## 22 Advantages of PlastiForm™

- 1. Guarantee**  
LIFETIME Guarantee for Premium Boards.  
10-year Guarantee for Standard Boards.
- 2. Lightweight**  
1/4 the weight of lumber. 2x4 board is .5# per linear foot. 2x6 is .8# per linear foot.
- 3. Non-Stick**  
Use a little form oil for little or no cleanup.
- 4. Faster To Use**  
4x faster than using wood or metal forms.
- 5. No Nailing Required**  
Use PlastiForm™ connectors to slide together joints.
- 6. Easy To Use**  
Use Camlocks anywhere along the boards.
- 7. Adjustable Heights**  
Adjust verticle heights in seconds.
- 8. Versatile Corner Angles**  
Angle corner connectors will swing 270 degrees for inside corners.
- 9. Multi Purpose**  
Use for screeding concrete.
- 10. Flexible**  
Use for inside or outside radius as small as 3-foot for 2x4's or 4-foot for 2x6's.
- 11. Rigid For Straightwork**  
Insert conduit, PVC, or rebar inside boards, for forms as rigid as wood, yet lighter in weight!
- 12. Great For Building Steps**  
Use to form steps in minutes.
- 13. Easy To Transport**  
1500 linear feet loads easily on your truck.
- 14. Impervious To Chemicals**  
Acids and other chemicals won't hurt PlastiForm™ boards.
- 15. Resilient**  
Strongest memory of any plastic material. Boards return to straight molded position after bending.
- 16. Economical**  
Pays for itself in 4 uses.
- 17. Saves Time**  
Set up, pour, and strip forms in one day, instead of several days with wood or metal forms.
- 18. Fast-Stripping**  
Strip forms as soon as concrete won't slump.
- 19. Clean Finish**  
Forms leave a glass-like finish on concrete. No touch-up required.
- 20. Reduces Labor**  
Reduces labor by up to 75%
- 21. Save Money**  
Note the dramatic savings on first use!
- 22. Environmentally Safe Product**  
A preferred material for LEED construction.

### Durable HDPE

PlastiForm™ Boards are made of high-quality virgin HDPE, the same plastic used for heavy-duty crates and benches. Won't splinter, break, warp, or split!
