applicator Tips (Premium value)

“Super” Quick-Tips are totally resistant to acetone and acid etch solutions and are extremely bendable.

- Testing by independent laboratories shows that competitive fiber micro-applicators may “melt” in these solutions and leave a residue on the surface of the tooth.
- “Super” Quick-Tips are especially recommended for use with all etching and bonding materials.
- “Super” Quick-Tips feature a new hygienic white color

“Super” Quick-Tips, polyester

## Compo-Brush®

### All-purpose Application Brushes

- Ideal for applying etching, bonding agents, medicament, varnish, etc.
- Tips available in 2 forms: straight (#8) and contra angle (#9)
- Brushes available in 2 thicknesses: White / Fine (#10) Brown / Super-Fine (#11)
- Compo-Brush consists of: double-ended handle, interchangeable tips and brushes
- Handles are (Autoclavable)

Compo-Brush Set: (1)

D. E. Handles (10), Straight tips (10)

Contra-angle tips (10) and Brushes (100) # 605 230

Brushes: (Box of 100)

#10 (fine) # 605 231

#11 (super-fine) # 605 232

Adapters: (Box of 10)

#8 Straight #605 233

#9 Contra Angle #605 234

## Brilliant®

### Front Surface Mouth Mirror

- Comfortable finger-form handle
- Provides optically correct viewing
- Hygienically, individually wrapped
- Extremely thin mirror available in 2 sizes: 19 mm dia. (#4) and 23 mm dia. (#5)
- Lens protected by peel-off foil prior to use
- A patient home care product
- (Cold-Sterilizable)

Brilliant Mouth Mirror (Box of 100)

Translucent Blue #5 23 mm # 607 021

Translucent Pink #5 23 mm # 607 034

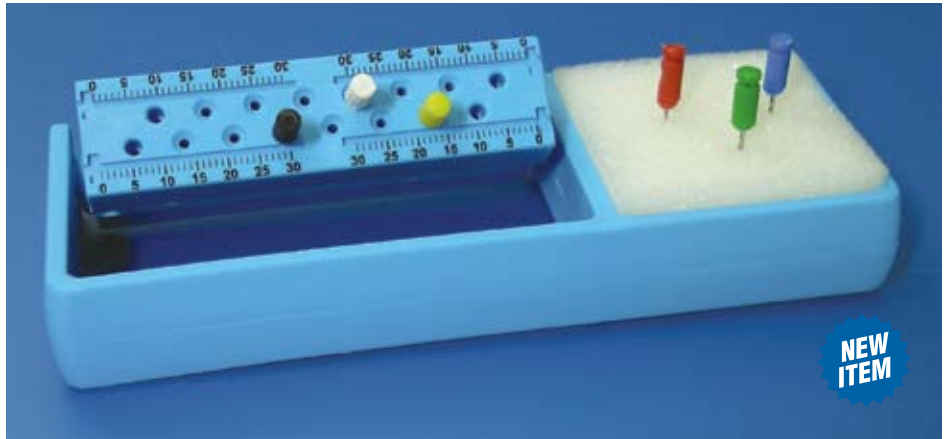

## Endo Organizer

### Root Canal Instrument Organizer

- Fits 16 endo instruments
  - Made of polypropylene (*Autoclavable*)
- Holder for 16 endodontic instruments w/endometer for measuring and sponge for cleaning # 355 187  
 Refills: 25 Sponges # 355 189

## Endo Steri-Kit

### Stand for Root Canal Instruments

- Easy holding and cleaning of instruments in well tightened foam inlays
- Container can be filled with disinfection solution
- Container (dia. 4 cm, height 3 cm) in 3 colors
- Foam inlays (dia. 5 cm) in 2 strengths: regular (0.5 cm) and thick (1 cm)

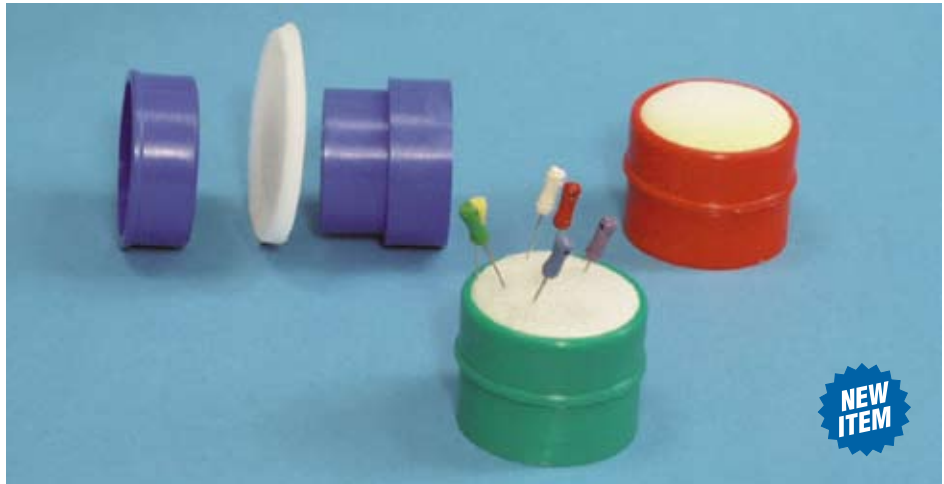

Kit with 3 containers, 50 regular inlays and 25 thick inlays # 355 188

#### Foam inlays:

Regular (50 pcs.) # 355 190  
 Thick (25 pcs.) # 355 191

#### Containers Separately:

Red (1) # 355 192  
 Blue (1) # 355 193  
 Green (1) # 355 194

## Miraject-Endo Rinse

### Periodontal Irrigation Syringe

- Blunt needle, flexible x-fine
- Fluid vol: 2 ml w/ .1 ml calibration
- 25 gauge x 32 mm x 0.5 mm
- Consists of disposable syringe & blunt needle

Box of (50)

Miraject Endo Rinse (Box of 50) # 254 220

## Mirameter

### Endo Gauge

- Measures length of root canal instruments quickly and efficiently
- Made from stainless steel, ideal for stoppers, files, reamers, etc.
- Will not slide, holds up to 10 instruments
- Stainless steel cover
- (*Autoclavable*)

Gauge dia. 2" (5 cm), height 2.2" (5.5 cm)

Mirameter Endo Gauge (1) #354 106

## Auto-Foam™

### Endodontic Instrument Storage Blocks

Storage units for working, storage, sterilizing, or ultrasonic cleaning of burs, diamonds, endo instruments, points of delicate instruments, etc. May be dry heat sterilized. (*Autoclavable*)

Size of block: 3" x 2" x 5/8" (7 x 5 x 1.5 cm)

Auto-Foam (6 Blocks/Pkg.) # B3502

Foam Refills: 2" x 2" x 4" (5 x 5 x 10 cm)

(2 Blocks/Pkg) # B3503

## Prepometer Dentin Measuring Device

**UNIQUE**

- Safe preparations and pulp protection by electronically measuring in seconds the thickness of the dentine layer above the pulp chamber during crown preparation with a simple touch of the probe
- Gives the dentist the ability to accurately and safely prepare the tooth with the help of digital LED read-out:  
Green light – Safe zone  
Orange light – Limit of safe zone  
Red light – Danger of penetrating through the dentine layer
- Allows the safe preparation of “delicate cases” (elongated, tilted or deciduous teeth)
- Easy to learn and adapt to current prosthodontic procedures

Complete Kit includes:

Instrument, 25 silicone tips and batteries # 452 035

Spare Parts:

Silicone Tips, 50/pk # 452 039

Measuring electrode (white part) # 452 036

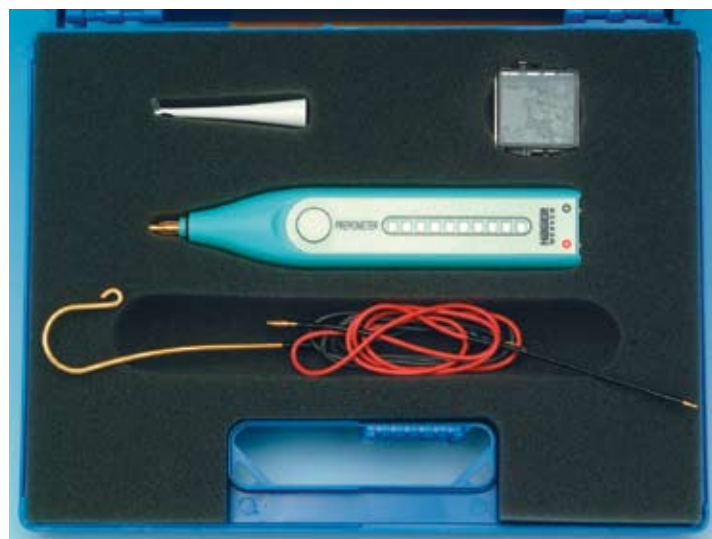

Reference electrode (black part) # 452 037

Auxiliary electrode (red part) # 452 038

### Technical Article Available Upon Request

The “crowning or capping” of vital teeth is an every-day procedure in prosthodontics. Whenever crown preparation occurs, tooth structure needs to be removed while maintaining a safe distance from the pulp chamber (0.7 mm of dentine is required above the pulp for adult teeth and 1.4 mm for deciduous teeth).

*How Prepometer Works: Non-invasive (safe) electrical current is passed along the dentinal tubules, thereby creating measurable electrical resistance. Low electrical resistance indicates a thin layer of dentine; high resistance indicates a thick dentine layer. Patient-specific tooth information is visually received from the LED display and safe preparation is achieved while never risking a tooth's vitality. Even the most difficult cases are now possible.*

Approximal measurement.

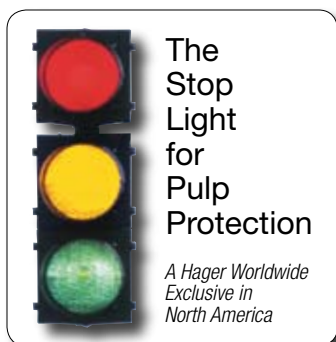

Thorough preparation for telescopic crowns vestibulary: When the green light flashes, the dentin still has a sufficient thickness.

Measurement during preparation. The lip loop is inserted.

Measurement after incisal shortening and approximal reduction.

## H.V.E. Handpieces, Serviceable Aluminum/Plastic

- Ultrasonically cleanable
- 360° swivel quick-disconnect
- Clinically unbreakable smooth lever action
- Easily disassembled for service & cleaning
- (Cold Sterilizable)

Designed with a delrin body and a polysulfone lever, this quick aluminum disconnect central vacuum valve can be ultrasonically cleaned while fully assembled. The valve accepts standard 7/16" tips and the connector adapts to any 1/2" or 5/8" ID central vacuum tubing.

### Genesis™

#### New Design Safety Eyewear

- Ultra-soft nosebridge adjusts for a nonslip fit
  - Provides ideal fit for virtually all facial profiles
- Lightweight (28 g.) and extremely comfortable. The "shock absorbing" frame features a ventilation channel that increases air flow and minimizes fogging.

		Clear	Tinted

### FitLogic

#### Four Unique Fitting Points

- Soft, lightweight browbar adjusts to any face shape
- Revolutionary browbar self-adjusts for a secure fit
- Pioneering nosepiece construction adjusts to any nose
- Precise angle adjustment to fit any cheekbone
- Temple length adjustment fits to any ear

In addition, a pioneering nosepiece design rotates, pivots, and slants providing face-contouring comfort for all-day wear. Flexible, expandable, durable, lightweight and comfortable, nothing fits or feels as good as the Uvex FitLogic.

### Uvex Spitfire

#### Ultra Lite/Wrap Around Glasses

- Lens tint options include clear and espresso
  - Available in black, copper and blue temples
  - Impact resistant polycarbonate lenses block 99.9% of harmful UV radiation
  - Easy lens replacement allows exchanging lens tints to accommodate changes in lighting or work applications
  - Patented lens inclination for a customized fit
- Uvex Spitfire, with its patented frameless lens design, excellent peripheral wrap and exceptional optical clarity, ensures superior and unobstructed vision that is critical to any dentist's safety. Uvex Spitfire is lightweight and has adjustable spatulite temples that deliver extra comfort all day long. We designed it that way... with a molded-in nose bridge and wrap-around side protection, Uvex Spitfire looks more like sports eyewear than safety glasses.

