**Victoria, the face of Victoria's Law, has passed away. She had a genetic condition that she passed on to hundreds of puppies in a puppy mill. Those pups were sold at pet stores and/or websites and flea markets to people who didn't realize they were purchasing a carelessly bred dog. One that would make puppies that would not be able to live a full long life with mobility.**

**Please call your state senators and reps. In honor of Victoria, ask them to support Victoria's Law - making it illegal to sell puppies kittens and rabbits in pet stores, for markets, and roadside stands.**

**It will not do anything at all to real, reputable breeders.**
