SUMMER CAMP 2019

Join us for a fun-filled camp experience that provides hands-on learning opportunities with take-home projects.

Marine Biology (June 3 - June 7)

Ever wonder what makes up the deep blue sea? Children will explore the ocean and the creatures that live there. Join us for a whale of a good time.

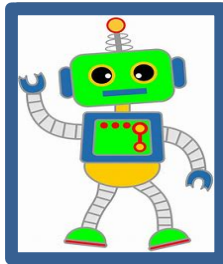

Engineer This (June 10 - June 14)

Does your child like to ask questions, imagine, plan, create and improve on things? If so, week two is for them. Don't be in a fix, sign up for Engineer This.

Building & Catapults (June 17 - June 19)

Children will have fun tinkering with materials to create buildings and make catapults. There's nothing like a homemade catapult to stimulate kids imagination.

Robots (June 24 - June 28)

Children will get to meet Edison, a little robot with lots of potential. Campers will be exposed to basic coding activities and programming through drag and drop barcodes.

Challenges with Food (July 8 - July 12)

Want to play with food! During this camp, children will use food to create structures, explore, and challenge their creativity.

Aerospace (July 15 - July 19)

This week we will be flying high with aeronautics. Children will investigate gliders, balloons, parachutes, kites and more.