### Uvex XC with Optional Rx Insert

UNIQUE

- Extended wrap-around lens for extra cheek and side coverage
- New insert holds Rx lenses firmly in place
- Soft, flexible nose fingers conform to fit a variety of nasal profiles
- Adjustable temples for custom fit

Uvex's XC eyewear sets new standards for extra coverage and extra comfort. And now, with the new Rx lens insert, it offers an alternative for dentists requiring vision correction.

It holds Rx lenses snugly inside the comfortable Uvex XC eyewear, shielding expensive prescription lenses from damage. The Uvex XC provides all-day comfort and coverage, and especially for prescription lens wearers.

## MiraTray Implant Implantology Trays

### Simplified Impressions for Implants

- Final implant impressions made in one sitting
- Abutments are visible in the transparent trays for precise overlay drilling
- Time saving and cost effective

With MiraTray Implant, a dental practitioner can take a final implant impression in one session for dentulous as well as edentulous patients. MiraTray Implant meets the demands of fit, rigidity and retention that are required for implant impression taking.

Sets include 4 upper and 4 lower trays, calipers and measuring template

Dentulous MiraTray Implant Set # 101 220  
Edentulous MiraTray Implant Set # 101 221

## Impla Parallel

### Parallel Drilling Aid for Implants

- Can be used for any implant system
- Parallel, reciprocal implant alignment
- Wide choice of horizontal implant positions according to surgical aspects
- Operation time is reduced
- Prosthetic result is optimized
- (Autoclavable)

Re-establishing harmony between function and aesthetics should be the main objective of each implant supported restoration. Precise pre-operative planning and surgical implant insertion achieve this ideal. Exact positioning of multiple implant axes result in accurate fit, superior function and excellent aesthetics.

### Complete Set:

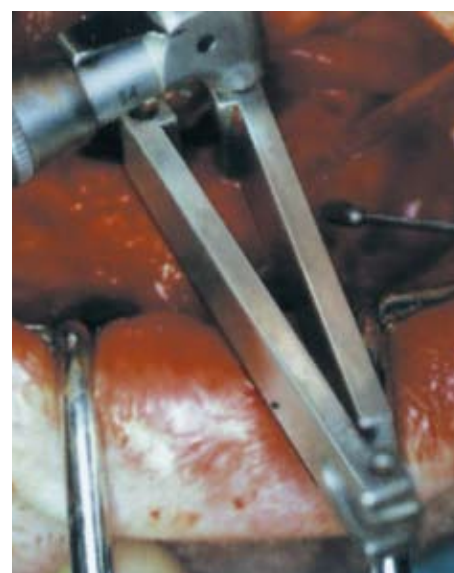

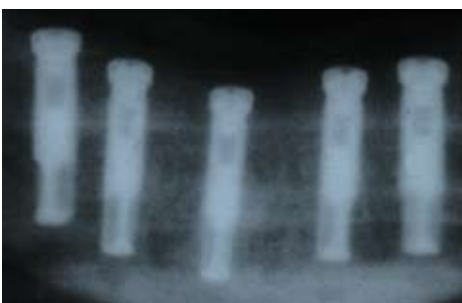

1 axis guide, 2 guide pins & 1 pilot drill (2mm)

## ALGILOCK

### Stainless Steel Impression Trays

Algilock is similar in design to the standard and brass/chrome plated impression trays, although Algilock is vastly superior with its 100% Stainless Steel Construction 18/8: Offers an unconditional 5-year warranty against breakage and wear!

**Laser Welded** (vs arc welded): Handles and unbreakable rolled retention rims.

**Corrosion Resistant:** Algilock impression trays will withstand the rigors of the steam autoclave, dry heat sterilization, chemiclave, liquid sterilization and ethylene oxide on a daily basis.

**Algilock Models:** Perforated, Solid, Water-Cooled, (Partial, Pedodontic, Edentulous and Orthodontic available on request).

*Rims and Handles are Laser Welded*

## Miratom

### Edentulous Impression Trays

- Anatomical accuracy as a stock tray
- No adhesive required
- Made of indestructible lexan polycarbonate
- Lighter than metal trays, yet strong and rigid
- Full set comes in an easy-to-select anatomical order
- (Autoclavable)

All 13 mandibular sizes feature coverage of the retromolar pads. All maxillary trays run back to the hamular notch with posterior border on the soft palate.

The trays' interior surfaces are stippled and covered with tiny spear-like stabilizers plus perforations to create superior adhesion. The handle is offset to reduce lip interference, and the tray's occlusal aspect features finger-rests for accurate positioning.

For complete, immediate or even for distal extension partial dentures...the "immediate denture trays" provide a recess for remaining teeth. Great for bilateral and unilateral distal extension partial dentures.

#### Miratom Full Kit Contains:

- (7) Maxillary Edentulous, (13) Mandibular Edentulous,
- (2) Maxillary Immediate Denture,
- (6) Mandibular Immediate Denture &
- (1) Measuring Instrument

Comes in a set of twenty-four (24) or can be purchased individually.

## Minitray™

### Crown and Bridge Impression Trays

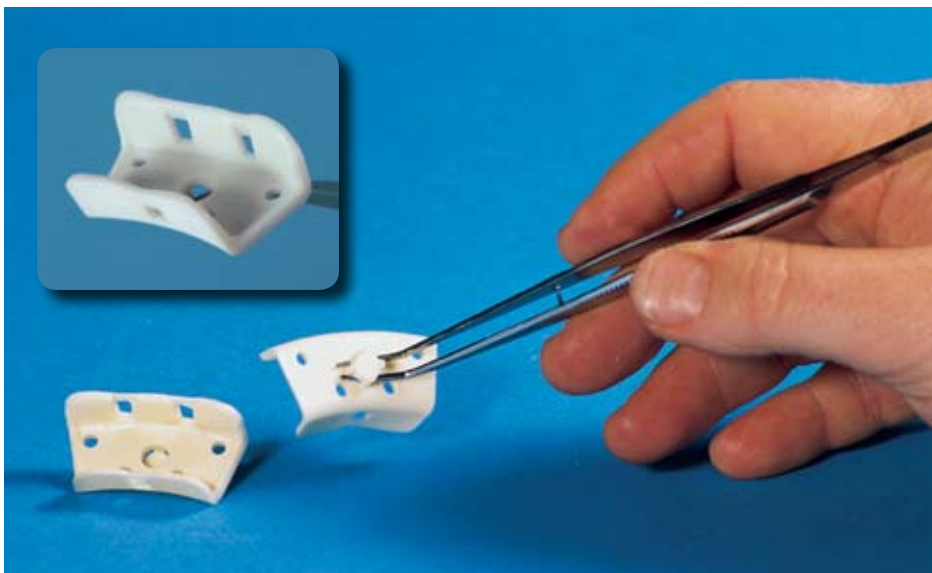

- Time saving disposable plastic trays
- Can be molded in boiling water or over flame
- Use a pair of tweezers to hold tray and fix

One of a kind: specifically designed for crown and bridge quadrant impressions.

Versatile: inexpensive, disposable, moldable.

Easily handled with serrated tweezers.

Minitrays (Box of 50) # 101 102

## Miratray ID Tags

### Impression Tray Identification Tags

- Organizer: small plastic ID tags can be inserted into the handle hole for patient identification. The impression tray with tag can then be mailed to the dental lab.
- Efficient: allows the dentist's office or dental laboratory to write the patient's name, case identification number and date on the tag with an ID Miramarker felt pen (or other).

Miratray ID Tags Bag of 50 # 605 244

## Miratray Adhesive Spray

- Improves tray's retention of impression materials
- CFC free

Miratray Adhesive Spray  
7.5 fl oz/225 ml (1) # 554 210

## Algilock Cleaner Plus

### Impression Tray Cleaner

- Removes residues of alginate, plaster, etc. from impression trays and instruments
- Decomposes the organic structure of the materials with no aggressive or corrosive effect
- Mix with water in 1:10 ratio
- Let work for approx. 30 minutes
- Biologically degradable
- Has a pleasant smell—contains no phosphate

Jar, 1000 g (1) # 554 104

## Orange Solvent Wipes

### Orange Solvent Cleaning Towelettes

- Ready to use
- Removes impression material, zinc oxide-eugenol, label glue, etc. from instruments and hands
- Ideal for cleaning and shining stainless steel surfaces
- Cleans and protects surfaces
- All natural, non-toxic ingredients

Orange Solvent Wipes with Orange Solvent

Dimensions: 7-7/8" x 5-3/8" (20 cm x 13.65 cm)

160 per dispenser. # 554 100

## BD-Steribox

### Small Parts Sterilization Container

- For burs, diamonds, etc.
- Opening on lid allows instrument to be easily dropped in and guards against spillage
- Removable basket for easy rinsing of contents
- Easy to clean and handle

Dimensions: 3-3/4" x 2" (9 cm x 5 cm)

BD-Steribox:

Stainless Steel

(1) # 355 138

## CapTrap

### One-Handed Side Scoop Needle Recapping Follows WHO/CDC Mandate

Productivity: Dental Assistant sets up, not necessary to hand to dentist. Syringe is available when dentist needs it.

- Quick, easy & safe
- Ergonomically correct design
- Aluminum (Autoclavable)

Weight: 1.2 lbs (.45 kg)

Dimensions: 6-1/2" x 3-1/2" x 2" (17 x 9 x 5 mm)

CapTrap

(1) # 355 475

## Captor™

### Single Hand Needle Recapper

- 3/4 lb. of stability; base is heavy enough to remain in place without holding
- Safe, simple and inexpensive device for re-capping needles while meeting OSHA standards
- (Autoclavable)

After removing sheath on needle, place needle cap in Captor. After injection, simply insert needle back into the sheath in the Captor, seating it firmly. Captor has a vent hole in the base for easy cleaning.

Captor, net wt. 12 oz (350 g)

(1) # B2700

## Captor DeLuxe

### Needle Recapper

- Minimizes the risk of accidental needle stick injury with a safe one-handed recapping device
- The locking mechanism holds the needle cap securely
- High quality stainless steel (Autoclavable at 273° F/134° C)

Weight: .55 lbs (240 g)

Captor DeLuxe

(1) # 355 466

## Variator Dental Kit

### Sterile Instrument Pack

- For high-risk patients
- For out of the office visits
- For emergencies

(1) Explorer with special shaped double-end

(1) Pair of tweezers with special shaped end

(1) One white dental mirror

Set of three (3) gamma sterilized instruments:

(10/box) # 355 447

Variator Tweezer (10/box) # 355 445

Variator Mirror (10/box) # 355 446

Variator Explorer (10/box) # 355 448

## Variator Probe

When you need a sterile probe, make Variator Probe your choice.

