

Thank you for your interest in our Labs. We truly appreciate hearing more about your pet experience and learning about your family life.

We just bred out black girl, Millie to a handsome chocolate male owned by a fellow breeder in NH. This litter will be all black puppies since Millie is a full black.

We expect babies to be born around September 28th and ready to go to new homes right around Thanksgiving. Puppies are born in my office (I work from home) and get lots of attention and cuddling from me, my family, my grandkids and my employees. We also have 3 cats in our home. We also have a home on Lake Winnisquam so weather permitting they get some swimming exposure.

Puppies are \$2200. They are wormed several times, have their first shots, have a full vet exam and 2 year health guarantee. Puppies are sold with limited AKC registrations, Millie and the sire have had hip, eye, elbow, cardiac, EIC and PRA clearances. It is very important in our breeding program to produce healthy, well socialized puppies.

I have buyers visit several times before puppy selections. Usually the first visit is around 4 – 5 weeks of age. Buyers select in the order of deposit.

I ask all potential buyers to fill out a puppy questionnaire. If you are interested in meeting with us, please fill out the questionnaire and we will arrange a visit.
