

GATES OF THE HEAVENLY PARADISE I

There is one aspect that is reversed pertaining to the *Celestial Gates theory*. The *Golden Gate* in Jerusalem corresponds to the position that the *Silver Gate* would be. However, this *Gate Template theory* can be also seen as a mirror of itself and a direct complement to each Gate. Thus the *Orion* correlation would match as other studies suggest that the *Earthly Jerusalem* is patterned also to that of the *Heavenly Jerusalem* with its Gates and the constellation of Orion in particular, etc. See the study entitled *The Gates of Orion*. However, the *Golden Gate* correspondence that is associated with *Ophiuchus* cosmologically is at the opposite end of the Old City of Jerusalem on Earth and appears to correspond to the *Citadel of David*. It would make sense as it is a stronghold and *Ophiuchus'* disposition is that of a strongman striving.

Lion's Gate - Jerusalem

Orion

Burj Khalifa
'Arrow of ORION'

What this study also seeks to bring out is that if one also applies the *phi ratio* in approximation to the 2 respective *Straits of Gibraltar* and *Straits of Hormuz*, the fulcrum centers on Jerusalem. Also the cosmology suggests some geographical correlations as with Ophiuchus to Europe, The Big Dipper (Bear) with Russia directly north of Israel. Then there is Hydra, the Serpent that depicts the Serpent God, Allah which in calligraphic is written as a serpent in a tree motif. Virgo thus corresponds the expanse of the Mediterranean sea which Mari or Mary as in the Virgo-Mary is derived from.
