

## Dec. Report 2017

Street Dept. has pretty well finished with clearing and repairing alleys. They have swept the streets of leaves, some places more than once. With the weather change it will be time to winterize the sweeper before long. Then have done some needed repairs to the office and shop doors and painted them, and have made some improvements to the curtain enclosing the mechanic part of the shop, (added doors for easy access form the shop side). The motor pool has been working on a number of projects, including putting in a new camshaft and lifters in the 2012 police car

The Trash Dept. Had a minor setback last week with one truck out of service for a short time, thanks to Jason in the motor pool it was up and running in short order with little time loss.

The Sewer Dept. has had smooth sailing as of late, with only one minor mishap, a line on East first needed to be rodded. The airport has had people riding 4 wheelers on their property. The intruders entered via the west fence, so we will fix or block the spots they are coming through with what little wire there is left and post keep out and or no trespassing signs in hopes of preventing any more intrusions.