- Single-use, disposable plastic probe
- Slim point and lightweight handle minimize patient's discomfort
- Smoothly finished; will not catch on periodontal pockets
- Use whenever emergencies arise

Variator Probe (50/Bx.) # 355 450

## Duratanic Mirror Handles

### Fiberglass Fingerform

- Simple stem
- Suitable for all mirrors
- Color-coded for easy identification
- Lightweight handle
- (Autoclavable)

Ergonomically designed for better control and less fatigue. Compatible with the exchangeable explorer-probe tips and mirrors. Suitable for ultrasonic cleaning, steam autoclave and dry heat sterilization up to 460° F (240° C)

Black (1) # 262 19101

Blue (1) # 262 19102

## Desmoclean®

### Rotating Instruments for Root Planing and Curettage

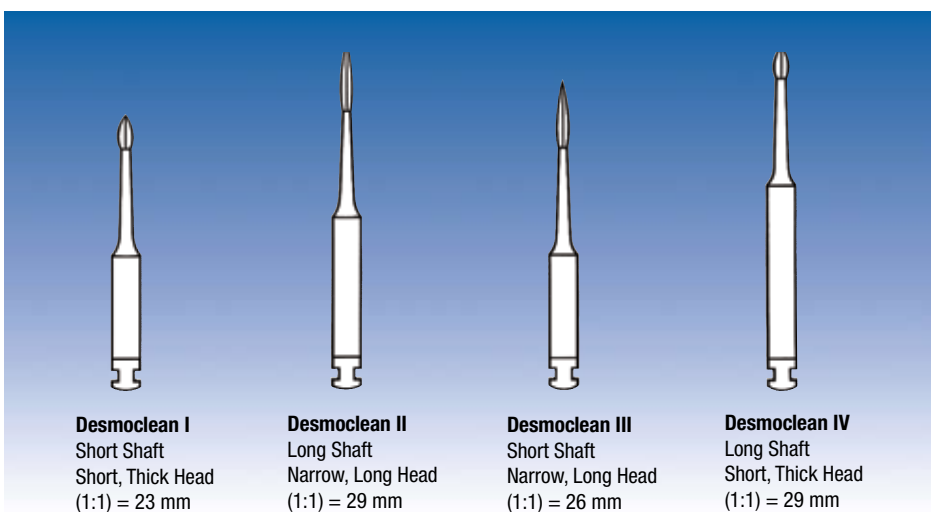

Achieve smooth surfaces - quickly and efficiently without loss of substance. Uses non-cutting, elliptical and hexagonal heads. (Use at 7,000 - 10,000 rpm)

#### For Use In:

- The curettage of root surfaces in deep pockets, the furcation and the approximate area.
- The removal of tightly adhering granulation.
- Surface planing after the removal of brackets, blockings or splintings, etc.
- The removal of concretion (subgingival tartar).
- The periost ablation during flap surgery.
- Hard-to-reach and narrow (approximate) areas.
- The planing of preparational steps prior to impression taking.

#### Desmoclean Introductory Kit:

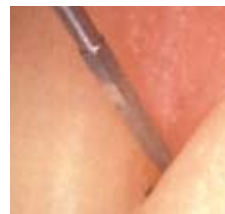

I, II, III & IV	(6 of each shape)	# 503 290
Shape I	(12) 1:1 = 23 mm	# 503 291
Shape II	(12) 1:1 = 29 mm	# 503 292
Shape III	(12) 1:1 = 26 mm	# 503 293
Shape IV	(12) 1:1 = 29 mm	# 503 294
Shape I&II	(6 each)	# 503 295
Shape III & IV	(6 each)	# 503 296
Shape I & III	(6 each)	# 503 297
Shape II & IV	(6 each)	# 503 298

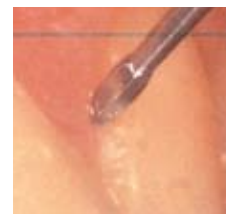

Root planing is performed through parallel alignment of the instrument

The head can be easily inserted into the furcation

For the narrow approximate area

Concretion removal

# The ABC of Articulation

A  
Atomic

B  
Balance

C  
Combitec

Our Complete  
18 Page Booklet  
on Articulators  
Available  
Upon Request

## Now You Have German Quality at Best Value Pricing

### Atomic

- Reliable mean-value articulator, construction height 95 mm with a lever or screw release socket (mounting) plates. Lightweight, handy and solid.

### Balance

- Compact and durable it can be delivered in three (3) construction heights: 95, 105 or 116 mm. Designed for crown & bridgework, as well as for full partial prosthetics.

### Balance DeLuxe

- Individually adjustable condyle orbit inclination articulator. This functional, precise and aesthetic working device impresses with its long life and high economy. Available in 95, 106 and 116 mm construction heights.

### Combitec

- An ARCON articulator 100% stainless steel and aluminum. Infinitely adjustable condyle orbit inclination and Bennett-angulation with immediate side shift movement. Best quality on the market today.
- ▲ 3-point suspension, angular support guaranteeing a standing position of 45° and adjusting spring allowing safe usage in an opened position.
- ▲ Can transfer any patient situation into the Combitec articulator by means of the Combitec face bow.
- ▲ Technical Positions: The Bonwill Triangle, The Camper's Plane, The Frankfort Horizontal Plane and The Masticatory Plane (Occlusal Plane).

*Face Bow is available for Balance, Balance DeLuxe and Combitec.*

**MiraTorch****Dental Butane Burner**

- Softening dental wax (soft, yellow flame)
- Melting gold and other metals (hot, blue flame)
- Fusing plastic materials

New low-cost burner for dentists and dental laboratories. Self-igniting, just push the back button and the flame can be regulated from strong to weak.

**Econo Burner b.****Dental Butane Burner**

(Stainless Steel)

- Control knob for easy regulation of flame & envelope
- Easy to ignite with match or lighter
- Burning time 1 to 3 hours @ 1,150° F-750° C
- Easy refill valve for Econo Gas

Econo Burner:

Burner and 6 fl. oz. Econo Gas (1) # 401 000

(Limited to available stock)

**Air/Gas Bunsen Burner c.****Natural Gas Burner**

- Adjustable flame
  - Easy adjust air and gas valves
- Suitable for use with both natural and LP gas. Needle valve gas adjustment to control flame temperature and envelope. Heavy base 3" (75 mm) diameter. Used with 1/4" (6.4 mm) ID tubing.

Air/Gas Bunsen Burner (1) # 401 150

**NEW ITEM**

## Speedo-Ex

### Pneumatic Chisel for Removing Plaster

- For direct connection to the air hose
- Simple and safe operation; low-noise
- Impact force of Speedo-Ex is 2–8 bars
- Operation switch directly connected to the hand piece
- Includes two chisel tips

Speedo-Ex (1) # 401 145

#### Replacement Tips

#1 Cutter (1) # 401 146

#2 Spoon (1) # 401 147

## Speedo-Suc

### Multi-Use Electronic Suction Unit

- Automatic switching on and off simultaneously with the micro motor (by EMC control)
- Two-step switchgear for optimal suction efficiency
- Simple and safe operation; low noise

Measurements: 11" x 10" x 9" (27 x 25 x 22 cm)

Weight: 7.7 lbs (3.4 kg)

Speedo-Suc (1) # 401 155

#### Replacement Parts:

Air intake collector (1) # 401 156

Filter (1) # 401 157

## Airsonic Absorbo Box

### Ultra Compact Dust Collector

- Ideal for working the mini-sandblaster; the abrasive material stays in the box and is collected in the filter
- Measures 6.5" x 5.5" x 12" (17 x 22 x 31 cm)

(1) # 401 082

## Airsonic Mini Sandblaster

### Handy Sandblaster

- For abrading the bonding surface of crowns, bridges, brackets, posts etc. for better adhesion
- New pressure regulation valve allows for exact dosing of powder
- Ideal for all metals and porcelain
- Also suited for removal of cement from crown sand bridges before re-cementation

Set: Sandblaster, standard nozzle 60° and 20 g powder

(1) # 401 080

#### Options and Accessories:

Airsonic Adapter Set T  
Connects Airsonic Mini Sandblaster and the air-tube with the T-junction

# 401 083

Connect Turbine Hose  
Airsonic Adapters  
Following Adapters Available:  
Quick Connect for Kavo unit  
Adapter for Sirona Titane unit  
Connection to the EMS box  
Connection to laboratory unit  
Connection to W +H Rotoquick  
For Chairside Use by Dentist

## Speedo-Clean

### Low-Noise Cleaning Device for Prostheses

- Cleans surfaces with the aid of polishing needles in a rotating magnetic field in combination with a cleaning solution without any material abrasion
- Especially designed to clean prostheses and polish metal surfaces without damaging the work piece
- Suitable for any type of prosthesis, optimal cleaning, as needles reach into all interspaces
- Integrated timer enables individual cleaning cycles

#### Technical Data:

Weight:	2 kg	Output power:	35 W
Voltage:	230V	Frequency:	50/60 Hz
Speed:	1,700 rpm		
Complete with 50 g polishing needles ( $\varnothing$ 0.6 mm)			
1 L liquid and 1 magnet	(1)	# 401 136	
<u>50 g polishing needles</u>			
$\varnothing$ 0.6 mm for prosthetics		# 401 014	
$\varnothing$ 0.8 mm for telescopic or similar work		# 401 013	
1 L Speedo Clean liquid	(1)	# 554 106	

## Air Guns

### Blind Hole Air Blow Gun a.

- Long nozzle provides jet of air into hard to reach areas (1) # B16600

### High Volume Air Blow Gun b.

- Venturi type nozzle increases air output volume by 10 times (1) # B16601

## Self-Coiling Air Hose

- Stretches and recoils like a telephone cord.
- |           |     |             |
|-----------|-----|-------------|
| 10' (3 m) | (1) | # B16602-10 |
| 15' (5 m) | (1) | # B16602-15 |
| 20' (7 m) | (1) | # B16602-20 |

## SolderFix Soldering Aid

- For fixing of up to three objects.
  - Two supporting arms with ball pivot guarantee optimal positioning of the objects to be soldered
  - The base plate is equipped with a refractory fiber plate
- Set: 9" x 6" (230 x 152 mm) (1) # 304 452

## Third Hand Soldering Aid

Third Hand holding device with ball joint mounted articulated arm, spring loaded clamp and heavy steel powder coated base for holding small items for soldering, joining or observation. Double arm version allows more flexibility.

Base plate dimensions: 3" x 3" (75 x 75 mm)

Single arm	(1)	# 304 453
Double arm	(1)	# 304 454

## Model Holder

### Tilttable/Adjustable Model Holder

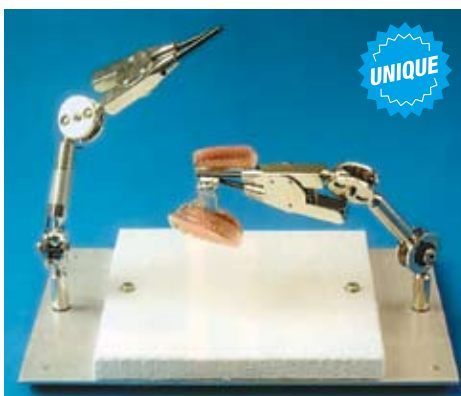

- Designed to firmly grip the model with lever mechanism
  - Model table rests on a solid brass ball joint allowing full movement
  - Table can be tilted vertically
  - The swivel table and the ball joint can be rotated
- Base: 4" x 4" (100 x 100 mm)  
Height: 4-1/4" (107 mm). Maximum jaw opening on the work table is 2-7/8" (73 mm). Weight: 6 lbs (2.7 kg)  
(1) # 203 087

## FastLift Flask Lifter

- Lifts the hot flasks out of the water basin
- The flat "spoon" is 4" X 4" (10 cm x 10 cm) and is very thin to get under the flasks easily
- Non-heat conductive wooden handle
- Spoon has holes, so that water can drain
- Made of stainless steel (1) # 304 061

No Abrasion

Double Arm

Single Arm

## Mylaform

### Pre-Molded Wax Parts, Individual Patterns for Metal Ceramic and Casting

- Time saving. No more modelling of wax cast; use the pre-molded Mylaform
- All parts are reduced by the thickness of the ceramic layer
- Perfect anatomical and physiological design
- Mesial and distal holding elements allow a tension-free wax-up of connecting parts

Wax blocks are ideal for metal ceramic and save a lot of modeling time. The occlusal surface and the shapes are anatomically formed with highest quality wax.

Starter Kit with 36 of the most commonly used shapes - three of each.

Starter Kit: 36 shapes x 3 (Set of 108) # 604 900

Intro Kit BL: (Set of 90) # 604 901

Intro Kit L: (Set of 300) # 604 902

Fixit, self-grip tweezer w/ wood handle # 304 450

## Occlu Plus Spray

### Occlusion Surface Marker Spray

- Marks contact points through direct spraying on occlusion surface
- Micro powder coating for accurate marking and low consumption
- Rinses off easily with water

Green, non-toxic, CFC-free

Large can size 75 ml (32 g) (1) # 554 205

## Vernax Graphit

### Colloidal Liquid Graphite

- Easy to apply with the integrated brush
- Solder does not flow over the graphite boundary
- No cavity formation in the soldering material
- Gets telescope and conus crowns to work again
- Can be diluted with water.

