Client:	Chaohu Resort development Authority

Chaohu Masterplan was the development of a new city centre for the old historic area of Chaohu in Anhui province. The waterfront development included many different landuse zones and many different landuse opportunities. The design was created to provide a variety of recreation, cultural and social opportunities all along the waterfront as well as landscape treatments that fit into the surrounding landuse. The major development zones were to include 3 5 Star Hotels, 6 3 and 4 star hotels and a spa resort. The development of a new Xintiandi was to compliment these hotels and resorts
