

Red Hawk Lodge Unifying Purpose

Our Unifying Purpose is networking with people who desire to live in harmony with Earth. This will be done by mentoring like-minded people who are interested in learning skills which enable doing so. We use a system of Guilds and a giving economy in this work. Our Guilds are smaller groups who work together to provide particular services or goods toward meeting the needs of the people. A giving economy is one in which people freely share of their skills and products for the benefit of all in the community. We choose to share as a non-public, word of mouth support system allowing smaller groups to develop intimacy and trust. We will demonstrate the ability to live in abundance with little money.
