

CHES-U \$15M Grant Helps Upstate New York Manufacturing Businesses

Lansing, NY, November 20, 2017 – ADC's President Mr. Alex Deyhim and Managing Director Mr. Eric Van Every spoke at CHES-U's announcement of \$15 million state-sponsored grant to upgrade their facility.

"Our local economy has already begun to see the effects of the state funding from CHES-U. ADC successfully delivered two hutches, has designed five more and as a result we have submitted proposals to Argonne National Lab and Brazilian Synchrotron for 32 Hutches and to Australian Synchrotron for 6 beam lines that will bring in over \$30 million in revenue allowing ADC to expand and create more jobs." Says Managing Director Eric Van Every.

The Lt. Governor Hochul, Cornell University's President Martha Pollack, and CLASSE Director Ritchie Patterson announced a \$15 million state-sponsored grant to upgrade the Cornell High Energy Synchrotron Source, or CHES. This funding is all about creating jobs in Upstate New York.

The CHES-U upgrade is sharing the technology with local companies in order for them to develop the advanced manufacturing capabilities that are needed to expand and reach facilities around the world.

"We are one of over 20 manufacturing companies in the Southern Tier providing parts to CHES-U's project. The impact it has had on ADC in the last 6 months has already been shown by invitations to submit proposals on projects that we otherwise wouldn't have been invited to do. This funding can create more than 100 solid advanced manufacturing jobs in the Southern Tier." Says Business Manager Rebecca Schindler.

Eric Van Every (Managing Director), Alex Deyhim (President), Rebecca Schindler (Business Manager)

Martha Pollack (President of Cornell University), Kathy Hochul (Lt. Governor of NY), Alex Deyhim (President of ADC), Richie Patterson (CLASSE Director)
