

## “The cancer cure”

By healthwyse.com

Starving someone to death passes for humane treatment in the United States and is always preferable to trying alternatives to cancer treatments.

“Those who knew the least obey the best” George Faruqur

### Genesis of an epidemic

Cancer is a normal part of life. The healthy immune system eliminates cancer cells at the same rate they are created. Tiny outbreaks of cancer have existed since ancient times. It was discovered in Roman and Egyptian remains having high lead levels.

Before the 20<sup>th</sup> century, cancer was so uncommon that it was a medical oddity. After the industrial revolution of the early 20<sup>th</sup> century, humans were exposed to thousands of new toxins, including petrochemicals, fluoride, chlorine and radiation, plastics came later.

The onslaught to our mean system was compounded by a new generation of chemically engineered fertilizers that have depleted our soils of vital nutrients.

Many of the industrialized world, especially Americans, does not realize that they are chronically malnourished. Obesity has exploded because people are in a state of semi-starvation regardless of how much they eat, which in turn stimulates poor eating habits, which now snowballs the nutritional problems further.

“The alarming fact is that foods (fruits, vegetables and grains) now being raised on millions of acres of land that no longer contain enough certain minerals, are starving us no matter how much of them we eat. United States Senate document number 264” .

Radiation exposure, malnutrition and toxicity combined to create a condition called “acidosis”, which is the silent stage; number one of cancer, more about this will come later.

“Chlorine is the greatestcrippler and killer of modern times. While it prevented epidemics of one disease, it was creating another. Two decades ago, after the start of chlorination of our drinking water in 1904, the present epidemic of heart trouble, cancer and senility began. “ Dr. Joseph M. Price, M.D.

“If fluoride gets into the river, it’s a pollutant. If it gets into a lake it’s a pollutant. But if it goes right into your drinking water system that’s not a pollutant? That’s amazing!” Dr. J. William Hirzy, EPA.

“According to the handbook of toxicology of commercial products, fluoride is more poisonous than lead and just slightly less poisonous than arsenic. It is a cumulative poison that accumulates in the bones over the years.” Dr. Michael Schachet, M.D.

“Epidemiology research in the mid-1970s by the late Dr. Dean Burke, head of cytochemistry division of the National Cancer Institute, indicated that 10,000 or more fluoridation linked cancer deaths occur yearly in the United States. In 1989, the ability of fluoride to transform normal cells into cancer cells was confirmed by Argonne national laboratories. “ Dr. Michael Schachter, M.D

The chemical companies are finding innovative ways to poison every day. There are thousands of poisonous combinations and foods. Here are just a couple of the thousands of examples.

You probably suspect that a normal steak would increase your chance of getting cancer, because it is “red meat” after all. This belief is due to a chemical con job.

The meat itself, in its natural form, is harmless the cancers are actually caused by the sodium nitrate and potassium nitrate that are added to “red meats” by the food and chemical industries. This has been scientifically validated dozens of times don’t expect to hear about it from your doctor. Organic foods are never used by the food industry or chemical industry in relevant studies because the results are always damning take for example the case of eggs. Organic range fed chickens produce eggs that do not adversely affect cholesterol. In the study that it originally maligned eggs, powdered eggs were used from chickens that were factory farmed.

This is how the data shopped to get the right scientific results that “they” wanted from the beginning. They want us to believe that we are somehow being sickened by natural foods which were never a problem during the previous 9000 years, instead of realizing it is their poison sickening us. They have been succeeding. Chickens are plumper than any organic chicken that you will ever find in for a good reason. This is because it is fed arsenic from the time it was born like most US chickens.

Poisoning the chickens causes them to become unnaturally obese regardless of their eating habits, so that they will command a higher selling price. This detestable practice was an FDA approved in 1944 and is considered “normal” are you getting your daily recommended dosage of arsenic? If any of this upset your stomach there’s always radioactive Pepto-Bismol, business is always radioactive.

### The carnage

When doctors went on strike in Israel in 1983 and again in the year 2000 the mortality rate fell approximately 50%.

In 1976, the number of deaths fell by 18% in Los Angeles, when LA doctors went on strike for merely one month. The pattern has been mirrored in five other major doctor strikes around the world. The number of deaths from pharmaceuticals and cancer treatments every year outnumber the deaths for all wars in all US history. According to the most recently released U.S. Census data as of 2005 cancer is the second leading cause of death in the United States, just slightly ahead of pharmaceutical reactions.

Preindustrial in modern cancer rates: one in 25 people died of cancer in the year 1900. Now about one in four people die of cancer, in most cases, actually death by medicine. 41% of Americans will eventually be diagnosed with cancer. Virtually all Americans have a condition known as acidosis.

Chemotherapy and radiation are purportedly the most scientific methods of cancer treatment. Yet the numbers do not jive. On average chemotherapy and radiation treatments are only effective for to 5% of the time for long-term recovery. Yet they are poisonous 100% of the time.

The phrase successful treatment has been redefined by oncologists and the medical literature to mean having no tumors, (without regard to cancers) for a mere five years, and they continue counting patients as survivors even when they die in six years, in order to cook the numbers about their cure rates.

This is one of the ways science is manipulated to render the right drug numbers.

“My studies have proven conclusively that untreated cancer victims actually live up to four times longer than treated individuals. For a typical type of cancer, people who refused treatment lived for an average of 12 ½ years longer. Those who accepted surgery or other kinds of treatment such as chemotherapy radiation or cobalt lived an average of only three years” Dr. Harden Jones, physiology University of California Berkeley.

Children who are successfully treated for Hodgkin’s disease are 18 times more likely to later develop secondary malignant tumors. The risks of leukemia increase markedly for years after the ending of successful treatments, and reached a plateau after 14 years, but the risks of developing solid tumors remained high and approach 30% at 30 years. New England Journal of Medicine.

The secondary cancers that are caused by the treatments are deadlier and much more effect than the original cancers.

All nuclear and chemotherapy treatments are known to cause and spread cancers. These are flippantly referred to as “known side effects” cancer screenings do the same, by likewise exposing victims to radiation and various industrial poisons. This is why breast cancer rates explode with expansive mammography testing.

Iatrogenic deaths (deaths caused by doctors) is the third leading cause of death in the United States according to the medical establishment’s own statistics. Death by Dr. is so normal that they had actually coined a word for it; “iatrogenic”.

