Disclaimer

No representation is being made that any account will or is likely to achieve profits or losses. There is a risk of loss in all forms of trading. Futures trading has large potential rewards but also large potential risk. You must be aware of the risks and be willing to accept them in order to trade in the futures market. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to buy/sell futures. This room is for educational purposes only and suggest trading using a simulator account while learning the setups that are mentioned in this room. It is up to you to use this knowledge. Consult a licensed professional about your individual trading. The past performance of any trading system or methodology is not necessarily indicative of future results.

We will start promptly at 7PM

http://www.easyeminitrade.com

Slinky & Using a Larger Chart To Filter

Reference Areas I like marked on my charts

- The PP of Floor Trader Pivots on the NQ (all pivots and mid points on all other instruments)
- Previous days H-L-C (using Globex hours 6pm est start and 5pm est end)
- 50% Fibonacci retracement (regular trading hours & Globex 6pm est open and 5pm est close.)
- 200 EMA & 90 EMA
- Major support and resistance areas and congestion areas created intraday

You can trade this set up on anything

- I prefer Futures NQ, 6e, CL, ES but you can trade this set up on any market that you like including equities.
- You can trade this set up off any type chart you prefer and any time, tick or range size that you like. The larger the chart the less noise and the larger the stop you are going to need.
- NQ 633 tick / 1597 tick / 4 tick Renko, 4 8 Range (4 entry and 8 filter)
 CL 577 tick / 1000 tick/ 4 tick Renko, 4 8 Range
 6e (I trade this premarket) 3 8 Range
- ES 633 tick / 1597 tick / 4 tick Renko, 3- 6 Range

Whatever market and chart size you decide to try this on I ask that you test it first.

<u>Super Trend Stop Settings – for entry chart</u>

Place the Super Trend Stop on your entry chart

 <u>Range Charts</u> – Small range charts I use 3,3,3 settings on Super Trend Stop

<u>Renko Charts</u> – 4 - 8 Tick Renko
 Settings on the Super Trend Stop 3,3,3

 Larger Range Charts or Tick Charts or time based charts use 2,3,3 settings

If you don't have this indicator look in your forums or use ATR Trailing Stop Study Settings: SuperTrend Stop (ID:22)

The E-Book package includes:

- My ebook of high probability set ups that are traded in the room each day with free ebook updates whenever a revision is made
- 3 day trial to the education/chatroom this will help you identify the set ups real time and ask me questions during the live market
- Unlimited access to my library of all my full length Webinar recordings; there are more than 50 in total each running over an hour. (you will not need to watch them all, once you purchase the package I will direct you on which ones to start with.
- Workspace template downloads for Sierra & Ninja you can easily set up your charts by following the ebook / Webinar recordings
- Sample Trading Plan
- Trade recording & tracking sheets and Webinar Recording showing you how to track and record your trades for better trading results