20 ml bottle with brush (1) # 605 069

## Protho Clean

### Denture Cleaner and Polisher

- Just spray on, soak and wipe off
- Removes polish materials and monomers
- Gives a brilliant presentation finish
- Pleasant mint flavor

Protho Clean, spray can, 2.5 fl oz (75 ml)

(1) # 554 200

## Miragloss

### Brush-On Finish for Plaster Models

- Plaster models appear shiny and perfect
- Gives a brilliant, smooth and washable finish
- Easy to apply brush-on coating

33 fl oz (1000 ml) bottle (1) # 554 114

## Kontura Instruments

### Instruments for Cutting First Impressions

- For corrections of impressions in the dental practice
- Extremely precise and sturdy (*Autoclavable*)

**Universal spoon-shaped knife (No.1)** This knife is specially designed for the cutting-out of first correction impressions and provisional dentures.

**Sickle-shaped knife (No.2)** Slightly bent, with both sides sharpened for easy cutting-out of interdental septum.

**Lancet-shaped knife (No.3)** Especially designed for the narrow spaces of premolars and front teeth.

**Crescent-shaped knife (No.4)** Designed for safe wafer-thin cutting out of the preparation limit.

**Groove modelling instrument (No.5)** For easy structuring of flow-off grooves in even depth.

Set with 4 Instruments: # 358 065

Universal spoon-shaped knife (No.1) # 358 060

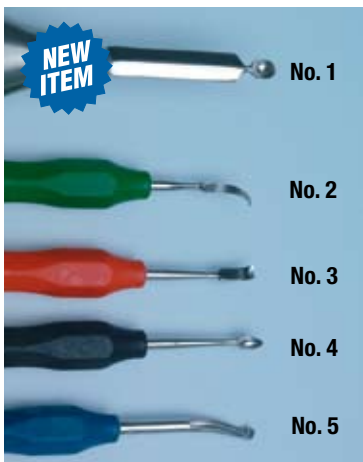

Sickle-shaped knife (No.2) # 358 061

Lancet-shaped knife (No.3) # 358 062

Crescent-shaped knife (No.4) # 358 063

Groove modelling instrument (No.5) # 358 064

Professional # 358 066

## Mirapull Slot Mandrils

Fits all handpieces. Take a finger length of grinding material, insert one end into the slot and turn it around with the handpiece.

### Slot Mandrils

Mirapull K, conical (5/Pkg) # 503 398

Mirapull S, straight (5/Pkg) # 503 399

## Mirapull Set Flint Paper

- Coarse, Medium & Fine

3 dispensers including 1 roll of finishing paper of 80, 100 and 180 grain each. (1) # 605 039

## Flint Paper Finishing Paper In Rolls

Fine 80 Grain/25 m roll (1) # 605 030

Medium 100 Grain/30 m roll (1) # 605 031

Course 180 Grain/50 m roll (1) # 605 034

## Frame Saw Premium Lab Saw

- Strong mechanism sets blade tightly in the handle
- Sturdy design with angulated frame for better view
- Exact cutting with tension blade
- Includes one blade (1) # 304 044

## Wax Carving & Modeling Set

### D. E. Instruments with Color Coded Handles

Set of 6: # 304 050

Individual Instruments D. E.:

#1 Blue (1) # 304 051

#2 Green (1) # 304 052

#3 Brown (1) # 304 053

#4 Red (1) # 304 054

#5 Gray (1) # 304 055

#6 Black (1) # 304 056

## Bend Cut®

### Angulated Metal Saw with Covered Grip

- For all standard saw blades
- Angulated grip for better vision
- Very affordable (1) # 304 042

**Superthin Saw Blades**, refill (12/Pkg.) # 304 046

**Crown Holder****Crown and Bridge Fixation Instrument**

- 2 diamond points grip on the inside of the crown
  - Locking device for secure but gentle fixation
- (1) # 304 026

**Steaming Forceps****Stainless Steel Forceps w/Vinyl Coated Tips**

- Gently holds articles for steam cleaning
- Long enough to keep fingers away from hot steam
- Ideal for holding models when removing wax

Length: 6" (150 mm) - Straight

(1) # 401 140

**Cast Gripper****Casting Ring Gripper**

- Long holding forceps for casting rings and specially shaped grippers
- 15" (35 cm) long and made of solid stainless steel
- Eliminates danger of lifting hot casting

(1) # 304 060

**Soldering Tweezer Weldmaster a.**

- Cross action, insulated handles, curved tips

Spring-loaded, Length 6-1/4" (16 cm)

(1) # 304 450

**Grip It b.****Dental Instrument Tweezer**

- For holding glass vials over flame
- For handling instruments in sterilizing or cleaning fluids
- Stainless steel, non heat-conductive

Length: 6-1/2" (165 mm) (1) # 304 059

**Pin Clipper c.****Crown Holder**

- Curved hemostat with "Stand-Up" pin
- Pin Clipper holds crown & bridges above working surfaces at 20°

(1) # 355 449

**Hot Block d.****Heat and Flame Resistant Gloves**

- Hand protection from high oven temperatures when firing ceramics
- Soft, flexible knit that allows hand dexterity
- Seamless Thermal Knit construction
- Numerous launderings will not effect resistance
- Ambidextrous design for added wearability

The thermo-radiant behavior of Hot Block resists heat transfer from both convective and radiant heat sources.

Small (1 pair) # 304 057

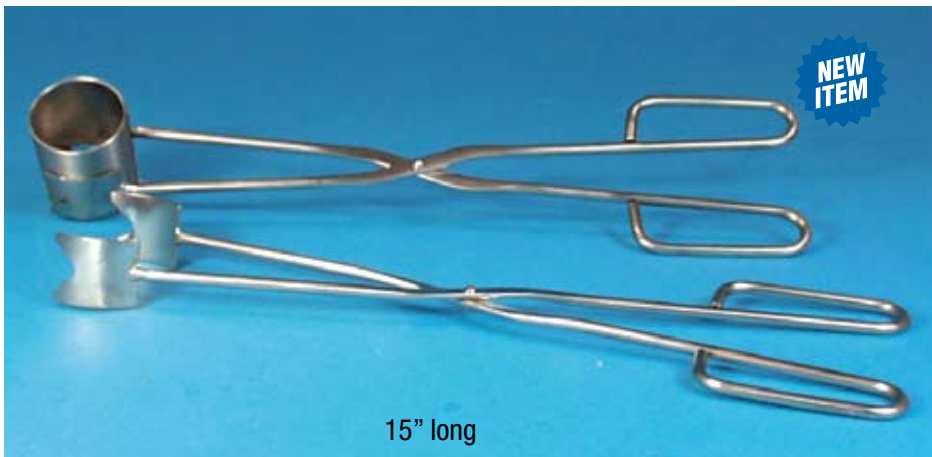

Regular (1 pair) # 304 058

Jumbo (1 pair) # 304 062

**GL Lab Case Box e.****Model/Record Storage Containers**

- Plain boxes that are easy to assemble
- Compact storage for keeping models and records
- Die-cut for perfect size; top fits over bottom for strength
- 2-3/4" H x 3-3/4" W x 5" L (7 cm x 9 cm x 12 cm)

(Pkg/50 boxes) # B4600

**Flex-O-Bol****Alginate/Plaster Mixing Bowls**

- Flexible, easy to handle, and easy to clean
- For alginate, plaster, etc.
- In 5 practical sizes:  
Small, Medium, Large, X-Large, & Jumbo

**BEST  
VALUE**

Flex-O-Bol:	Volume	Height	
Small,	150 ml 5.00 oz	5.5 cm	# 304 320
Medium	300 ml 10.0 oz	7.5 cm	# 304 321
Large	500 ml 16.6 oz	9.0 cm	# 304 322
X-Large	800 ml 26.6 oz	11.0 cm	# 304 323
Jumbo*	1500 ml 50.0 oz	15.5 cm	# 304 333

\*Exclusive Design for pouring multiple models

Jumbo

**Miramix****Acrylic Resin Mixing Cup**

- For resin materials in 4 different sizes
- Cured resin will pop out easily
- Base of cups adhere to any smooth surface

1/2 Mini-Size, 5 cc		
packed with (2) pieces		# 605 123
Small, 10 cc		
packed with (2) pieces		# 605 120

**Portion Aid****Dispensing Bottle System**

The two-piece measure/dispenser is available as a unit. Portion Aid and the special dispenser are made of long lasting polypropylene plastic. The dilution bottle is easy to read and use. All calibrations are embossed on the container and will not dissolve. The dilution dispenser is an inexpensive tool that provides the user with easy, exact pre-measurements.

Portion Aid	(1)	# B15556
Portion Aid with Bottle	(1)	# B15555

**Miracast****Model Former**

Inexpensive blue model formers in 3 sizes. Model formers have retention marks inside.

**BEST  
VALUE**

Miracast, Jumbo	(Set of 2)	# 203 069
Miracast, Normal upper	(Set of 2)	# 203 068
Miracast, Normal lower	(Set of 2)	# 203 067

**Twin-Dento Box****Waterproof Denture Cleaning and Storage Case**

- Leak-proof and lockable denture box
- Ideal for orthodontic retainers
- Dual-purpose cleaning brush included
- Reduces cleaning time  
(Soak 2 dentures simultaneously)
- Cleaning tablets can be stored in brush compartment

Twin-Dento Box is a durable, waterproof plastic case that can hold two dentures (upper and lower) and contains a cleaning brush plus a mirror within its lid.

Size: 4-3/8" x 3-3/4" x 1-3/4" (11.11 x 9.5 x 4.4 cm),  
3.5 fl oz (120 ml) capacity storage compartment

Twin-Dento Box w/brush (1) # 605 902

Twin Brush  
(Small Denture Brush) (1) # 605 901

**Dento-Box****Dental Transport/Retainer Storage Box**

Box for Dentures, Retainers, etc.

- Made of high impact plastic
- Dependable snap lock
- Ventilated top and bottom (8 holes)
- Available in 3 bright colors
- Personalized for your practice with orders of 500 or more

Dento-Box (Pkg. of 10)

Red/Pink # 355 110  
Blue # 355 111  
White # 355 112

**Membranebox****Transport and Storage Box**

- 2 flexible membranes hold crowns, inlays or dentures safely
- Safety latch prevents box from accidentally opening
- Ideal to store jewels (visible) or coin collections

Small 1-1/2" x 1-1/2" x 3/4" Set of 12 # 304 603

Medium 4" x 4" x 1" (1) # 304 601

Large 6" x 4" x 2-3/4" (1) # 304 602

X-Large 6" x 4" x 1" (1) # 304 604

## Biohazardous Lab Case Shipping Pouch

- Meets OSHA and postal standards
- Double pouch construction
- Peel and seal off both pouches at once
- Double perforated for easy opening
- Very economical

Your case (impressions, models, etc.) goes into rear pouch and your paper work goes into the front pouch.

Biohazardous Lab Case Shipping Pouch  
Pkg. of (100) # B4605

## Pick Up Stick

### Bendable Sticks with Sticky Wax Tip

- For quick, precise pick-up and transport
- Holds for crowns, inlays and veneers
- Extremely bendable

Pkg. of (30) # 605 423

## Non-Stick Spray

### Protection/Conditioning/Isolation Spray

- Keeps instrument's moving parts working smoothly
- Indispensable for protection and care of all valuable appliances and instruments in the practice and lab
- Separates plaster models from ceramic build-up
- Silicone coating prevents plaster, etc. from sticking to trimmers, articulators, vibrators, flasks, etc.

