

Like No Other App: Features & Benefits of SmartPHR Health Aware

Features of the App	Benefits to You
A personal health record app created by specialists in chronic conditions	Store individualized, longitudinal information in one data hub that is relevant to various chronic conditions and useful to many health care providers.
For complex patients with common and rare chronic conditions and their caregivers	Document changes over time in patient-experienced and caregiver-observed complaints, syndromes, symptoms, and side effects.
Securely storing data in a HIPAA-compliant cloud facility for 24/7 online availability	Safeguard a lifetime of health data that is otherwise scattered and inaccessible in the paper and electronic records of many health care providers.
Redundantly storing data on users' smart phones for 24/7 offline availability	Access crucial health data in hospitals, emergency departments and remote locations with weak or blocked mobile signals.
With tools enabling patients to partner with trusted caregivers and providers and:	Lighten the emotional and work burdens of frightened patients, worried family caregivers, and committed professionals.
Safely maintain and share accurate, comprehensive clinical summaries	Keep past, current, and future health care providers on the same page.
Prioritize personal health and lifestyle goals	Leverage the expertise of many providers for symptom relief, clinical improvement, and healthier lifestyles.
Shape individualized, goal-related drug and lifestyle interventions and care plans	Create, monitor, and refine cross-provider action plans until change is evident.
Monitor compliance with interventions and progress with goals	Get daily prompts for one-stop reporting about compliance and goals.
Visualize relationships over time between interventions and goals	Use at-a-glance timelines to envision how changes in compliance with providers' instructions might impact patient goals.
