

## LEANwRIGHT, Inc. Testimonials

### **Chad Dale, SVP, COO (OrthoClinical Diagnostics):**

Jerry is different than most consultants in that he has an amazing ability to work with employees from all skillsets and motivate even the most pessimistic employee to achieve a challenging goal. He embraces the true essence of collaborative teamwork to achieve a common goal, and his positive approach to problem solving enables success throughout an organization. My experience working with Jerry has always been very positive. He puts in the time to ensure everyone is aligned to the targets established at the start of each day/project and works diligently to often exceed expectations. He truly makes memorable impacts in the projects that he is a part of.

### **Bianca Lewis, Sales Operations Trainer (DJO, Inc.):**

I probably never got a chance to really tell you how much of an impression you made on me. I also loved the lean classes you presented. They were awesome and really broke Lean way down to everyday life. I think I talk about you to new hires at least once a week. You were one of my mentors without even realizing it. Thank you for starting me on my Lean journey!

### **Matthew Cook, COO (The Keefe Group/Keefe Supply Co):**

Results and creditability-Jerry has driven results in several diverse environments from service businesses to distribution and manufacturing environments. Jerry's background brings instant credibility since he has built lean transformation programs from scratch to salvaging them when they have gone off the rails. Jerry drives results at every stage of a lean journey. In addition to Jerry's deep domain knowledge, he is exceptionally approachable. Both a teacher and coach, he is able to craft his message to make the maximum impact for his audience. His strengths allow him to effectively communicate to line level employees and to senior executives.

### **Larry Herrmann, IT Services Manager (formerly w/GIA):**

Jerry is different than many other process improvement leaders I have worked with. Jerry walks the walk each and every day, in everything I've seen him do. I had the pleasure to work with Jerry during Kaizen events simple and complex and he always applies the same methodology. It was always a pleasure working with Jerry. He was always patient, professional and willing to mentor anyone who asked. I learned a great deal from working alongside Jerry on multiple Kaizen events. His experience, industry contacts and personality make him a top leader in the field.

### **Maya Gowri, LSS Master Black Belt (Illumina):**

Upon enrolling in the Lean Enterprise Certification program which Jerry instructed, I knew nothing of Lean or Manufacturing. While his technical knowledge from his years of experience was very apparent, it was his remarkable ability to convey the material in an easily understandable way that makes him a phenomenal teacher. He is very approachable and has a great personality that helps him connect with people easily. Jerry is a Lean expert who has many years of experience in Lean business transformation and operations. He was instrumental in me pursuing a career in manufacturing. Since the Lean class, he has become an important mentor to me and is always available when I need advice for my continuous improvement journey for which I am very grateful.