13.5 fl. oz. (400 ml), CFC-free (1) # 554 206

## Mira-Marker

### Waterproof Pens

- Marks wet and dry plaster models, acrylics, film mounts, etc.
- Dries instantly
- Felt pen available in 4 colors

Set	(4)	# 605 090
Black	(1)	# 605 091
Red	(1)	# 605 092
Blue	(1)	# 605 093
Green	(1)	# 605 094

## Miratrax ID Tags

### Impression Tray Identification Tags

- Organizer: small plastic ID tags can be inserted into the handle hole for patient identification. The impression tray with tag can then be mailed to the dental lab.
- Efficient: Allows the dentist's office or dental laboratory to write the patient's name, case identification number and date on the tag with an ID Miramarker felt pen (or other).

Miratrax ID Tags Bag of 50 # 605 244

## Miramatic Safe Syringe System

For Safe, Comfortable and Timesaving Injection Technique.

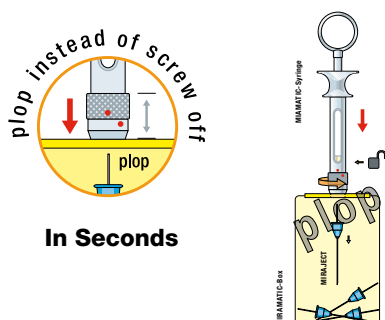

The patient needle injection is a critical moment for the dentist and the assistant alike. The danger of needlestick injuries is increased and biohazardous risk levels for dental professionals rise. Until now, the injection needle has been hand screwed on and off the injection syringe. With Hager Worldwide's Miramatic Safe Syringe System, this procedure becomes a thing of the past. The Miramatic Safe Syringe System meets all the objectives for a safe injection by a dental health care professional.

- Better Alternative for Needle Re-Capping
- One-Handed Technique
- Requires Less Time
- Easy to Use with Gloves
- Allows View of Aspirated Fluid
- Needle Covered After Every Use
- Design Suggests Proper Use
- Clear Vision of the Needle Tip
- Works with All Hand Sizes
- No Interference with Needle
- Works with All Needle Sizes
- Minimal Training Required
- Not Easy to Skip a Crucial Step

Needlestick injury risk is minimized because there is no direct human contact with the injection needle itself. Additionally, the Miramatic Safe Syringe System saves time. The click on and off plop of Miraject needles takes only seconds, thereby saving minutes each day, hours each week and days each year. (An estimated savings of \$2,000 + per dentist/year)

### How Does it Work?

The Miramatic needle is seated on the Miramatic syringe with a simple and easy CLICK. After use, the needle is dropped directly into the Miramatic Sharps Disposal Container with an effortless one-handed PLOP.

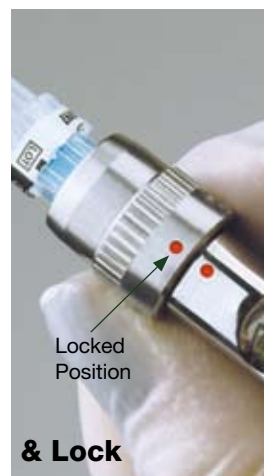

### Miramatic Starter Kit:

- 1 Miramatic Syringe
- 100 Miramatic Needles, 27 Gauge Short Dia. 0.4 mm
- 3 Miramatic Sharps Containers
- 1 Table holding device
- Kit with 1-Ring Syringe with Wings # 355 471
- Kit with 1-Ring Syringe w/o Wings # 355 469

All components can be purchased separately.

- 25 Gauge Short (21 mm) Dia. 0.5 mm #254 201
- 27 Gauge Long (38 mm) Dia. 0.4 mm #254 202
- 27 Gauge Short (21 mm) Dia. 0.4 mm #254 203
- 30 Gauge Short (21 mm) Dia. 0.3 mm #254 204

### Miramatic Sharps Disposal Container

Disposal container for needles, scalpels, etc.

- Package with 5 Containers & 1 Table holding device # 355 468

- Miramatic Oil 5 ml bottle # 554 113
- Miramatic Oil 100 ml bottle # 554 112

## CapTrap

### One-Handed Side Scoop Recapping

- Automatically uncaps and caps needles
- Keeps syringe available for repeated use
- Safely recaps before discarding
- Accomplishes WHO/CDC objectives
- Ergonomically correct design
- Aluminum
- (Autoclavable)

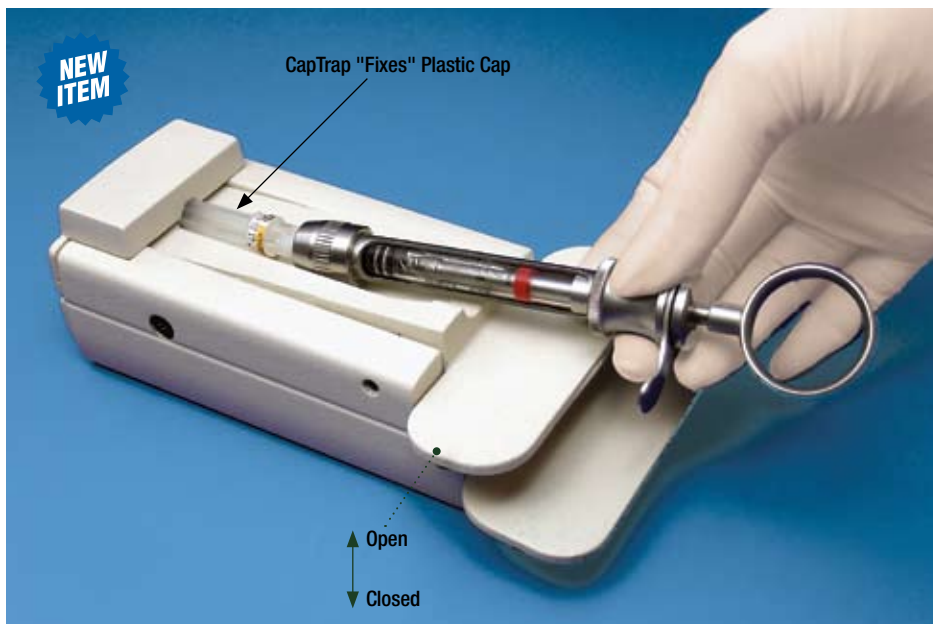

Weight: 1.2 lbs (.45 kg)

Dimensions: 6-1/2" x 3-1/2" x 2" (17 x 9 x 5 mm)

CapTrap (1) # 355 475

Holds Syringe in Side Scoop Position

## Captor DeLuxe

### Needle Recapper

- Minimizes the risk of accidental needle stick injury with a safe one-handed recapping device
- The locking mechanism holds the needle cap securely
- Easy and safe access to syringe
- High quality stainless steel
- (Autoclavable at 273° F (134° C))

Weight: .55 lbs (240 g)

Captor DeLuxe (1) # 355 466

Holds Syringe in Vertical Position

## Captor™

### Single Hand Needle Recapper

- 3/4 lb of stability
- Safe, simple and inexpensive device for recapping needle while meeting OSHA standards
- (Autoclavable)

Recommended procedure:

- After removing sheath on needle, place needle cap in Captor.
  - After injection simply insert needle back into the sheath that is in the Captor, seating it firmly.
- Captor has a vent hole in the base for easy cleaning.
  - Base is heavy enough to remain in place without holding.

Captor, net wt. 12 oz (350 g) (1) # B2700

FG/CA $\frac{1}{16}$ & $\frac{3}{32}$ "	#355 242	#355 243	#355 244	#355 245

\* Hole diameters:  $\frac{3}{32}$ "—2.4 mm /  $\frac{1}{16}$ "—1.6 mm (FG)

## Bur Tainer

### Bur Cassette Instrument Organizer (Holds 7 Rotary Instruments)

- Flow-through design for ultrasonic cleaning and sterilization
- One-way opening eliminates spillage
- Sufficient space in between burs makes choice of individual bur easy and safe
- Stands at 80° angle for easy access
- Holds FG, RA and Surgical burs
- For ultrasonic cleaning
- (Autoclavable)

Bur Tainer:

Blue	(1)	# B1500BL
Black	(1)	# B1500BK
Gray	(1)	# B1500BG

## Screens, Basin Screen:

Small, 2 $\frac{5}{8}$ " Dia. (6.25 cm)	(1)	# B18802
---	-----	----------

## Liftbox

### Liftbox Tray with Automatic Lifter

- Filled tray submerges in solution by closing the cover
- Stable swivel handle for easy insertion and removal of tray
- Unique "tail gate" design of tray ends allows instruments to slide out of tray after cleaning
- Eliminates direct skin contact with aggressive disinfecting solutions
- Acid resistant, high quality plastic

Liftbox	(1)	# 355 120
---------	-----	-----------

## Open-Ex

### Silicone Mouth Props/Bite Block

- Assures positive seating
- Sanitary and tasteless
- Delivered in 2 sizes
- Clip-on cheek holder included
- (Autoclavable)

Open-Ex Bite Block

6 large, 6 small (Box of 12) with Cheek Holder (1)	# 605 210
2 large, 2 small (Box of 4) with Cheek Holder (1)	# 605 211

## Reso-Pac

### The First Ready-to-Use Periodontal Dressing

- Hydrophilic; seals sulcus and approximate areas
- The adhesive paste safely secures the marginal periodontium
- Reso Pac remains soft at all times. For this reason, pressure spots and insufficient supply of the marginal periodontium or the papillae, as well as pressure ulcers do not occur
- The dressing slowly dissolves and does not have to be removed
- Ideal for the sealing of pockets and to protect sutures in the field of implantology, for prosthetics or periodontology, and after extractions
- No known allergic reactions
- No taste, no odor, no mixing and no removal required
- Refrigeration suggested

Reso-Pac is easily and perfectly formed to the wound area and adheres up to 30 hours before slowly dissolving— even on damp and bleeding wounds.

Reso-Pac, .88 oz (25 g) tube (1) # 155 011

### The Bandage for the Mouth

Reso-Pac hydrophilic periodontal dressing consists mainly of cellulose and adheres exceptionally well to damp or bleeding wounds. The desired amount of material is easily squeezed from the tube, formed into a thin roll, and pressed to the wound area with a wet gloved finger.

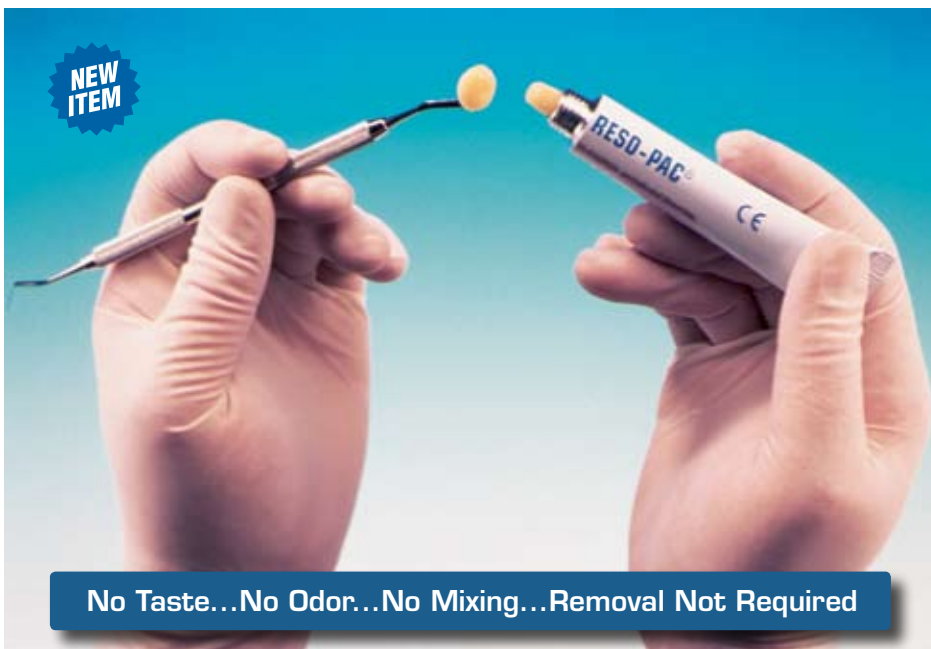

*Technical article available on request.*

*Sensitive to humidity, must recap after each use*

### Reference Materials Available Upon Request:

*Dental Products Europe (March/April 1999)*

3. Improved Wound Healing and a Wound Treatment that is Pleasing to the Patient.
4. Protects the Wound from Saliva, Accelerates the Healing Process and Prevents Inflammation.
5. Wound Treatment without Antibiotics and Corticosteroids.

