

TIME-WAVE ZERO TIMELINE

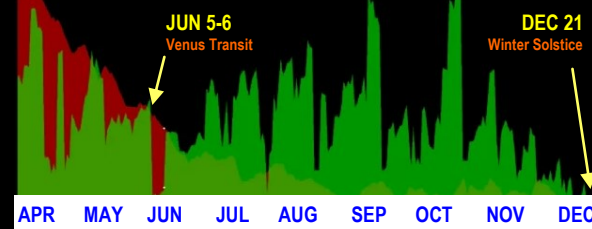

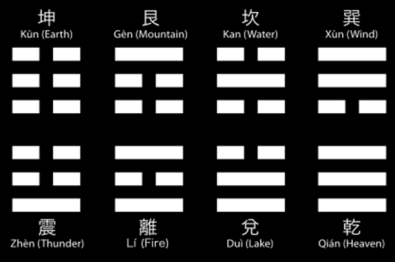

RELEASE LANGUAGE FROM THE I-CHING END OF TIME SEQUENCE

The purpose of this illustration is to highlight several key and unique properties of the Time-Wave Zero theory. The theory purports that the patterns of ALL of humanity's history is encoded in the I-Ching. All events since its start-time correlates to trends or dates called 'Novelty.' In turn, the Novelty appears to assert a downward 'count-down' to major historical events such as calamities and disasters. This Time-Wave will culminate at the infamous Winter Solstice of December 21, 2012. The Web-Bot is another system that seeks to ascertain such future trends. The Web-Bot uses the collective 'consciousness' of the internet to anticipated stress or pressure points related to search topics. These stress-point or trends in time are described as 'Release Language' which is negative (-) or 'Tension' which is positive (+). At the flashpoint of these occurrence, a major global event is thus projected to occur; either positive or negative. These Theories with their applications are nonetheless associated with the certain anticipated prophetic time. Both the Time-Wave theory and the Web-Bot converge on the same date of the end of the Mayan long-count that 'counts-down' to the culminating passage of our Solar System through the Galactic core that signals the 'End of the Age' to come within this generation. This analysis and illustration attempts to correlate several dates and events that are known facts to see if there is any reference to the sequence to test the validity of the Novelty Theory in particular. 1) The timeline presented will feature the time-span from May to Dec of 2012. 2) The Jewish Feasts, starting with Pentecost will be incorporated onto the timeline. 3) Lastly the remaining celestial Eclipses of 2012 will also be plotted out to see, if indeed the I-Ching numerical sequence has any correlation. Based on the analysis of the data presented, it appears that the Time-Wave Zero theory is valid.

SOME OBSERVATIONS:
1. It appears that the eclipses correlated to 'Dips' in the graph or as a negative 'Release Language'. A negative aspect.
2. It appears that the Holy Jewish Feasts also correlated to a 'Spike' with 'Tension Language'. A positive aspect.
3. It appears that the remaining Equinoxes/Solstices correlated to 'Dips' in the graph or as a negative 'Release Language.' A negative aspect.

Critics of the Bot state that according to the predictions the future is always bleak and getting worse. Others state that the Bot's predictions are very vague, written in language that is difficult to understand to the point of becoming meaningless. It was originally developed to predict stock market trends in the late 1990s. The creators of the Web-Bot Project keep the technology updated along with its algorithms. The yearly predictions are sold via the website.

WEB-BOT: This refers to an Internet Bot software program that is claimed to be able to predict future events by tracking the collective keywords searches entered on the Internet. In 2012, the following predictions have been made that a 2nd Depression in the USA and world-wide will occur, that there will be a massive devaluation of currency and hyper-inflation. This will in turn trigger mass layoffs, bankruptcies and the popping of the derivatives bubble. The Web-Bot has gained interest because it purports a 2012 dooms-day scenario. It thus has predicting that a cataclysm will devastate the planet on certain key dates.

This catastrophe may include a reversing of Earth's magnetic poles or a small series of nuclear attacks leading up to World War 3. The predictions do not call for a complete end of the world or 'time' as the Time-Wave Theory suggests although a data gap has been found between the end of 2012 to several years afterwards. One explanation for this 'Gap' is that the planet gets hit by a massive Electric Magnetic Pulse (EMP) brought about by devastating solar flare activity that knocks out world power grids. Also a new form of 'capitalism' is said to emerge around 2017-2020 because of the chaos ensued due to a worldwide economic collapse.

As an example of the I-Ching influence, the flag of South Korea contains the *Taeji* symbol, or *tàijǐtǔ*. It is the Yin & Yang in dynamic balance, called *taegeuk* in Korean. It represents the 'origin' of all things in the universe.

I-CHING: The word "Ching" means scroll or a book. The word "I" is attributed to calamity and disaster. So from the inception, it is a sort of 'Oracle of Doom'. The I-Ching is one of the oldest Chinese text ever discovered perhaps going as far back as 2500 BC. It is a system of foretelling comparable to geometria of the West. The I-Ching pronounces statements, oracles or 'omens' represented by 64 sets of 6 lines each called 'Hexagrams'. It uses combinations of the 'Hexagrams' that are thought to record 'all' of human history as a numerical code. Each Hexagram is a figure composed of 6 stacked horizontal lines. Each line is either **Yang** (a solid line), or **Yin** (broken line with a gap in the center). The Yang represents the 'Male' Creative Principle, the Yin thus represents the 'Female' Receptive Principle. This coded numerical system initially is said to have been used for cosmic calculations. The principle assertion is that the 'future' has already been encoded in numbers and that all major human events can be extrapolated. Over the centuries, it has degraded to the level of common use for divination—as in 'horoscopes'.

TELEOLOGICAL ATTRACTOR
According to McKenna, the universe has a 'teleological attractor' that at the end of time increases interconnectedness. Eventually this attractor reaches a singularity point in time which he calls the 'Infinite Complexity.' According to the software program, this 'Point of Singularity' occurs on Dec 21, 2012. At this point in 'time' in the I-Ching, is said to be where 'anything and everything imaginable will occur simultaneously'. It so happens that there is no more Novelty beyond the end-date of Dec 21, 2012. McKenna's research and work took him to seek out various uninhibited psychedelic experiment which are not recommended nor condoned. It was through such experiments with mind and body altering drugs that led him to be in 'contact' with what he called the 'Logos' at one point. As he described it, it was the informative, spiritual voice that he believed was the universal 'religious principle' that prompted him to explore the I-Ching system and later on led him to the 'Novelty Theory'. Although his research and work took him to esoteric and New-Age realms forbidden by the Word of God, there can be at least, a mathematical appreciation for entertaining the notion that human history does come in reliable and systematical patterns.
