

TITAN LEY LINES OF TEHERAN

The purpose of this illustration is to depict the *Pleiadian Pyramid City* pattern of Teheran, Iran. This *Martian Motif* is usually associated with the financial centers of modern cities that astonishingly will have 7 major towers or skyscrapers. Each of the 7 towers or structures corresponding to the 7 Stars of the *Pleiades*. Usually the core stock exchanges are there. In the ancient world, such a pattern usually corresponded to a royal palace that ruled monetary and social-political affairs. In the medieval period, such a pattern corresponded to churches or temples of worship. In the case of Teheran, the *Pleiades Pattern* corresponds to the old Financial Center. The various points of the Star correlations correspond to traffic circles for the most part. It is rather interesting that this sector of the city is where the embassies of the major Superpowers are situated, Russia, England, Germany, etc. Out of all the circular roundabouts, there was one 1 building that corresponded to the *Maia* Star of the *Pleiades*. This was the famous *Palasco Building*. It was built in the 1960 and was the tallest building at that time. On January 19, 2017 it burnt down to the

MARTIAN MOTIF OF THE PLEIADIAN PATTERNS

If one views the event which was videoed from different angles, it appears that the building was demolished much like the *World Trade Center Towers*. Some have pointed out that it is odd that January 19 or 1-19 is a 9-11 backwards and see the same 'blueprint' of taking a building down. Now for what purpose or date or ritual, that remains a mystery and to some, a conspiracy still.