Good applicability of Reso-Pac in hard-to-reach areas.

Area covered with Reso-Pac for additional protection.

The dressing after 24 hours.

Reso-Pac dissolves away without leaving residue.

## Mirafit

### Fiber Posts

- Elasticity comparable to dentine and enamel
- Strength equivalent to metal posts
- Permanent bond between post, tooth and reconstruction materials
- 100% bio-compatible and non-corrosive
- Head adapts to the anatomy of the root canal
- New braided fiber exceeds performance of parallel fiber structures

**Mirafit White Introductory Kit:** Asst. Posts (18) and L2, L3, L4 Reamers (1 ea) # 356 044

Refills - L4 large 1.6 mm (3) # 356 050

## Mirafit Universal

### One Size Fits All White Fiber Post

The new Mirafit design comes in one universal design with a length of 35 mm. The idea is that the dentist can cut the size fitting his needs. He can use the smaller end for small canals and the bigger end for bigger canals by cutting the long pin adequately. This makes the storage of pins in different sizes obsolete. Mirafit Universal (Fit-It-All) is manufactured according to the ISO standard and will work for the sizes 50-60-80.

- Mirafit tip 0.6 mm dia.
- Mirafit tip red marking 0.8 mm dia.
- Mirafit medium 1.15 mm dia.
- Mirafit end thickness at top end 1.8 mm dia.
- Length of pin 35 mm (1-3/8")

*Available Soon*

## Mirafit BC

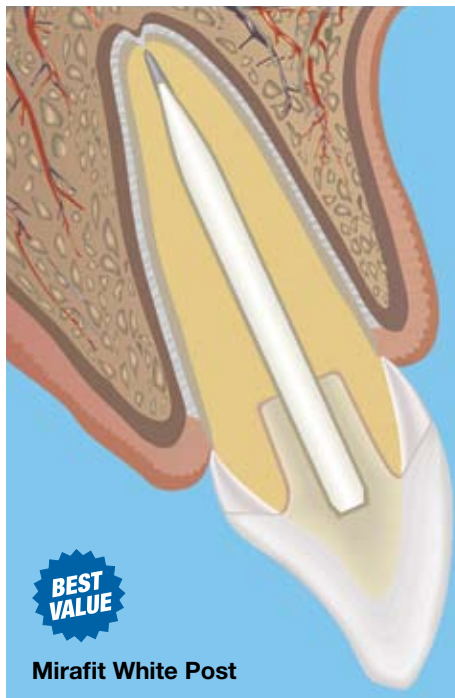

### Core Build-Up Polyester Cones

- Time saving
- No flow-off

For use with build-up material to produce an even stump on a build-up. The transparent polyester (non-stick) crowns come in 6 different slightly conic shapes that can be cut with scissors.

**Starter Kit:** 72 crowns, 12 each of the 6 sizes. # 605 470

Mira Floss (144/pk) # 605 677

**Zahn-Pick****Flossing Aid and Tooth Pick Combination**

- Unwaxed dental floss tension-mounted in a bow holder
- Opposite end is shaped for use as a toothpick
- Each Zahn-Pick is individually & hygienically wrapped

Box of 12 pcs. # 605 636

Box of 100 pcs. # 605 637

**Demo Dent 2****Demonstration Model****Featuring Tooth Diseases**

- Upper and lower jaw feature different stages of caries
- Several examples of inflammatory root processes
- Demonstration of implant work
- Complete upper and lower teeth in a clip-clap articulator
- Teeth not removable

**BEST  
VALUE**

Demo Dent 2 (1) # 355 639

**Demo Dent 1****Transparent Articulated Model**

- Model for patient education
- 32 removable teeth and anatomically correct roots
- Root canal anatomy clearly visible
- Transparent with upper & lower jaw articulation, 1:1 size.

**BEST  
VALUE**

Demo Dent 1 (1) # 355 638

**Child Model****Demo Dent Child****Demonstration Model: Deciduous Teeth****Featuring Tooth Diseases**

- High quality model for orthodontists and pedodontists featuring different tooth diseases
- Upper and lower jaw with 12 deciduous teeth in articulation, interproximal and molar cavities, broken front tooth with root problems
- Clearly shows growing permanent teeth under milk teeth
- Teeth not removable

Model to motivate children 4 to 10 years

Demo Dent Child Model (1) # 355 652

**Brush-n-Floss****Study Model**

- Lightweight plastic, ivory and pink colors: weight only 11 oz (320 g)
  - Twice the normal size with simple metal articulator
  - For demonstration of toothbrushing/flossing and patient motivation
  - Articulation can be set with thumbscrew
- Size: 4" x 4-1/2" x 8" (10 x 11.25 x 20 cm)  
Model comes with extra large toothbrush

Brush-n-Floss (1) # 355 636

Additional toothbrush (1) # 355 637

### Clean-Jet Plus Portable Prophylaxis Unit

BEST  
VALUE

- No troublesome setting up procedures (the turbine handpiece has to be removed from its hose. Plug the hose into the Clean-Jet)
- Quick removal of plaque and stain from tooth surface (air/water/Clean-Jet Powder)
- Minimal discomfort for the patient
- Efficient method of cleaning and polishing
- Operated by air pressure only
- Light and portable unit
- (Autoclavable) - grip cover and spray head

Technical data: Air pressure: 2.3 - 4 bar  
Water pressure: 0.5 - 1.5 bar  
Size: 5.5" x 4.4" x 4.4" (14 x 11 x 11cm)

Clean Jet Plus, for connection with additional Borden,  
Midwest couplings, etc. (1) # 452 000

### Clean Jet-Quick Connect Coupler:

Allows Clean Jet to be used with  
conventional air turbine hose.

Midwest, 4 holes (1) # 452 003

### Clean-Jet Powder Cleaning Powder for Clean-Jet

BEST  
VALUE

- Sodium bicarbonate powder with pleasant lemon taste
  - Extra fine grade for thorough but gentle cleaning
  - One bag of powder for around 20 min. of cleaning time
- Pack with 10 bags # 605 380  
Econo pack with 50 bags # 605 379

NEW  
ITEM

## Rubber Dam

### Plast-Frame Rubber Dam Frame

- Can be folded to one side after placement
- Provides better access to the oral cavity
- Ideal for taking X-rays and saliva aspiration during treatment
- (Autoclavable)

Plast-Frame, Green (1) # 355 319

### Rubber-Dam Cervical Clamp 214 Gingival/Subgingival Clamp for Free Access

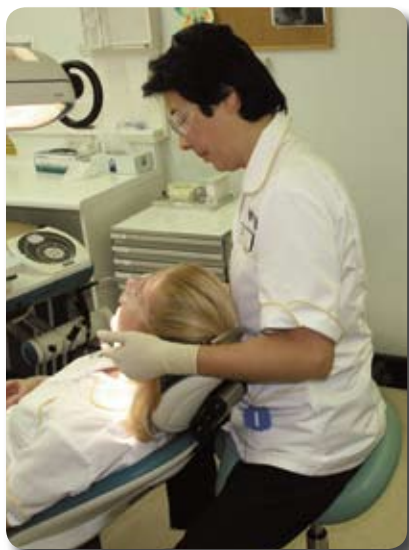

UNIQUE

- Ideal for use in the anterior area of the mouth
- Ensures an unobstructed view and dry working area at the neck of the tooth
- The front holding forks and back counterpart are tightened with a screw — eliminates need for hot thermoplastic forming material
- For small cavities

Cervical Clamp 214 (1) # 355 400

100,000 Hours Sitting in Lifetime

*The Answer to Back Pain, Ergonomic Saddle Stool.*

**NEW  
ITEM**

## The Bambach Saddle Seat

- Relieves Pain
- Reduces Fatigue
- Corrects Posture
- Increases Mobility
- Improves Circulation

Your posture on the Bambach Saddle Seat is painless and practical. Your spine maintains its stress-free natural S-shape even when bending over a patient, and you maintain the mobility you need.

### The Answer to Back Pain.

Based on extensive research, only the Bambach Saddle Seat is designed to allow your spine to adopt its natural, stress-free

position effortlessly.

### Suffer from Headaches?

The Bambach Saddle Seat relieves strain on neck muscles and vertebrae, which can help reduce headaches.

### Pain in Your Arms or Hands?

The natural posture promoted by the Bambach Saddle Seat eases pain here too.

Comes in 5-1/2", 8" and 10" Pistons

### Back Problems an Occupational Hazard

As many as 80% of dentists suffer at some time from pain in the lower back, neck and shoulders, together with related headaches.<sup>1</sup> Not surprisingly, such health problems are a well-recognized "occupational hazard". But simply putting up with it can be costly, as well as painful! Musculoskeletal problems are responsible for nearly 30% of early retirements from dentistry.<sup>2</sup>

Studies have shown that one cause of health problems is poor working posture. Sitting on a conventional "flat" stool tends to force the spine into an unnatural C-shaped curve, which compresses the vertebrae and creating excessive pressure on the discs. Over time, the discs can become distorted and damaged, which together with the extra stress in the spine causes the pain and other symptoms so frequently experienced.

1. Marshall ED et al. Musculoskeletal symptoms in New South Wales dentists. *Aust Dent J* 1997 Aug; 42(4): 240-6

2. Burke FJ, Main JR, Freeman R. The practice of dentistry: an assessment of reasons for premature retirement. *Br Dent J* 1997 Apr 12; 182 (7): 250-4

Traditional Dental Posture

Bambach Perfect Posture

Sitting on a "flat" stool forces the spine into an unnatural C-shaped curve.

Unnatural spinal curvature increases stress on the discs which can lead to pain. The 4th and 5th lumbar discs are the "classic" trouble spots.

Maximum angle of the hips to the spine before causing undue stress is 60°. Sitting on a flat chair tends to bend the hips at 90° to the spine.

Traditional Dental Posture

The special shape of the Bambach Saddle Seat helps to preserve the natural curvature of the spine.

Maintaining the natural S-shape of the spine means the discs are not put under undue pressure, helping to avoid back pain and related problems.

The hips are kept at the optimum angle of about 45° to the spine, so thigh and back muscles are at their most relaxed.

Bambach Perfect Posture

## One Spot

### Portable Operating Light for Illuminating the Oral Cavity

- Only 1/2 oz (15 g)

Our spotlight can be affixed to all glasses. It can also be affixed to all head loops, such as Zeiss, etc. One Spot, light as a feather, is battery-driven. Regular batteries produce 12,000 lux at 35 cm distance. Light source LED will last for 100,000 hours (halogen lamp consumes 150 W, our LED 1.25 W = over 100 times less). One Spot consists of a feather-light light source with universal clip for all types of glasses or glass frame with LED device for non-glass wearers.

Feather-light recharge unit (size of a matchbox) to be carried in shirt pocket.

#### Is Ahead off Its Time...

The Power of LED Lighting with a patented focusing lens system produces 12,000 lux to distance of 35 cm (with no shadows).

#### Is Versatile...

One Spot can be affixed to all glasses including dental loupes *Designs For Visions, Heine, Keeler, Lercher, Merident, Orasoptic, SandyGrendel, General Scientific and Carl Zeiss.*

#### Is Practical...

One Spot's LED light source will last for 100,000 hours while consuming only (1.25 w) of energy and has very low heat dissipation. One Spot is cold sterilizable and is suitable for surgical use.

#### Is Long Lasting...

One Spot is featherlite 0.5 oz (15 g), impact resistant (unbreakable), contained within an anodized aluminum housing. One Spot is quite frugal requiring only three (3) 1.5 volt/AAA batteries.