Girls who undergo chemotherapy and radiation treatment space at 35% chance of developing breast cancer by the time they are 40, which is 75 times greater than average. Mammogram radiation also produces cancers, especially in the breast area.

“A study of over 10,000 patients shows clearly that key most supposedly strong track record with Hodgkin’s disease lymphoma is actually a lie. Patients who underwent chemo were 14 times more likely to develop leukemia and six times more likely to develop cancers of the bones, joints and soft tissues than those patients who did not undergo chemotherapy.” Dr. John diamond M.D.

“Chemo brain” is a term using chemotherapy that means becoming permanently challenged. This means that the medical establishment now has a multitude of drugs that you can purchase for the rest of your life to treat and manage your new mental handicaps. (Intelligence, concentration, memory and emotional stability graph)

“If a patient with a tumor is receiving radiation or chemotherapy, the only question that is asked is, “how is the tumor doing?” No one ever asks how the patient is doing. In my medical training, I remember well seeing patients who were getting radiation and/or chemotherapy. Tumor would get smaller and smaller, but the patient would get sicker and sicker. At autopsy we would hear, “isn’t that marvelous! The tumor is gone!” Yes, it was, but so was the patient.” Dr. Philip Benzel

Dr. Ewan Cameron and two-time Nobel Prize winner Linus Pauling did studies in Scotland (which were later duplicated by studies in Canada and Japan) comparing vitamin C therapy versus chemotherapy. Guess which before patients live longer on average and by how much.

The vitamin C patients lived an average of six times longer than the chemotherapy patients did; and of course, they also had of substantially better quality of life too.

The difference was due to the effect that vitamin C strengthens the immune system instead of weakening it further.

“As a chemist trained to interpret data, it is incomprehensible to me that physicians can ignore the clear evidence that chemotherapy does much, much more harm than good.” Alan Nixon PhD past president of the American chemical Society.

Chemo skin a.k.a. radiation recall “Survivors of lymphoma experienced 11 times the number of deaths expected from the general population, and although this rate declined over the years, it was still three times higher than expected 45 years after the original diagnosis.” Reuters news service

Whenever a cancer patient dies of sepsis, it is virtually always because chemotherapy destroyed the patient’s immune system, and thereby allowed sepsis to easily kill the patient. These are usually counted as “sepsis deaths”, instead of cancer deaths. It is another way that the medical community manipulates the statistics about the safety and effectiveness about chemotherapy and radiation.

The same time scientific chicanery is applied to fatal pneumonias, her failures, and diabetes cases that were actually caused by cancer drugs and radiation.

The petrochemical industry, and the medical community and their regulatory partners in government have convinced us that sunlight is a carcinogen. Sunlight produces vitamin D in the skin from cholesterol which removes excess cholesterol. More important is the vitamin D from sunlight and it reduces the risk of getting cancer over 70% including skin cancer.

People with greater sun exposure have higher rates of skin cancer because they use the most sunscreen. Sunscreen sometimes contain a photo-reactive ingredient that becomes carcinogenic when it asked exposed to light. Otherwise, they contain persistent carcinogens such as zinc oxide, titanium oxide, and aluminum hydrochloride.

The chemical companies created the problem so they could sell us their solution. The real solution is simply not to expose oneself to their poisons. Their propaganda in big media is so powerful that they now have us blaming our illnesses on the sun. Vitamin D said deficiency is common, which proves that most of us to not get enough sun exposure.

Skin cancer only became a major problem in the mid-20<sup>th</sup> century, after the advent of sunscreens, in much the same way that breast cancer became epidemic only after the and vent of mammography. Breast-feeding, not mammograms is the surest way to prevent breast cancers. In fact breast cancer was known as a disease known as, “the nuns disease”.

“It has been estimated that only 10 to 20% of all procedures currently used in the medical practice have been shown to be efficacious by controlled trial.” The Office of Technology Assessment health program,  
..

the permanent lifetime average cure rate (not the mere five years of tumor remission that they used to cook the numbers) is only about 4%.

Therefore with poisonous “conventional therapies”, there is approximately a 96% chance that cancer will eventually kill you, or more likely, the treatments will.

#### The system

“You wouldn’t believe how many FDA officials or relatives or acquaintances of the FDA officials come to see me as patients in Hanover. You wouldn’t believe this. Or directors of the AMA, or ACA or the presidents of orthodox cancer institutes.” Hans Nieper MD alternative medicine practitioner

“The bottom line is that the medical systems are controlled by financiers in order to serve the financiers. Since you cannot serve people homeless they get sick, the whole medical system is designed to make people sicker and sicker.” Dr. Guylain Lanctot, M.D. author of “the medical Mafia: how to get out of it alive and take back our health and wealth’

The farm of brainwashing begins early. The advertisement recommends the use of Ritalin for a tired mother syndrome before ADD was discovered as a way to save lagging Ritalin sales. Title of the ad is Ritalin sparks energy. In past times, various children’s cartoon depicted vegetables is a method to increase strength and superpowers. Special powers like strength or a means to defend oneself or others, not as a means unto itself. Cartoon and game characters avoided poisons, explosives and radiation. These things were the weapons of the bad guys and still are, but by the way. In modern children’s entertainment chemicals and radiation provide superpowers such as the hulk. Morals pertaining to character and health are long gone.

The more chemicals, especially radioactive chemicals the better. Now the nuclear industry and the petrochemical industry are the sources of amoral powers and genetic mutations are also considered to be a great thing, in order to promote Biotech two. See the pattern? Spiderman , the X-Men, the fantastic four, Jimmy neutron, and of course, for when they get older... The FDA.

Understanding the corrupt system requires a study of the US FDA and partners and its unsavory history.

“He who controls the past controls the future. He who controls the present controls the past.” George Orwell’s “1984”

The FDA began life as a division of chemistry, and was later known as the Bureau of chemistry, long before changing its name to the FDA. It’s name was changed to conceal its chemical industry agenda. It has always provided a type of legal immunity for companies that put chemicals into foods and to pharmaceutical companies via “its approvals” which leave citizens without legal recourse against the chemical industry.

The original Canvas of the Bureau of chemistry, in 1909 who later became the FDA: it’s true job was and is to “approve” and sanctioned products from the chemical industry and thereby illegally shield the chemical industry from us by declaring what is “safe”.

They routinely privately gather data to share with other chemical industry partners to mitigate liability. For example, contamination information that they hide from the public. These are “P.R. issues”.

