TestOut Pro Certification Exams

Performance exams that show what you can do in addition to what you know

Pro Certifications

After many years of collaboration with instructors, schools and academic institutions, TestOut developed the Pro Certification series of exams to address the barriers students face in obtaining a professional IT certification. These exams are entirely performance based, and use TestOut's award winning simulation technology to assess an individual's ability to perform real-world tasks in today's demanding IT environments.

As you start the new semester plan ahead to include the TestOut Pro certification exams as part of your end-of-semester assessments. TestOut developed these certification exams to help students and instructors address:

- **Cost** - FREE. The cost for the Pro exams are included with their respective LabSim courses, unlike other IT Certification exams which can cost as much as $300.
- **Travel** - Testing is administered through the class. No need to travel to an off-site testing center.
- **Skills** - The Pro certifications prove what they can do, in addition to what they know. Our performance-based exams showcase working skills for future employers.
- **Preparation** - LabSim courses prepare students thoroughly for the Pro certifications. Your students will have the confidence they need to pass the exam.
- **Reports!** - Unlike other certification exams where the instructor receives no feedback, TestOut's Pro certifications provide detailed reports on how the students performed, in addition to reports that compare your students' scores to your other classes, your school, your state, and the national averages.

At TestOut, we have removed all the barriers that stand between the student and a professional certification. To learn more about TestOut's PC Pro, Network Pro or Security Pro certifications please visit: www.testout.com

Certification Exams

- TestOut PC Pro
- TestOut Network Pro
- TestOut Security Pro

  Coming Titles

- TestOut Linux Pro
- TestOut Windows Client Pro
- TestOut Windows Server I&C Pro
- TestOut Windows Server M&A Pro

LabSim Training For TestOut Pro Certifications and other IT Industry Certifications

Over the past 22 years, TestOut has developed a training methodology that suits every learning style and allows maximum engagement and retention. Our goal is to help instructors train their students, get them certified and gainfully employed. The experience and knowledge your students will learn with LabSim will give them the skills and confidence to be successful in todays demanding IT careers.

Improve Learning Outcomes with Advanced Simulations
Hands-on lab simulations give students real-world experience performing critical tasks while reducing costs associated with running a physical lab. Our complex and industry-leading labs simulate a $30,000 hardware, software, and networking lab. Your students will be able to configure hardware, install drivers, manage operating system settings, and configure network devices, all within their browser.

Enhance Your Teaching with Video Instructions
Enhance your teaching with lecture and whiteboard discussion videos from industry experts that explain foundational concepts and demonstrate the proper way to complete each task. In addition to that, your students will have access to text summaries which highlight key learning points for each lesson.

Build Smart Custom Exams
Our Custom Exam Builder allows you to effortlessly build exams, quizzes, midterms, and finals from our extensive bank of exam questions and labs without having to write your own questions.

Measure Student Progress
Measure student progress towards certification exam objectives with our robust assessment tools and reports. Gain insight into student's overall progress, time spent in the course, and how they scored on lab activities and exams. All student progress and scores are conveniently gathered for you automatically in real-time.

Get Your Students Certified
LabSim is a complete, end-to-end solution to fully prepare your students for industry certification exams. Not only will they be prepared for the vendor and association fact-based exams, they will also be prepared for TestOut Pro Certification exams that measure what they can do, not just what they have memorized.
