

The Harrodsburg Municipal Water Department violated one of more drinking water standards over the past year. The Notice of Violation was issued in 2009 for failing to sample for Volatile Organic Compounds. You are being notified of this violation because the lake Village Water Association purchases water from Harrodsburg Municipal Water Department.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Our water system violated one or more drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations. Further, notwithstanding other forms of notification of these violations, we are required to summarize them in the annual water quality report to our customers.

MONITORING REQUIREMENTS NOT MET FOR HARRODSBURG MUNICIPAL WATER DEPARTMENT

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2009 we did not monitor or test for VOC's and therefore cannot be sure of the quality of our drinking water during that time.

While we cannot be certain of the presence or absence of any VOC's at any time during 2009, we can report that, historically, our VOC results have been below detection levels or below MCL's. Additionally, analysis of VOC samples collected on March 18, 2008 and March 3, 2010 indicate that all of those samples were BDL (below detection levels).

What should I do?

This is not an emergency. There is nothing you need do at this time. You do not need to use an alternate (e.g. bottled, etc.) water supply.

The table below lists the contaminants we did not properly test for during the last year, how often we are supposed to sample for these contaminants, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When Samples Should Have Been Taken	When Samples Were Taken
VOC's ¹	Once Annually	0	Jan-Dec 2009	Mar 2010

The VOC collection date was missed during a review of our annual sampling schedule. The review of the sampling schedule, in addition to being monitored by our contract laboratory, has been expanded to the responsibility of multiple individuals in order to avoid missing sampling requirements in the future. Currently required VOC samples have already been collected (March 3, 2010).

¹VOC's, also known as volatile organic compounds, are tested by collecting one sample and testing that sample for all of the VOC's. VOC's are commonly used in industrial and manufacturing processes. VOC's include: 1,1,1-Trichloroethane, 1,1,2-Trichloroethane, 1,1-Dichloroethylene, 1,2,4-Trichlorobenzene, 1,2-Dichloroethane, 1,2-Dichloropropane, Benzene, Carbon tetrachloride, Chlorobenzene, cis-1,2-Dichloroethylene, Dichloromethane, Ethylbenzene, o-Dichlorobenzene, p-Dichlorobenzene, Styrene, Tetrachloroethylene, Toluene, trans-1,2-Dichloroethylene, Trichloroethylene, Vinyl chloride, and Xylene.

For more information, contact Walter Bottoms or Kenny Hooper at 859-748-5198 or by mail at 208 S. Main Street, Harrodsburg, Ky 40330

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

SUMMARY OF CALENDAR YEAR 2009 VIOLATIONS

HARRODSBURG MUNICIPAL WATER DEPARTMENT FAILED TO MONITOR FOR VOC's IN 2009

During 2009 we did not monitor or test for VOC's and therefore cannot be sure of the quality of our drinking water during that time. Detailed information about this Monitoring Violation is listed under the heading at the top of this page.
