

Student Data and School Service Providers

The availability of technology coupled with the rapid development and progress of digital applications and tools provides an opportunity to transform classroom instruction. It also introduces new challenges and concerns about the safety and security of student information. Colorado Military Academy understands the importance of keeping student data private and secure and takes its responsibility to protect student information very seriously. Managing student data privacy and security is an ongoing and dynamic process that requires regular review and revision.

The following is a list of Providers who partner with CMA, along with a short description of the type of data shared and links to providers' Terms of Service and Privacy Policies.

Note: CMA also uses Google's Classroom, G-Suite services and other Google products available to the general public. The student files that are stored on Google Drive are in an area covered by a special agreement with Google that provides the same high levels of security required for HIPAA compliancy to protect employee data.