Good luck winning a case in the US court against a billion-dollar chemical company whose products are FDA approved and are given as generally recognized as safe harbor status. These shield and chemical companies give them plausible deniability.

The modern FDA came into being in 1913, the same year that the Rockefeller foundation was created. The FDA works hand-in-hand with the Rockefeller foundation and the American Medical Association. The Rockefeller foundation was founded in 1913, with its main emphasis upon medicine and medical education.

The initial Rockefeller medical school donations totaled over \$550 million. In 1920 alone the Rockefeller foundation gave money to 18 medical schools across 14 countries. Its partners at the FDA began an aggressive campaign of suppressing medicines that competed with the chemical industry.

“I will never have and never will approve a new drug to an individual, but only to a large pharmaceutical company with unlimited finances.” Dr. Richard J Kraut director of the FDA’s Bureau of drugs Spotlight January 18, 1982.

Suppressed were the natural medicines that their industry could not legally control and monopolize with drug chemical patents. Natural substances can never be patented. This is why every natural and non-toxic therapy is automatically called “quackery” by the FDA, the chemical industry, and the medical establishment.

Only unnatural non-organic and toxic chemicals may be patented, and thus non-toxic medicines are a threat to the business of medicine.

“The FDA protects the big drug companies and is subsequently rewarded and using the government’s police powers, they attack those who threaten the big drug companies. People think that the FDA’s protecting them. It isn’t. What is the FDA doing and what the public thinks it is doing are as different as night and day.” Dr. Herbert Ley, former Commissioner of the FDA

“In 1919 \$5 million Rockefeller foundation gift to certain Canadian medical schools help bring Canadian medical education into the 20<sup>th</sup> century.” McGill University press

Medicine was not the lucrative market as it is today, so medical schools were begging for the Rockefeller grants that were being handed out to compliant schools. Compliance to the Rockefeller stipulations `drugs and trashing entire libraries of past procedures.

What happened was a preamble to book burnings elsewhere and in some cases, the FDA is indeed did have book burnings. Those were dangerous times for traditional naturalpathic doctors. All dissenters who embrace the old time tested holistic and natural path of methodologies of healing would henceforth be demonized as “quacks” in formal medical training.

That was despite some of those “quacks” having Nobel prizes in medicine and vastly superior results. It was a carrot and a stick strategy.

Compliant schools were given the carrot, Rockefeller money.

Competing doctors got the stick FDA police actions. Some doctors died in prison for having cured patients with unapproved medicine.

It's still happening and stores selling organic foods and certain cancer killing vitamins or even raw milk. It's not just doctors with tears anymore. Curing is illegal by the way since no cures are ever "approved".

Tutors being freedom from chemical dependence: freedom from them. An unholy alliance formed between the American Medical Association, the FDA and the Rockefeller foundation.

To ensure compliance for medical schools Rockefeller foundation frequently insisted that Medical Schools Pl., Rockefeller employees on their boards of directors.

"The general education board of the Rockefeller foundation, also approached in 1914, pledged \$500,000 on the condition that the University raise \$1.5 million by January 1, 1916 and paid clinical faculty allopathic doctors only, on a full-time basis. With the Brady money in the hope of GEB funding the Gale Corporation and the hospital signed an affiliation contract with the hospital before the deadline of July 1, 1914. Yale University medical school website.

The new legally enforceable medical monopoly paralleled the past Rockefeller monopoly from the petrol at chemical industry of times past. Instead of owning all petroleum the Rockefeller Empire now controlled virtually all medicine. He only lien share of the chemical industry, which would later be called the "pharmaceutical" industry.

Once again, it was check and checkmate against the American people. The ramifications would be felt worldwide. Throughout his life, John D Rockefeller Senior refused to take his own medicine. He used traditional holistic medicines for his own health. Alongside many of his friends at the FDA and the AMA, after the hijack of the medical schools the true carnage of polio, heart disease and cancer exploded.

"I had a brain cancer specialists it in my living room and tell me that he would never take radiation if he had a brain tumor, and I asked him, "but you do you send people for radiation?" And he said, "of course, I'd be drummed out of the hospital if I didn't." Dr. Ralph Moss PhD

90% of oncologists would never take radiation for lung cancer.

84% would never take chemotherapy for colon cancer.

Harvard study published in the US national Institute of health;"oncologists very in their willingness to undertake anticancer therapies"

The gift from big Pharma that starts in medical school, and only gets bigger throughout the student's career. (Kickbacks)

doctors in other specialties simply write prescriptions, but oncologists or cancer doctors make most of their income buying drugs wholesale and selling them to the patient's at exorbitant prices. They tell patients that they'll die without them. NBC nightly news story cancer docs profit from chemotherapy drugs"

"Most cancer patients in this country die of chemotherapy. Chemotherapy does not eliminate breast, colon or lung cancers. This fact is been documented for over a decade. Yet Dr. still use chemotherapy for these tumors. Women with breast cancers are likely to die faster with chemo than without it." Dr. Alan Levine, M.D.

"The American Cancer Society tried to ruin my research foundation." Albert Szent-Gyorgyi PhD discover of vitamin C, winner of the 1937 Nobel Prize for medicine.

Guess when this organization was founded by home the American Cancer Society: it was founded by John D Rockefeller Junior in the magic year of 1913, while donating at Harvard University.

Do you believe that they will someday announce a cure and cut themselves off from the truckloads of money? A better question would be why vitamin C was a threat to their mission?

We are led to believe that the “miracles” of modern medicine are superior than traditional herbal medicines. What they don’t mention is that between 50% and 75% of the chemotherapy drugs include ingredients from those, “weeds”. They include organic compounds and are the reasons why drugs are sometimes effective.

According to the U.S. Census, cancer is the second largest killer in the United States, but most of those people die from the treatments, not the cancers. Pharmaceutical drugs are the fourth largest killer. The US has the most dangerous, and yet the most expensive medicine system in the world. It causes 60% of all US bankruptcies.

“There is not one, but many cures available. But they are all being systematically suppressed by the ASC and the NCI and the majority of oncology centers, they have too much of an interest in the status quo.”  
Dr. Robert Atkins MD creator of the Atkins diet

#### Curing cancer despite the establishment

*The cures aside and in this movie and/or literature provide no guarantees for any particular person or situation, that the odds of living a long and healthy life with quality and dignity are greater with every one of these methods done with modern orthodox therapies. The Orthodox all-wheel patent medicine for cancer is most often a bankrupting death sentence.*

First and foremost cancer is not an outbreak of tumors. We know that the establishments treats them as the same, but it would be a waste of time and space to go there.

