

Why CBI?

Today's workforce needs to be honest, hardworking, loyal, a self-starter, and possess the soft skills necessary to keep a job and advance in their chosen career field.

A student in the Career Based Intervention program is exposed to all of that. The curriculum in the Career Based Intervention program is broken down seven categories.

Post-Secondary and Career Preparation
Creativity, Motivation, and Innovation.

Workplace Behavior (Soft Skills)

Workplace Technologies (Hard Skills)

Culture & Communication

Financial Independence

Workplace Fundamentals &

Personal Wellness

A message to parents/guardians

I'm not interested in your student simply "getting it done." I genuinely want to see your student succeed, and for that to happen, they must learn how to achieve success. The Career Based Intervention program is specifically designed to ensure that students fully understand the lessons taught before moving on to new subjects. I care deeply about what happens to my students after they graduate from high school. I work hard to build meaningful relationships with my students so they feel comfortable asking the tough questions.

What is CBI?

CBI is an introductory career technical educational program designed for student in grades 9-12.

CBI is a program designed to help students realize their potential by helping them explore the many careers that are in the world today. It helps them to discover what their strengths are and then teaches them how to use those strengths to become successful in school, work, and life.

Some Topics Covered Are

“Career Exploration”

“Goal Setting”

“Communicating with Others”

“Handling Stress”

“Team Building”

“Hand Tools”

“Personal Finance”

“Credit”

CBI Program Goals

The programs goals are to help students improve academic achievement, keep students on track to graduate from high school, develop employability skills, set goals and implement a career plan, participate in a career pathway in preparation for post secondary education and future careers.

- Increased graduation rates
- Increased transition to next grade level
- Increased student attendance
- Few suspensions and/or expulsions
- Pursue career goals based on personal interests
- Transition to a Career-Technical program related to personal interests and/or to postsecondary opportunities

Benefit to the Student

- A sense of belonging
- Develop a better understanding of real-life issues
- Become more goal oriented
- Learn to use problem-solving skills
- Start to develop a portfolio of skills for the future
- Improved attendance and grades
- Earn elective credits for work

The subject matter will be learned by utilizing a variety of techniques that will include:

- Projects
- Student videos including the writing of scripts, shooting and editing the videos themselves
- Mini Bike Project
- Small Business Project
- Knowledge Bowl Competition
- 6x6 project
- Student lead projects
