

# REVELATION 12 SIGN - 666 STARS

This author was the first to write and publish about the *GoogleSky* 'cover-up' of the 'Red Dragon' anomaly in *Virgo* back in 2008. The aim of the publication was just to illustrate the anomaly. There is no way to ascertain the true nature and makeup of the object with the limited information the general public is allowed to have. The publication, although correlated the pattern and typology to the Revelations12 Sign, alluded to the depiction as a type of 'Red Dragon'. This was only given the variables of the women being 'pregnant', *Jupiter* then having a 9-month gestation win *Virgo*, the alignment of the planets as the 'crown' and then a conjunction with comet 67P. ## GOOGLE COVER UP 'RED DRAGON' CONFRONTATION

September 23, 2017 - Sabbath of Return

13h 50m 44.0s -8° 13' 59.7"

The sequence of occurrence as described in the text of the Revelation 12<sup>nd</sup> Sign of the *Red Dragon* does not mean that the 'Red Dragon' convergence will have to occur on that precise time and date, of September 23, 2017, etc.

Many expect this 'Red Dragon' anomaly to be Planet X and that it will manifest itself visually on or after the 23<sup>rd</sup> of September in 2017. This might be the case perhaps but it is highly unlikely and will be wrong. The issue is that it is the wrong timing. Such a 'Red Dragon' will come on the scene astronomically and it will occur but not now but in the 2nd half of the Tribulation, whenever that first starts. Such planets smaller than Jupiter could not produce such luminosity. Some purport that this image is a double exposure of *Saturn*. Perhaps, but such double-orbs at the core of the Red Dragon anomaly are much larger than Jupiter for example.

Infrared Spectrum area Patched-Up by Google Sky 'Red Dragon' in approximate size proportion to Jupiter.

The Revelation 12 Sign is just a prelude as signs go that point to this future event and the *GoogleSky* 'cover-up' may well be just a pictorial 'sign' hinting at just that. The only concrete evidence or inference in the Bible of this Planet X 'Red Dragon' scenario that will occur is found in Revelation 8:10-11. Presently, it appears that the Earth is truly currently experiencing a wobble due to an approaching celestial body that has a far greater magnetic force. The magnetic north is undeniably shifting rapidly, etc. Planet X will have its effects of sending 2 asteroids that will impact Earth 5 months apart. This Planet X or the 'Star' is called *Wormwood* in the Bible. One asteroid will hit the ocean, the other one will hit the land. This scenario is indicative of the 150 days given or the 5 months which is calculated by taking (30 days/month x 5 months) to get the day

### JUPITER

Not to Scale. Jupiter is much smaller. Anomaly cannot be a mere 'planet' with such light signatures.

Some argue that the actual word in Greek for 'Red' as in the 'Red Dragon' of Revelation 12:3 does not connote that but of a gold-yellowish color instead. Nonetheless, fire has red in it. The *pyros* John referred to is the 'glowing' which would match what will occur with the 'wings' of *Nemesis*' disk when they will be flared-up due to the Sun's solar wind.

The aim of the publication and illustration of the *GoogleSky* 'cover up' was to point to the coming Sign of Revelation 12, at least astronomically. Many scoffers and skeptics since then infatuatedly ask, 'where is the Red Dragon?' Skepticism is good, and it is healthy to have in this age of mass communication, psyops, misinformation and disinformation. However, the point of the illustration was not to 'prove' or provide 'evidence' that Planet X exists or that such a *GoogleSky* anomaly was or is Planet X.