#### Meet Dr. Otto Warburg one of the most important unknown men who ever lived.

Remember Dr. Otto Warburg: in 1931, Dr. Warburg was awarded the Nobel Prize for medicine. Since then, his discoveries have been suppressed by the medical establishment so successfully that only alternative medicine researchers ever learn of them, or of him.

His Nobel Prize was awarded for finding the root cause and survival mechanism of cancer cells. Then the media and the medical journalists censored his research.

It is unlikely that Warburg’s discoveries, which are among mankind’s greatest accomplishment, are topics you were to fight about. They are not even mentioned in the medical schools, except in a mocking and cursory fashion.

Dr. Warburg discovered that cancer cells only thrive in the absence of oxygen, whereas normal cells require oxygen. He found that oxygen exposure actually has a poisoning effect upon cancer cells. He realized that mutated cancer cells do not derive their energy from respiration, but instead from a fermentation process that draws upon blood sugars.

Warburg further notice that bodies with a low pH (acidic bodies) were more cancerous, because of having a low pH, meant having a high resistance to oxygen absorption.

People having a high pH (greater than 7.4) never got cancers and always had high oxygen levels in their blood.

All cancers in absolutely every category, rapidly die when the body's pH goes beyond 8.5. Most other pathogens die too.

Cancer patients routinely have a pH between four and five, and about one half the oxygen in their blood. Cancer is not compatible with a healthy pH environment that is full of oxygen. Take example that cancer of the heart is virtually nonexistent, because blood flowing from the lungs into the heart are at the highest pH and oxygen levels of the entire body.

Healthy individuals have a blood oxygen level between 98 and 100, as measured by a **pulse oximeter**, but cancer patients routinely show around 60. Oxygen is replaced in a cancer patient's blood with wastes, such as carbon dioxide, compounding the toxicity and oxygen starvation, which in turn compounds the acidity and the avalanche effect.

"In 1964, only one person in 214 contracted cancer. Today it is one of three females and one and two males. The determining factor between the health and diseases pH. It is not uncommon for the average American to test between four pH and five pH. "Keiichi Morshita, author, "the hidden truths of cancer"

Upon these findings, Dr. Warburg based his theory that cancers are actually a survival mechanism of the body. When oxygen levels drop too low (internal suffocation), the cells must mutate into cells that can survive from fermentation, to prevent entire regions of the body from dying. In other words, people would get sicker and die much sooner without cancer, which is merely a natural defense mechanism.

**It was also discovered, and repeatedly verified by multiple third-party studies that a person's overall pH is made more acidic (cancer-causing) by poor diet, heavy metal toxicity, overall toxicity, pharmaceuticals, emotional stress, dehydration, illness, low sea salt intake, mineral deficiencies, artificial oils, artificial fats, low-fat diets, refined sugars and refined carbohydrates.**

#### **The unholy trinity of cancer**

These studies have proven, just as the cancer industry's own statistics do, that chemotherapy perpetuates cancers, just as radiation does. Cutting into a tumor is the most dangerous therapy of all. Toxicity, radiation and acidosis are the unholy trinity of cancer it has been proven since 1931

This is why "preventative" all of traffic therapies, such as radioactive mammograms actually cause cancers. It is why the more "early detections", the more cancers there are "discovered". The cancer rates and deaths for women who completely form go mammograms is substantially lower.

Certain alternative therapies get 80 to 90% lifetime cures, using safe and inexpensive methods that work with the body, instead of against it. None of them require poisoning the patients, or making them radioactive. None of them can be patented, regulated or monopolized by the chemical industry.

**All effective cancer cures are illegal for any doctor to prescribe in the United States. Selling products per the purpose of curing is likewise illegal: since no cures had ever been "approved". They never will be. Even quoting studies about them is illegal for product manufacturers even when no studies are perfectly performed by orthodox medical establishment itself. Thus information about curing cancer is, for all practical purposes for big knowledge.**

### **Diet is important:**

*Most successful anticancer alternative therapies begin with diet and nutritional therapy, because ultimately, we really are what we eat. For him there, the various methodologies die voltage, but a common foundation for them is that anyone who is ingesting garbage cannot possibly hope to recover from a health crisis. Diet is generally the single most determinant of the body's pH; and therefore, of oxygen starvation. Acidosis is further exacerbated by a lack of critical mineral.*

Most cancer cures (not treatments for tumor symptoms) somehow involve adjusting the body's pH into the ideal alkaline state. In an alkaline state, human blood is rich in oxygen. Blood saturated with oxygen is typically poisonous to mutated cancer or fermenting cells. Oxygen is, of course, harmless to healthy cells and are properly newer stuff with antioxidants. This two points back to diet.

### **The cancer cure vitamin B-17 Laetrile**

"After presenting a rather effective lecture on vitamin B-17 and cancer, the windshield was shot out of my car on the road back in San Francisco. The next night the glass window in the tailgate was shot out 300 miles removed from the first shooting. The police said maybe someone is trying to tell you something." Ernst Krebs, B-17 discover

In 2007, bitter almonds (not regular almonds) were becoming a popular with alternative medicine due to their vitamin B-17 content. Health food store stop selling B-17 in the form of apricot seeds in 2002 due to armed FDA raids. The FDA openly banned apricot seeds, and the vitamin B-17 extract because it was successfully curing cancers as an "unapproved drug."

The British government suit followed suit into the very same thing during 2002. People in both countries were arrested and charged for merely selling organic apricot seeds, a carrier of B-17 also known as Laetrile.

"In a good report on Laetrile a.k.a. B-17 released by the center last June omitted some experiments that indicated that the drug might be an effective treatment for treating cancer there has been a cover-up." New York Times November 24, 1977

Bitter almonds were later discovered to be a higher source of vitamin B-17. B-17 or Laetrile is deficiency in today's modern food. Due to its effectiveness, regulators will not officially recognize B-17 as a vitamin or nutrient.

The reason for the exploding popularity of vitamin B-17, and thereby bitter almonds, was due to the fact that vitamin B-17 has dramatic and miraculous cancer killing properties. While alternative medicine has had effective and non-toxic cancer cures since the 1930s, the new vitamin really looked like a magic bullet. Source "a world without cancer "

There were reports everywhere of cancers being killed merely from patients eating keeping servants of bitter almonds daily. Soon there would be Almond extracts and capsules, so the same patients would need only to take one cheap, non-toxic pill per day. It did not bode well for the pharmaceutical industry. Hundreds of billions of dollars were about to be lost.

Bound tightly inside B-17 is a tiny amount of cyanide that is kept neutralized by its other constituents. When B-17 comes into contact with cancer cells, it drops its “payload” of cyanide: specifically targeting those cells. It is unknown exactly why this reaction takes place, or why only cancer cells get the deadly “payload”.

In September 2007, during the heyday of B-17 cures, the FDA concocted that raw almonds had been linked to salmonella outbreaks in five years and that all types of almonds needed to be pasteurized, because almonds were suddenly a dire threat to the nation’s health.

The required pasteurization brings only one significant change to the almonds. It neutralizes the vitamin B-17 and bitter almonds, just as the FDA had planned. The highest source of B-17 the bitter almond tree had already been banned from the United States in 1995. Doctors who prescribed Laetrile are required to report themselves to the FDA for “monitoring”.

Almonds are contraband in the United States to protect US citizens. If you see any almonds in the United States that are labeled as “raw” then you can be fairly certain that the company is producing them is “lying” and is unethical. Due to the FDA intervention, most almonds in the **US are pasteurized with propylene oxide. Propylene oxide is a known carcinogen and it is on California’s prop 65 list of chemicals known to cause both cancer and reproductive harm.**

The majority of almonds sold in the US are now not only naturally neutralized, but contain dangerous chemical carcinogenic toxins as well, due to the chemical pasteurization process. This includes most almonds that are falsely marketed as “organic” and “raw”

*According to the FDA, bitter almonds are “poisonous”, but somehow they became dangerous only after it was discovered that they contain the cancer destroying vitamin B-17.  
Bitter almonds had been eaten by humanity during the previous 9000 years of history without any verifiable deaths, or any serious health problems.*

The FDA widely publicized one case of death by bitter almonds, but upon investigation, it appeared that the child had actually been killed by the hospital’s chemotherapy. Both the autopsy report and the press release, conveniently omitted the year of chemotherapy.

#### **Warning notice when using B-17**

When using B-17 Laetrile or any other alternative therapy to save your child, it is prudent to be careful discussing such things with a regular doctor, because he may tell **Child protective services** that you are **“medically neglecting your child” you have been warned!**

## Cancer cure: The Budwig protocol

'I have had the answer to cancer, but the American doctors won't listen. They come here it is or by methods and are impressed. Then they want to make a special deal so they can take it home and make a lot of money. I won't do it, so I am blackballed in every country.'" Dr. Johanna Budwig, M.D.

She left the world in 1903, at the ripe age of 95, but she look like she was in her early 70s. She was nominated seven times for the Nobel prize in medicine.

**Budwig cured cancer:** not treated, but cured it in terminally ill patients: even patients which the establishment had surrendered to the fate, claimed were "untreatable", and gave a death sentence to. These were not specific or rare types of cancer either.

She cured whatever type of cancer that was thrown at her, and she did it relatively quickly, cheaply, and easily and permanently using non-toxic ingredients, which were without any side effects whatsoever. Her medicine actually made her patient stronger and her cure rate was over 90%, including the worst "terminal" cases. Her patients experience no side effects.

**The most astonishing aspect is still being suppressed. Dr. Budwig's super weapons against cancer were common quark cheese and flaxseed of omega-3 oil.**

This simple formula combined with the Budwig diet pulls oxygen deep into the tissues, while stimulating shielding a body from oxidation and damage.

Any food that is high in essential sulfur proteins can be substituted for the quark cheese, such as organic unsweetened yogurt or plain cottage cheese.

**Budwig's surprisingly simple omega-3, plus sulfur proteins oxygenating formula was used in conjunction with one of the easiest and say cancer diets. Her diet protocol emphasized nourishing fats.**

**Dr. Johanna Budwig realized, just as Dr. October Warburg had, that the secret to beating cancer is that life-giving breath of God, oxygen.** Technically it's not that simple but it is almost that simple.

The real trick is getting oxygen back into the deep tissues, and retraining cells to "eat" it again. Dr. Budwig found a simple and clever way to oxygenate her patients better and faster than any other methods.

She also discovered that even the so-called healthy fat-free diets were huge part of the cancer problem. Her regimen eliminates the damaging usually doctor recommended artificial fats in foods from the diet that cause cellular oxygen starvation, and it replaces them with natural **healing foods and life-saving essential fatty acids.**

Along with the diet, Budwig protocol emphasizes the benefits of sunlight, the natural source of the anticancer vitamin D3, stress reduction and making peace with emotional issues.

“Without these fatty acids the respiratory enzymes cannot function and the person suffocates even when he or she is given oxygen-rich air. A deficiency in these highly unsaturated fatty acids impairs many vital functions. First of all, it decreases the person supply of available oxygen. We cannot survive without error and food; nor can we survive without these fatty acids. This has been proven long ago.”  
Dr. Johanna Budwig

**The Budwig protocol final notes:**

There are two stages of the Budwig protocol. #1 one of them is a natural medicine, which is a blend of something containing high amounts of sulfur proteins and flaxseed oil to provide omega-3 fatty acids.

Fish oil for omega-3 is avoided because of the risks of contamination and because the body will synthesize exactly the correct amount of omega-3 from flaxseed oil and give the right balance of omega-3 to Omega six.

The other stage of the protocol is the special diet emphasizing healthy foods and healthy fats. Dramatic results are usually seen within 90 days. Patients should continue the regimen for six months regardless of a lack of symptoms. The power of sunlight and vitamin D three and fighting cancers cannot be overstated.

## **Cancer cure: The Hoxsey Regimen**

Hoxsey anticancer regimen was created by a natural path Dr. Harry Hoxsey. The regimen was given to patients regardless of their ability to pay, as were all of the alternatives.

He is said to have been arrested more than any other doctor in history for “quackery”. The juries from two separate trials acquitted him of medical fraud on the basis of finding overwhelming evidence that his methods were both safe and highly effective cures for cancer. None of Hoxsey’s 10,000+ patients were willing to testify against him.

The district attorney of Dallas County who arrested Hoxie over 100 times, eventually went to Hoxie to get his own brother’s cancer cured. The DA never bothered Hoxie again.

The AMA refused to examine the Hoxie formula or evaluate it for either safety or efficacy, because they were afraid that it would “legitimize” Hoxsey’s work. Real science does not fear investigation.

“When healing becomes a crime” by Kenna Ausubel, the amazing story of the Hoxsey clinics and the return of alternative therapies.

The AMA offer to buy the Hoxie formula Hoxie gave the condition that no patient could ever be refused, regardless of the ability to pay. The AMA refuse those terms. Then heavy attacks began when a media-based smear campaign concerning Hoxie’s “quackery”. There were even attempts to murder him by sniper.

Eventually, the Hoxsey cure was banned in the US and Hoxsey practitioners moved to Mexico in 1963 to escape US interference. Hordes of Americans “with terminal cancer” make a pilgrimage across the border to Mexico daily to get health freedom, and Hoxsey therapy.

The Hoxsey treatment averages and 80% cure rate, but of course, medical schools are afraid to touch it with official studies, due to it being banned by the FDA.

### **The Hoxsey Regimine: Final Notes**

The Hoxsey regimen works with detoxification, and it rebuilds the immune system like a powerful supplement. It is combined with the special diet.

Ironically, the Hoxset regimen failed to work on Hoxie himself, so he eventually turned to orthodox medicine for his own cancer. He was dead within seven years. He died of liver toxicity from the chemotherapy drugs but in one last parting insult from the establishment his death was diagnosed to have been from “cancer”.

### **Hoxsey internal formula:**

potassium iodide: 150 grains  
Licorice, alder, buckthorn and red clover - 20 mg  
root of burdock, stillingia, Berberis and poke 10 mg  
cascara and prickly ash 5 mg

Foods to be avoided; tomatoes, vinegar, crappy table salt, pork, alcohol sugar, white flour and shellfish

### **Cancer Cure Vitamin C:**

in the early days of chiropractic therapy, the American Medical Association led a vicious campaign against vitamin C. Chiropractors maintain that vitamin C boosted the immune system and led to far fewer illnesses.

This was met by the AMA smear campaign against chiropractic therapy and vitamins. By FDA regulations vitamin C is still “not approved” therefore forbidden for cancer patients since there are “safety concerns.”

Albert Szent-Guorgyi discovered vitamin C and won the Nobel Prize in 1937. He later reported that the American Medical Association had repeatedly attempted to shut down his research Institute.

Two-time Nobel Prize winner and biochemist, Linus Pauling, pioneered research concerning vitamin C's connection to cancers. Linus Pauling recommended that terminal cancer patients take 10 g of vitamin C per day, which is 220 times the meager “recommended daily allowance” by the FDA.

Mrs. Eva Helen Pauling and Linus Pauling worked with Scott as physician Ewen Cameron who was willing to test his theories on the premise that if vitamin C did no good, then it would at least do no harm.

From 1971 to 1979 Dr. Cameron treated 750 patients. Most of these patients had already been cast aside by mainstream medicine as “terminally ill”.

They noticed that all of their patients lived much longer than anticipated, were relieved of pain, and some completely recovered with the vitamin C therapy alone. Another study in a single hospital found that patients who were treated with ascorbic acid or vitamin C lived an average of four times longer, whilst receiving exactly the same orthodox treatments.

The Journal of American medicine immediately censored the research of Polly and Cameron: so they authored the book “cancer in vitamin C”.

The establishment and its big media partner has done everything in their power to suppress discoveries about nutrition and supplementation. These discoveries threaten the sick care and symptoms management industry.

### **Vitamin C therapy final notes:**

Vitamin C pioneer, Linus Pauling kept his own cancer in remission for 20 years with vitamin C alone. Ironically, he began using Orthodox radiation in his early 90s. It killed him in 1994 at the age of 93.

## **Cancer cure: Essiac Tea**

René Caisse was a Canadian nurse who discovered a herbal formula in 1922 that seem to have dramatic anticancer properties. Her formula was an ancient remedy from the American Indians, which she gave to people completely free of charge. She name the formula Essiac which is her name spelled backwards.

Herbal tea was made from:

burdock root,  
sheep sorrel,  
slippery elm and  
turkey rhubarb,

The war with the medical establishment immediately began once she opened the clinic. The Department of Health and welfare at Ottawa sent people to arrest her for practicing without a license, but the doctors involved in the case refuse to cooperate. The prestigious doctors that she had been working with including Dr. Charles Brusch MD of Cambridge Massachusetts likewise offered credence to her work.

Those who were involved in the attempts to arrest René arranged for a study to test her herbal tea on mice in order to publicly discredit her work. The Essiac tea treated mice survived longer with the Essaic Therapy then they had with any other past cancer treatment study.

In 1938 René Casisse went before the Canadian medical legislature with the intent of getting her teeth legalized or approved. She lost by three votes, after a large portion of the evidence that she submitted was arbitrarily rejected. The Canadian medical establishment claimed that all of her cured patients must have first received a false diagnosis by some coincidence. After having a nervous breakdown René decided to grant her own herbs and to help people from her own basement with the full risk of arrest.

Meanwhile Canadian patient sued the medical establishment, demanding their human rights to the treatments of their choice. Nurse Caisse continued to provide free treatments in her basement and she died at the age of 90 in 1978.

## **Essiac Tea: final notes**

Essiac “tea” is not actually a Tea. It is a group of herbs that are dried, ground and boiled in water. After boiling the formula should be left alone for 12 hours minimum, without removing or straining any of the ingredients. Finally, the formula is strained and warmed for internal consumption.

Avoid using plastic and aluminum while preparing the formula or storing it if a green mold appears then discard. Sunlight exposure weakens its therapeutic value. Do not freeze it.

There is no official diet with this classic Essiac therapy, but the makers of this presentation strongly recommend following the Budwig diet. The Budwig diet is too lengthy to be included in this movie but more information can be found at [www.healthwyze.org](http://www.healthwyze.org). The Budwig protocol and Essiac Tea can be safely used together and probably should be.

## **Cancer cure: Gerson therapy**

Based on the book "The Gerson miracle".