### Focu-Tip White Light Intensifying Tip

- Increases light strength per unit of surface area
- For deep hardening of composite fillings
- Guarantees an optimal margin seal
- Ensures optimal contact with adjacent teeth
- Increases both the strength of the filling and its resistance to chemical attack
- Improves formation of contact surface
- 40 - 70% reduction of cervical gap
- Ideal for class II fillings
- Available for lamps with 8 mm, 9 mm, 9.5 mm and 12 mm dia.
- (Cold-sterilizable)

Focu-Tip (Pkg. of 2 tips)

8.0 mm	(fit 7.7 mm-8.2 mm)	# 355 087
9.0 mm	(fit 8.7 mm-9.2 mm)	# 355 088
9.5 mm	(fit 9.3 mm-9.7 mm)	# 355 086
12 mm	(fit 11.7 mm-12.2 mm)	# 355 089

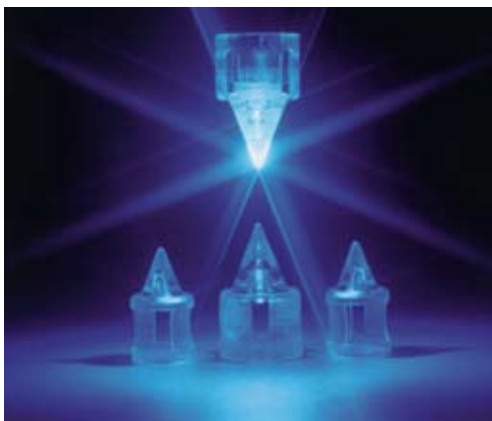

### Focu-Tip E

#### Blunt White Light Intensifying Tip

This new Focu-Tip E Light Tip has an elliptical profile that tapers to give a blade-like tip that is ideally suited for light curing within a proximal box preparation. This design was perfected to give excellent access and maximum light intensity.

Focu-Tip E (Pkg. of 2 tips)

8.0 mm	(fit 7.7 mm-8.2 mm)	# 355 095
9.0 mm	(fit 8.7 mm-9.2 mm)	# 355 096

12 mm	(fit 11.7 mm-12.2 mm)	# 355 098

### Intenso-Point

#### Precision Dental Light

- A very strong penlight with an intense point-form light source at the end
- Used to diagnose secondary caries or cracks in teeth
- Intenso-Point comes with a clip-on mirror for dentists who like a very bright mirror in the mouth
- Only 8.7" (22 cm) long and lightweight 1.5 oz (45 g)

The set comes with 2 batteries, lightbulb and clip-on mouth mirror.

Intenso-Point, complete unit (1) # 355 311

Spare Parts:

Replacement light holder	(1)	# 355 312
Replacement lightbulb	(1)	# 355 313
Replacement clip-on mirror	(1)	# 355 314
Replacement Top Guard	(1)	# 355 315
Replacement battery holder	(1)	# 355 316

## Bravo Portable II

### Portable Handpiece Power Pack

- Ideal for house calls, work outside the practice, etc.
- Up to 4 hours of operation with fully charged battery
- Rechargeable during use for continuous operation
- Compact, lightweight design - only 7 oz (200 g)
- Fully adjustable speed from 0 to 20,000 rpm
- Forward and reverse rotation
- Controls located on top panel for easy use
- Suitable for most hand pieces and contra angles
- Pocket-size controller includes unit holder that conveniently attaches to belt

Power Source: 12 volt Ni-Cad Battery

Battery Recharge: 500 times or more

Battery Charging Time: 5 hour Charger

**Bravo Portable Set:** Incl. Micromotor, Ni-Cad battery, battery recharger, unit holder with belt loop (HP/CA are not included)

(1) # 452 102

## Bravo Table Model TD

- Handy "Mini Unit" for the practice and lab
- Ideal for prophylaxis
- Control box is fully compatible with Bravo Micromotor
- Compact size for minimal working and storage space requirements
- Measures 14 x 11 cm, 220V w/ 110V adaptor

Bravo Table Model

HP and CA not included (1) # 452 106

Foot Pedal (extra) (1) # 452 108

## Orbatek

### Standard E-Type Handpiece for Bravo Micromotors

- Fits all standard micromotors with a plane reception chute (e.g. Bravo Portable II)
- (Autoclavable) up to 275° F (135° C)

Warranty: 12 months

Straight Handpiece 40,000 Revolutions/min.

Bravo Straight Handpiece (1) # 452 162

Bravo Contra Angle Handpiece (1) # 452 155

## Crown Click Deluxe

### Mechanical Crown and Bridge Remover

- Extremely effective due to pulse wave
- With a "click" the crown is released
- Fast, effective and simple crown and bridge removal
- Stainless steel ■ Autoclavable

Introductory Kit With 3 Tips (#1-Bridges, #2-Crowns, #3-Short and Angled End) (1) # 452 205

Crown Click-Sling/Loop End (1) # 452 209

## Crown Click Butler "Classic"

### Spring-Loaded Crown and Bridge Remover

- With 3 settings to regulate the amount of downward tension: low, medium and high
- With a click, the tension is released and the crown or bridge is removed
- 2 different interchangeable tips: short and long
- All parts are made of stainless steel

Crown Click Set: instrument w/2 tips (1 long and 1 short tip)

# 355 219

Short Tip Replacement (1) # 355 217

Long Tip Replacement (1) # 355 218

## Perfect-Splint System

### Splint Nets

- Cutable nylon or stainless steel nets that can be affixed e.g. with Cyano Veneer
- Stabilize transplanted, replanted or traumatically and periodontically avulsed teeth, before or after surgical treatments, diastema closures, orthodontic measures
- Also strengthen thin-walled temporaries or prosthetics
- Each package is sufficient to splint approx. 200 teeth

Combination Set: 10 stainless steel and 10 nylon nets, attachment aid (orthodontic wire) # 152 280

Steel Set: (20) stainless steel nets attachment aid (orthodontic wire) # 152 281

Nylon Set: (20) nylon nets attachment aid (orthodontic wire) # 152 282

## Perfect-Splint C

### Pre-Curved Splinting nets

- Curved nylon (.20 mm thickness) or super thin stainless steel mesh (.20 mm thickness) simplify the application of splinting in the mouth

Mesh bands 5 mm wide and 45, 50, 55, & 60 mm long

Starter Set: 8 stainless steel and 8 nylon strips # 153 000

Refills available in 10 of each size

See Article on page 78

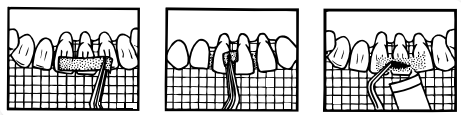

## Super Splint

### Fiberglass Splint Material

New fiberglass splint material with tissue-like qualities. Easier to adapt with better retention. Ideal for positioning loose teeth. Supplied in a convenient dispenser with 10 ft. of splint material, 1/16" (4 mm) wide

Dispenser (1) # 355 849

## Matrix Retainers

### Tofflemire Design

- Stainless steel
- Available in 3 forms

Matrix Retainers:

Standard (1) # 355 046

Angled, adult (1) # 355 047

Short, child (1) # 355 048

## Miralay (Meddard)

### Crown and Inlay Seater

- Instrument and rubber inserts are autoclavable

Miralay Set

Includes: 2 instruments (long & short) and 2 replacement pads (1) # 355 210

Miralay inserts separately (4/pkg) # 355 211

## Salibag

### Protective Hygienic Pouches for Sensors and Conventional Films

- Easy to open and remove
- Sensor is placed into the Salibag then both are put into the mouth for radiography (same for conventional 3x4 films)
- Protects the sensors from humidity, saliva and blood
- Soft corners agreeable for the patient
- Available in 4 sizes:

	Type for	Quantity	
SLB	3x4 normal films	400 pcs.	# 656 230
SLB-IP	Imaging plate	320 pcs.	# 656 231
SLB-L	CCD sensor S/M	320 pcs.	# 656 232
SLB-LL	CCD sensor L	240 pcs.	# 656 233

## Grid Mount

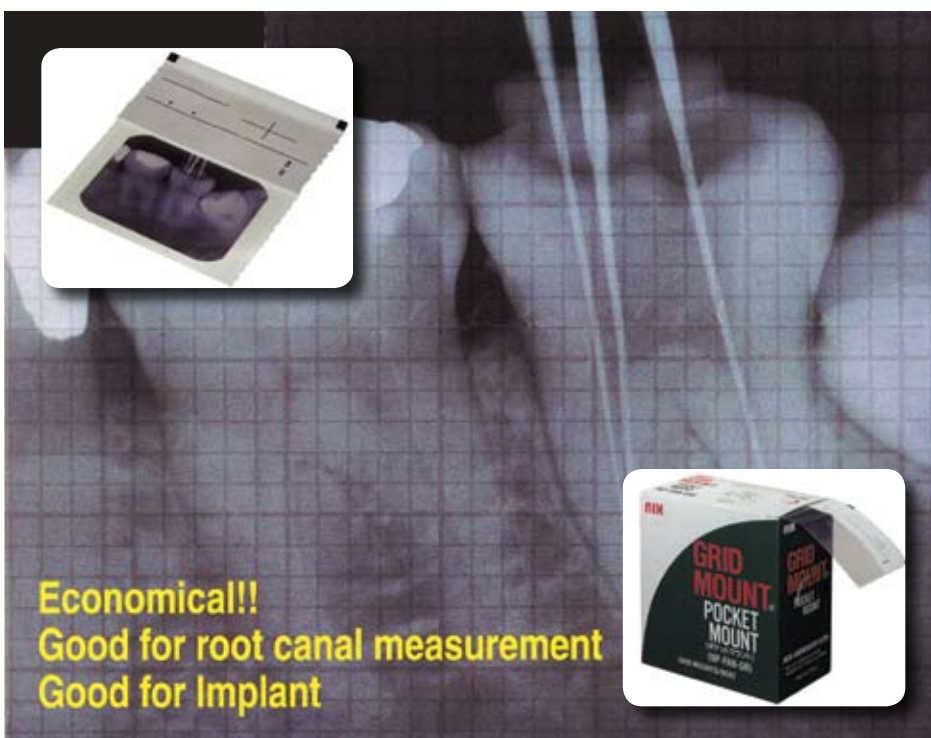

### Pocket Film Mount with Grid Scale

- Fine millimeter lines on transparent film pouch
- Lines 1mm apart, bold lines at 5 mm intervals
- No distortion
- Grid lines do not obstruct visibility
- Used for measurement of root canal or implant

For use in surgery (to estimate the length of root remains, to document the regeneration process of bone defects), in periodontics (for documentation of bone generation after fillings with collagen or other substitute bone materials), in implantology (to diagnose the bone situation), in prosthetics (to evaluate the thickness of enamel / dentine prior to the use of approximate anchor systems), in endodontology (to determine the root canal length), etc. Comparison of X-rays taken years apart is made possible by millimeter line. Film does not fall out; data slip is allied. Pouch with adhesive backing and peel off-liner will stick to any patient chart for all normal 3 x 4 mm films.

Grid Mount Dispenser with 500 pouches,  
each pouch with data recording and patient name tag  
(1) # 605 300

## ID Tab

### Self Adhesive Lead Numbers

- For easy identification of X-ray film
- A fast, accurate and affordable filing method
- Simply stick onto film prior to exposure and white numbers appear on developed X-ray

Peel-off stickers, 5 of each number (1 to 100)  
(360/Box) # 656 305

## Soft Bite-Wing Tabs

### For Exact Positioning of X-Ray Film and Patient Comfort

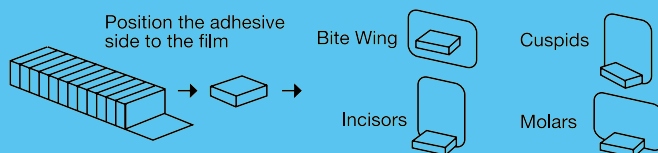

- Soft disposable foam material
- Self-adhesive: holds film firmly and securely for correct positioning
- Comfortable for the patient, slim design prevents gagging
- Ideal for accurate film positioning for periapical and bite wing X-rays

Soft Bite-Wing Flap

(Box of 500)

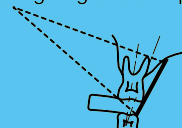

(1)

# 656 303

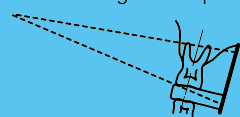

Disposable self-adhesive foam tabs, soft and comfortable. Ideal for periapical and bite-wing x-rays, using parallel or bisecting angle technique.

