

CORONA BOREALIS NOVA T CrB

SIGNALS OF THE BLAZING STAR - DEBUT OF THE ANTICHRIST

The following is the Approximate Depiction of the Nova Event that will cause the Giant Red Dwarf and the T Corona Borealis White Dwarf to ignite and cause a 'Flash'. This Nova keeps the White Dwarf intact and why it is not a Super-Nova. The T CrB White Dwarf is situated in the Constellation in-between Hercules and Perseus, some 3000 Light Years from Earth. This Nova is called the 'Blazing Star' for this repeating Cycle of Flashes and Brightness. However, it is not 'Birthing' or creating a New Star as would a Super-Nova. Astronomers predict with a 90% Probability that the next Flash from T CrB will occur in September of 2024.

In the Luciferian Freemason Ethos, the Columbia Statue atop the Capital Building is a Depiction of the Star of Sirius. Then the Blazing Star is a veiled Motif of Lucifer, the Light Bearer whose 2 Pillars represent Hercules and Perseus.

GENESIS 3:15
1st Prophecy

WAR OF THE SEEDS

The possible Prophetic Inference one can surmise is that the Symbology is very pertinent to the Debut of the Biblical AntiChrist. How so? Consider that as Jesus had a Star appear, many End Time Students of Prophecy are also looking for a corresponding Star. This could fit the Depiction as it occurs int-between Hercules and Perseus.

These are 2 Legends of how Hercules was a Nephilim, or Angel God-Human Hybrid. Perseus is the Rescuer of Andromeda, the Chained Woman and in this prophetic Scenario, it is the AntiChrist Usurper that is to come and 'Rescue' Israel from Trouble. Fore striking is the Complete Celestial Context that at the Centerpiece is Ophiuchus, the Serpent Bearer. It is a through-back to the Geneses 3:15 War of the Seeds.
