

Hello everyone and welcome to the 2nd EpiCoN meeting.

Here are some information for our next meeting on Tuesday December 8th.

General structure

The main aim of this meeting, apart from revisiting scientific achievements, is to have more directed presentations describing the contribution of each group to the overall concept of EpiCoN. We are hoping that this will improve potential research and identify any probable barriers. May this be a guide to a brighter future.

Group leaders

Jan, Per and Yuri; You are the core members and the beating heart of EpiCoN! In this meeting you will get 30 minutes in total to explain how your groups are contributing to the overall concept of EpiCoN. This is your time and together you can decide how you want to distribute it between yourselves. You are expected to depict how your groups are linked together under the EpiCoNbrella!!

Postdocs

You have 10 minutes each to present your scientific plans, achievement and thoughts in your research. You are expected to design your presentation in a format that you cover the four points listed below. There will be 5 minutes for questions from audience after each talk.

Points for postdocs:

1. A brief introduction to your research.
2. How your work is related to our epigenetics consortium aka EpiCoN?
3. What are the scientific questions that you are trying to address? And what are your achievements so far?
4. How would you design your experiments or how would you proceed in your research if you had unlimited access to modern resources such as lab equipment, computing power source, etc.

Schedule

Time	Title	Speaker
14:00 – 14:30	Overview of projects	Jan, Per, Yuri
14:45 – 14:55	Evolution of Dosage compensation	Anna-Mia
15:00 – 15:10	Small molecule – global epigenetic changes. What else?	Tanya
15:15 – 15:25	Do Hi-C high number of contacts correlate with histone modifications	Haitham
15:30 – 15:40	POF in Drosophila male germline	Masha
15:45 – 15:58	F I K A	
16:00 – 16:10	Anatomy of a PRC1 targeting element in the Human genome	Sarina
16:15 – 16:25	Hierarchical three dimensional organization of genome	Rajendra
16:30 – 16:40	Role of chromatin insulators in structural and functional genome organization	Misha
16:45 – 16:55	Transcripts which recruit POF to the female X-chromosome	Samaneh
17:00 – 17:10	Polycomb Repressive Complexes	Juan
17:25	Leaving department to downtown	
17:45 – 18:55	Playing Bowling at O'Learys	
19:00	Dinner at O'Learys	

Place: Uracil

Cheers,

2nd EpiCoN meeting organizers,

Aman, Masha, Sarina,

Participants

Jan Larsson, Yuri Schwartz, Per Stenberg, Anna-Mia Johansson, Tatiana Kan, Haitham Sobhy, Maria Kim, Sarina Cameron, Rajendra Kumar, Mikhail Savitsky, Samaneh Tousi, Juan Barrasa, Henrik Lindehell, Marie-Line Faucillion, Aman Zare, Eshagh Esfahani, Inge van Vilsteren, Jacob Lewerentz