• Bisecting Angle Technique

• Paralleling Technique

## Emmenix

### X-Ray Film Holder

- Easy to position in patient's mouth
- Eliminates use of fingers, irritation of mucosa, and gagging
- No distortion or bending of film, no picture cut-offs
- For front, back and wisdom teeth
- High impact strength
- (Autoclavable)

Emmenix, Pkg. with (3) holders

Assorted Colors

(1)

# 656 300

## Rontgomarker

### X-Ray Film Marking Pen

- Writes on all types of film
- Quick drying and waterproof
- Exact, fine point

Rontgomarker

(1)

# 656 322

## X-Ray Stain Remover

### Removes Chemical Stains From Clothing Caused By X-Ray Chemicals, Iodine, Rust, Etc.

- Works on fresh and laundered stains
- For tougher stains, just soak and wash
- Highly effective and gentle to clothing
- Also suitable as tank cleanser

X-Ray Stain Remover

3.33 fl. oz. bottle / 100 ml

# 656 220

# Professional Prophylaxis

## It All Starts with the Patient and Their Dentist!

Dentistry - the profession of tooth care is the medical science concerned with the treatment of tooth and gum disorders and diseases.

*Personal Dental Hygiene is the Self-Care of Teeth!*

The care people take of their teeth will pave the way toward a healthy mouth and define outward appearance.

### Prophylaxis is the Key

#### Patient Action Steps:

1. Be concerned about their dental wellness.
2. Be attentive and take action to achieve their dental goals.
3. The proper dental instruments must be used to keep their teeth in good condition.

## The Miradent Products are recommended to achieve Professional Prophylaxis.

#### Use them for a good dental life.

Implant Care Kit (*implantology*)

Infant Toothbrush (*infant toothbrush*)

I-Prox P (*interdental brush*)

I-Prox Plus (*Interproximal brush*)

Miradent Kit (*prophylaxis kit*)

Mirawhite Pro (*bleaching pen*)

Pick-Brush (*interproximal brush*)

Protho Brush DeLuxe (*denture brush*)

Tong-Clin DeLuxe (*tongue scraper & brush*)

Tong-Clin Gel (*tongue gel*)

Twin Dento Box (*denture box*)

Zahnpick (*flosser aid*)

# I-Prox P – Where a Regular Toothbrush Will Not Reach

## I-Prox P

### Pointed Toothbrush for Interdental Cleaning

- Ideal for the gentle and thorough cleaning of sulcus and along the mucosal rim
- Suitable for cleaning orthodontic attachments or as an interdental brush
- 5½" (14 cm) long moulded finger-grip handle and white brushes
- 3 spare brushes can be stored in the handle
- For practice use, but especially designed for the professional oral dental home care

I-Prox point brush helps brush where a regular toothbrush will not reach. Includes a finger form holder with a reservoir containing 4 insert tip pointed brushes.

Translucent Blue	(1)	# 607 030

#### Refill Brushes:

Pointed tips	(4/pkg)	# 605 781
Soft tips	(4/pkg)	# 605 782

**NEW**

### Box of 50 I-Prox P for Patients with New Crown & Bridge or Ortho Appliance

After many dentists approached us asking for the possibility to buy I-Prox P in quantity at a reasonable price, we now offer I-Prox P in boxes of 50 brushes with one exchangeable tip, each brush individually sealed in plastic for under \$ 1/pc. Every patient, who gets a new bridge or braces basically has problems with a regular toothbrush because it doesn't reach where he wants to clean. Therefore, the dentist can help by giving one I-Prox P.

Translucent Pink	(50/pkg)	# 605 791

### Tong Clin DeLuxe Professional Tongue Cleaner with Brush and Scraper

- Very fine tongue scraper with brush and scraper in one instrument
- The brush lifts debris off the tongue and the scraper is used to scrape off

Translucent Blue	(1)	# 607 027
Translucent Pink	(1)	# 607 028
Blue	(1)	# 605 778

### Tong Clin Gel Great Tasting Gel with Soft Cleaning Effect

- Removes plaque from the tongue thoroughly
  - Softens and smoothes the tongue mucosa
  - Contains camomile, sage, marigold and menthol
- Latest research has shown that bad breath is caused by pathological plaque on the tongue in up to 90 % of the cases. In order to solve that problem we recommend the use of mira dent Tong-Clin Gel with its anti-odor effect in combination with the Tong-Clin DeLuxe.

Remove a small amount of gel from the tube and put it on the Tong-Clin DeLuxe tongue scraper. A drop of gel is perfectly enough. Rub the gel carefully onto the surface of the tongue with the brush side and leave it to work for a little while. Use the scraper side to remove the coating from the tongue afterwards. If desired, put another drop of gel on the tongue and distribute it in the mouth for a lasting soothing and refreshing effect.

### Mirawhite Pro Bleaching Gel in a Brush-Pen Applicator

- With brush for an easy and exact application to the teeth
  - For professional tooth whitening within seven days
  - Easy handling with a long-term effect
  - Gentle to the enamel
  - Handy and slim design, in pencil form
  - Easy dosage, no leakage or drying time
- Ingredients: Propylenglykols, polyglykols, 16 % carbamide peroxide, water  
Contents: .06 oz (1.75 g)

Mirawhite Pro	(1)	# 630 067
---------------	-----	-----------

Mirawhite Pro helps to bleach the teeth within 7 days. It contains 16 % carbamideperoxide and should be used following your dentist's advice.

Dosing wheel allows for an easy and safe dispensing of gel

Gel chamber contains all-in-one gel, no mess, no dry-out

Brush for an exact and easy application to the teeth

## Pick Brush Interproximal Care Unit

Holders with Interchangeable Brushes

- For thorough plaque removal
- Brushes available in 5 sizes to clean even the tightest in-between areas
- Optimal design and quality materials prevent unnecessary injury to sensitive gums
- Brushes are conveniently stored in handle
- Push-peg ends allow easy insertion and removal of brushes

**Pick Brush Sets:** Holder with one brush

Transparent Blue	# 631 002
Transparent Pink	# 631 003
Yellow	# 605 630

### Twin Dento Box

#### Waterproof Denture Cleaning and Storage Case

- Leak-proof and lockable denture box
- Ideal for orthodontic retainers
- Dual-purpose cleaning brush included
- Reduces cleaning time (soak 2 dentures simultaneously)
- Cleaning tablets can be stored in brush compartment

Protho Box is a durable plastic waterproof case which holds two dentures (upper and lower) and contains a cleaning brush plus a mirror within its lid.

Size: 4-3/8" x 3-3/4" x 1-3/4" (11.11 x 9.5 x 4.4 cm), 3.5 fl oz (120 ml) capacity storage compartment

Protho Box w/brush	(1)	# 605 902
Brush separately	(1)	# 605 901

### Zahn-Pick

#### Flossing Aid and Tooth Pick Combination

- Unwaxed dental floss tension mounted in a bow holder
- Opposite end is shaped to be used as a tooth pick
- Each Zahn-Pick is individually and hygienically wrapped

Blister-Box of 12 pcs.	# 605 636
Box of 100 in paper pouch	# 605 637

### Miradent Kit

#### Preventive Kit-Show and Tell

Brilliant (Mouth Mirrors), Infant Toothbrush, I-Prox P (interproximal brush), I-Prox Plus (short interproximal brush), Pic Brush (interproximal brush), Protho Brush DeLuxe (denture brush) & Tong Clin DeLuxe (tongue scraper & brush) (1 Each)

## Implants Simplified

Single-appointment implant impressions using the Miratray Implant impression tray

The dental impression is the most important means of communication between dentist and dental technician. An impression should precisely mirror outline, preparation, and neighboring areas. Presently, excellent impression materials with high final hardness (like polyether and A-silicone) are available. They are suitable to produce a final implant impression.

The frequently used open-tray impression technique requires two appointments. Following are step-by-step instructions for single-appointment implant impressions using the Miratray Implant impression tray.

Dentulous Miratray Implant	(Set of 8)	# 101 220
Edentulous Miratray Implant	(Set of 8)	# 101 221

### Case I: Dentulous maxilla

A 47-year-old patient received implants after losing the front teeth 9 and 10. Both soft and hard tissue was increased. Fig. 1 shows the implants directly after exposure.

1. Fit a transparent tray.
2. Mark positions of the implants (Fig. 2) and drillholes.
3. Take a final impression on the implant abutments (Fig. 3).
4. Make two ceramic crowns as well as more ceramic crowns for the neighboring teeth (Fig. 4).
5. Fit crowns in the mouth (Fig. 5).

### Case II: Edentulous mandible

A 59-year-old patient, edentulous for 18 years, received two implants in the interforamen space of the mandible.

Fig. 6 shows the situation after exposure.

1. Fit and mark the opening on the transparent edentulous Miratray Implant tray to let the implant posts through (Fig. 7).
2. Drill the holes in the tray and fit (Fig. 8)
3. Take an impression of the edentulous maxilla and the bite registration. Negotiate the functional lines and fabricate the wax try-in. Then the bar can be fabricated and seated in the mandible (Fig. 9).
4. Fit the prosthesis to the bar (Fig. 10).

## The Miratray Implant system of impression trays.

### Features

- Four upper and four lower trays
- Trays are made of transparent plexiglass
- Can be heated up to 98° C
- 3.5-mm thickness of tray ensures exceptional rigidity even if holes are drilled
- All trays have their own number to simplify identification
- Measuring calipers and the measuring template ensure a quick and hygienic selection of a tray with an exceptionally precise fit
- Refill boxes of four trays per desired number are available

**Fig. 1** The implants directly after exposure.

**Fig. 2** Mark positions of the implants.

**Fig. 3** Take a final impression of the abutments.

**Fig. 4** Make ceramic crowns.

**Fig. 5** Fit crowns in the mouth.

**Fig. 6** The situation after exposure.

**Fig. 7** Fit and mark the opening on the transparent edentulous Miratray Implant tray.

**Fig. 8** Drill holes in the tray and fit.

**Fig. 9** Form the bar in the mandible.

**Fig. 10** Fit the prosthesis to the bar.

## Perfect Splint C

### Precurved Splinting Nets

- Curved nylon, 0.02 mm thickness, or super-thin stainless steel mesh, 0.02 mm thickness, simplify the application of splinting in the mouth
- For stabilization of transplanted, replanted or traumatically and periodontically avulsed teeth, before or after surgical treatments, diastema closures, orthodontic measures
- Each package will splint approximately 20 teeth possibilities

**Fig. 1:** Four different curvature shapes  
Two B-shapes, more curved  
Two A-shapes, less curved  
Both available in nylon fiber, .25 mm thick  
and stainless steel, 0.02 mm thick

## Perfect Splint C are ready-made pre-curved nets from fibre or stainless steel in the four most common curvatures.

The splinting of loose teeth is the standard therapy for dentists. There are combinations of technical procedures with nylon or metal splint nets, together with composite or Cyano acrylic.

The advantage is the time-saving with this one visit chairside method. The big disadvantage has always been that straight (non-curved) bands have been used and the shape cut-ins had to be done manually to adapt the bands to the curvature of the teeth. This adaptation loaded the treatment with an additional time frame.

The new Perfect Splint C nets are curved with a radius that corresponds to the four most common round shapes of the dental jaw. They will fit nearly any form and the time-

consuming adaptation is avoided. Perfect Splint C precurved nets are extremely thin (only 0.02 mm) and can be cut to the needed length with any available scissors within seconds. They are adapted to the surface of the teeth and affixed with adhesive material.

Generally, the regular composites are used. The narrow construction of the curved splint nets avoids any irritation on the gingival border and to the papilla.

Perfect Splint C for fast and safe splinting of loose teeth and optimal temporary bridges.

### Perfect Splint C

#### Starter set:
