

SLEEPVIEWSM WEB PORTAL

SLEEP LAB SLEEP DENTISTRY

Board-certified sleep specialist partners with dental care to offer HST. The study is initiated in the dental office.

- 1** Suspecting OSA, **dentist** interviews patient about sleep health and medical history to determine candidacy for home sleep testing.
- 2** **Dentist** orders home sleep test, prepares monitor and instructs patient on proper setup and use of sleep monitor.
- 3** Patient leaves office same day prepared to self-administer home sleep test in the comfort and convenience of his own home.

- 4** Patient returns sleep study kit to dental office. Sleep test data is checked into portal by the **dentist's staff**. The study is reviewed and scored by a **sleep technologist** at the sleep lab, or by CleveMed's **RPSGTs**.
- 5** Sleep lab's board-certified **sleep physician** interprets sleep study and makes recommendation for treatment.
- 6** Follow-up visit at **dental office** to review test results, treatment recommendations and long-term management, ensuring treatment effectiveness.
- 7** **Dentist** bills insurance for the HST study. According to a professional service agreement, payment is made to the **sleep physician**.