Dr. Max Gerson MD was born in Wongrowitz Germany in 1881. He developed a diet that would prevent headaches. This diet unwittingly cured one of his patients of skin tuberculosis. He continued to study nutrition as a medical therapy and he cured multiples people of skin tuberculosis using only food.

In a controlled trial at Munich University Hospital, 446 out of 450 patients with skin tuberculosis 99% were treated with Gerson diet recovered completely.

He soon became friends with the Nobel Prize winner Albert Schweitzer M.D. by carrying Albert's wife of lung tuberculosis. All mainstream treatments had failed.

Dr. Gerson fled Germany to America in 1936 when the Nazi party began arresting Jews. In 1938 Gerson was licensed to practice medicine in New York City. He cured hundreds of patients of cancer. Most of those patients had already been discarded by the mainstream medicine as hopeless and terminal cases.

In 1958 Gerson published "a cancer therapy: results of 50 cases", which he details his theories, treatments and results.

The Gerson treatment plan is a less aggressive and more difficult than most successful anticancer therapies because only nutritional therapy is used most of the time. It is difficult to find statistical information about its success with average cancer patients, but terminal patients reportedly have over a 50% recovery rate.

## **Gerson Therapy: final notes**

The diet plan consists of organically grown fruits and vegetables, fresh raw juice, 8 ounces every hour 13 times per day, three vegetarian meals and a potassium compound with vitamin B12 and vitamin C.

The amount of potassium B-12 and vitamin C that is used depends on the patient type of cancer and how advanced the cancer is. The ratios are explained in the book "healing the Gerson way" by Dr. Gerson's daughter, Charlotte Gerson. The Gerson Institute may also be contacted for more information [www.gerson.org](http://www.gerson.org).

For the very worst terminal cases, coffee and chamomile enemas are used, which apparently have a surprising rejuvenating effect on cancer patients.

## **Cancer Cure: Oxygen/Ozone Therapy**

Since the discoveries of Dr. Otto Warburg relating to the cause of cancer as a lack of oxygen in the cells, methods for increasing oxygenation have been studied extensively.

Ozone therapy is now considered a mainstream medical treatment in Germany for a variety of conditions including cancer, stroke, eczema, gangrene and herpes. Yet, in the United States, Rockefeller's American Cancer Society maintains that ozone is untested and therefore must not be used to help cancer patients. They have adopted the official stance in 1993 and have not changed it, despite the research that has demonstrated efficacy.

### **Oxygen ozone therapy final notes**

Cancer patients with terminal cases of cancer can get hydrogen peroxide intravenous drip from an alternative or interrogative medical practitioner.

Patients with less severe cases may consume small amounts of 3% food grade hydrogen peroxide several times a day alongside other alternative treatment plans.

Ozone generators can also help provide increased levels of oxygen to the lung.

Liquid chlorophyll can also be consumed as a supplement to the diet.

“The Lord hath created medicines out of the earth and he is wise and will not support them” Ecclesiastes 38:4

“And the fruit thereof shall be for food in the lease shall be thereof for healing”  
Ezekiel 47:12

In my research, Dr Johanna Budwig's name has been referred to on numerous occasions. The articles mentioned that Dr Budwig was using Organic Flaxseed Oil combined with Organic Low Fat Cottage Cheese in preventing and curing Cancer and Chronic Diseases. I would just shake my head in disbelief and, without giving it a second thought, move onto other research. I was not willing to take the time to investigate this protocol. It did not make any sense to me how this could possibly work. That was a big mistake on my part.

If you are researching this website for a loved one, family member, or a friend who is suffering from a terminal or chronic disease this is one of the most important pieces of information I have come across during thousands of hours of research. Please take the time to read this carefully as this can be a life saving protocol.

If you are already familiar with the science on how the Budwig Diet works you may scroll directly down to (The Budwig Protocol and Diet Plan). There it will guide you in what to purchase and how to mix the organic flax oil and organic low fat cottage cheese as well as some explanation to the diet.

To understand the full diet her book will have to be purchased. In Dr Budwig's protocol there is much more than just flax oil and cottage cheese. If you are just now hearing about this protocol for the first time you need to read this paper in it's entirety to understand how this protocol works in healing your body. This is a very, very powerful protocol when done properly and has healed thousands of people with chronic and terminal diseases.

One afternoon I decided to take the time to start researching Dr Budwig. I wanted to know who she was and learn more about her protocol. I had no idea that two months later, after reading three of her books translated from German to English, and combing the internet, I would still be looking at Dr Budwig's work. I was trying my best to understand this protocol so I could pass it along to others. I believe I now understand why it appears to work so well. The following is what my research revealed.

Dr Budwig was born in Germany in 1908. She passed away in 2003 at the age of 95. She has been referred to as a top European Cancer Research Scientist, Biochemist, Blood Specialist, German Pharmacologist, and Physicist. Dr Budwig was a seven-time Nobel Prize nominee.

In Germany in 1952 she was the Central Government's Senior Expert for fats and pharmaceutical drugs. She's considered one of the worlds leading authorities on fats and oils. Her research has shown the tremendous effects that commercially processed fats and oils have in destroying cell membranes and lowering the voltage in the cells of our bodies, which then result in chronic and terminal disease. What we have forgotten is that we are body electric.

The cells of our body fire electrically. They have a nucleus in the center of the cell which is positively charged, and the cell membrane, which is the outer lining of the cell, is negatively charged. We are all aware of how fats clog up our veins and arteries, and are the leading cause of heart attacks, but we never looked beyond the end of our noses to see how these very dangerous fats and oils are affecting the overall health of our minds and bodies at the cellular level.

Dr Budwig discovered that when unsaturated fats have been chemically treated that their unsaturated qualities are destroyed and the field of electrons removed. This Commercial Processing of fats destroys the field of electrons that the cell membranes (60-75 trillion cells) in our bodies must have to fire properly (i.e. function properly).

The fats ability to associate with protein and thereby to achieve water solubility in the fluids of the living body—all this is destroyed. As Dr Budwig put it, “the battery is dead because the electrons in these fats and oils recharge it.” When the electrons are destroyed the fats are no longer active and cannot flow into the capillaries and through the fine capillary networks. This is when circulation problems arise.

