The World of Healthcare is Evolving, are you?

## MedFormix<sup>®</sup>Vue

### What is the true cost of Prior Authorizations?

In the August 24, 2014 Health Data Management article, "Taking the Guess Work out of Prior Authorizations", Anita Murcko said "even though 5% of prescriptions require prior authorizations, on the average, doctors spend over \$83,000.00 each year trying to obtain prior authorizations from insurance companies just to find out which medications they can prescribe for their patients!"

She continues by stating, "To add to this burden, formulary and eligibility information is often difficult to interpret or is incomplete. Additionally, the PA requirements and the related forms and formats differ by health plan, drug class and drug, making documentation and submission time- and labor-intensive for all involved. Up to 90 percent of PA requests require a fax or phone call."

Do you have 20 hours a week to spend in this manner? If you do, can you afford it?

MedFormix<sup>®</sup>Vue offers a fast, simple solution that takes only seconds! When a prescription is written, the insurance plan's benefit automatically displays the preferred formulary for the provider to choose from taking just seconds! No wasted time or energy.

No phone calls. No forms to fill out. No Wasted Money! Just happy doctors and patients alike.

**Call 800-366-4564 today for more information on Medformix!**
