Solutions**

## December 2018 Newsletter

### A VERY LARGE PROJECT INSTALLATION

A huge vinyl mesh building wrap (over 17,000 sq ft) that encloses 5 levels of an exposed parking garage of a residential building in Baltimore, MD. The installation at 225 N. Calvert Street was accomplished by the team at Dodge-Chrome, in Silver Spring, MD ([www.dodgechrome.com](http://www.dodgechrome.com))

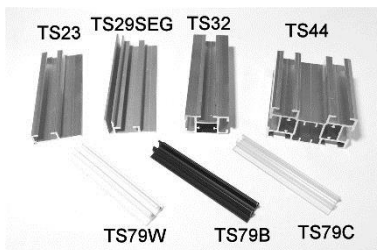

The large format graphics wrapping 225 N. Calvert Street were installed by Dodge-Chrome, this project included a custom fabricated sub-frame and our TS44 extrusions.

This building wrap includes 22 panels, most are 20'w x 45' high. The corner is one graphic panel wrapped on both facades, the multi-frame junctions create a seamless graphic that wraps the majority of a city block.

The seamless appearance was a critical requirement for this project, the TS44 and Dodge-Chrome's experience and expertise made it possible to achieve.!

## **Extrusions Product Family**

We offer a complete solution for building custom indoor and outdoor frames, that tightly stretch banners.

You will be able to fabricate custom signs of any sizes, any shapes and even structures to answer your customers' requests...

[Get a Free Quote Today!](#)