Without the proper metabolism of fats in our bodies every vital function and every organ is affected. This includes the generation of new life and new cells. Our bodies produce over 500 million new cells daily. Dr Budwig points out that in growing new cells, there is a dipolarity between the electrically positive nucleus and the electrically negative cell membrane with it's high unsaturated fatty acids. During cell division the cell and new daughter cell must contain enough electron rich fatty acids in the cells surface area to divide off completely from the old cell. When this process is interrupted the body begins to die. In essence, these commercially processed fats and oils are shutting down the electrical field of the cells allowing chronic and terminal diseases to take hold of our bodies.

A very good example would be tumors. Dr Budwig noted that “The formation of tumors usually happens as follows. In those body areas which normally host many growth processes, such as in the skin and membranes, the glandular organs, for example, the liver and pancreas or the glands in the stomach and intestinal tract—it is here that the growth processes are brought to a stand still. Because the dipolarity is missing, due to the lack of electron rich highly unsaturated fat, the course of growth is disturbed—the surface-active fats are not present; the substance becomes inactive before the maturing and shedding process of the cells ever takes place, which results in the formation of tumors.”

She pointed out that this can be reversed by providing the simple foods, cottage cheese and flax seed oil, which revises the stagnated growth processes. This naturally causes the tumor or tumors present to dissolve and the whole range of symptoms which indicate a “dead battery are cured.” Dr Budwig did not believe in the use of growth inhibiting treatments such as chemotherapy or radiation. She was quoted as saying “I flat declare that the usual hospital treatments today, in a case of tumorous growth, most certainly leads to worsening of the disease or a speedier death, and in healthy people, quickly causes cancer.”

Dr Budwig discovered that when she combined Flaxseed oil, with its' powerful healing nature of essential electron rich unsaturated fats, and cottage cheese, which is rich in sulfur protein, the chemical reaction produced makes the oil water soluble and easily absorbed into the cell membrane.

I found testimonials of people from around the world that had been diagnosed with terminal cancer (all types of cancer), sent home to die and were now actually cured and living healthy, normal lives. Not only had Dr Budwig been using her protocol for treating cancer in Europe, but

she also treated other chronic diseases such as Arthritis, Heart Infarction, Irregular Heart Beat, Psoriasis, Eczema (other skin diseases), Immune Deficiency Syndromes (Multiple Sclerosis and other Auto Immune Diseases), Diabetes, Lungs (respiratory conditions), Stomach Ulcers, Liver, Prostate, Strokes, Brain Tumors, Brain (strengthens activity), Arteriosclerosis and other chronic diseases. Dr Budwig's protocol proved successful where orthodox traditional medicine was failing.

Since Dr Budwig mentioned strengthening of the brain, I believe not only Multiple Sclerosis, but also ALS "Lou Gehrig's Disease", Parkinson's disease, and Alzheimer's disease could also be significantly impacted with her protocol. I also believe that this protocol could have the greatest impact early into the disease, and could very possibly reverse these diseases entirely. Dr Budwig states, "A Swede has proved that (no brain function) can take place at all without three fold unsaturated fats. Without any doubt, every function of the brain—and this has been scientifically proved—needs the very easy activation effect of three fold unsaturated fats. The same applies to nerve functions and for regeneration within the muscle after strenuous muscle activity, in the so called oxidative recovery phase during sleep. This process requires the highly unsaturated, particularly electron-rich fatty acids in flax seed oil. So, when I wish to help a very sick patient, I must first give the most optimal oil I have. My opinion is flax seed oil."

Dr Budwig pointed out in her book that she often took very sick cancer patients from the hospital with only hours or a few days left to live and had very good results with her protocol, most of the time. I would assume some patients she worked with were too badly damaged by the Chemotherapy and Radiation treatments. She pointed out that in some of these patients she would start their therapy with an enema of 500CCs of an oil mixture and "that their subjective awareness of well being increased immediately."

She pointed out that many could not urinate, produce bowel movements, or when coughing were unable to bring up the mucous, but once the protocol was initiated this started reactivation of the vital functions and the patients immediately began feeling better. The Budwig diet appears to allow cancer cells to start breathing again.

Here are a couple of testimonials I found quite interesting and thought I would share with you. These testimonials were found in Cliff Beckwith's web site:

### [Testimonials](#)

Cliff's story and his recovery from Stage IV Prostate Cancer using Budwig's Protocol is also there along with other cancer testimonials including lung, colon, breast, ovarian, brain cancer and many more.

1. In a Christmas letter, Dec. 1993, we heard that a friend of ours in Wooster, Ohio, was having a bout with ovarian cancer. The blood test for that condition is GAC 125 and the normal is 35 or below. Her count was 75. Later I learned she'd visited my sister in September and was very apprehensive. She'd had about 4 rounds of chemo (i.e. many chemotherapy sessions) and couldn't take that. We sent information about Flaxseed oil in our Christmas letter.

Joanie is an RN and she and her husband had been missionaries in Sri Lanka. They bought the books and started using Flax oil. In February she was feeling fine. On May 12, 1994, she had a checkup and the count was 2 and she was praising the Lord. In October 1994 she had another physical and now the count was 1. Since then there's been no further indication of cancer.

2. We were asked by a friend to send a tape to his son whose wife was badly off with cancer. We have just learned that the daughter-in-law had cancer through her lymphatic system and her brain. She used 4 Tbsp. of oil a day and today the tests for cancer are normal. The doctors can't figure out what's happened and she is not saying anything. However, her husband, mother, father and sisters are all using Flax oil for prevention.

Here's a testimonial for man's best friend, and I've read where it works on cats to.

3. Several weeks ago a man called us from South Bend, Indiana. He said, "You'll enjoy this. I have a 13 year old dog. He has cancer. His eyes were dull and he was so weak he couldn't lift his leg. I should have put him to sleep, but I didn't want to. I put 1 Tbsp. of Flax oil and a half cup of cottage cheese in his bowl and he wolfed it down. I did that three times a day for ten weeks. Today he's running all over the place, his eyes are bright, his coat is shiny and he's gaining weight." That was the 2nd dog I'd heard of in 3 days that showed improvement from using Flax oil. The other is owned by my cousin's daughter.

This second set of testimonials was taken from a FlaxSeedOil2 Chat group. The purpose of this group is for information and discussion of Dr. Johanna Budwig's Oil-Protein Diet and Protocol. FlaxSeedOil2 appears to be one of the best sources of reliable information on the Budwig Protocol in the English-speaking world. The following link for additional testimonies is (scroll down to FSO2 Folder 6 – Anecdotes & Testimonials. Click and read away at all the testimonials):
