42. Further Description of Important Features (Continue on reverse if necessary)
This simple, front-gabled building is constructed of native limestone with squared and coursed block used on the first floor of the front facade and coursed rubble used on the rest of the building. Two brick chimneys used from the gabled ridge; one near the center and the other placed at the western end. The projecting roof creates deep, overhanging eaves with no trim panels. The three-bay front

43. History and Significance
This two story stone structure was formerly KI. District No. 1 Primary School. It was erected in 1853 from Island limestone to replace the one room frame school built by Datus Kelley in 1836 just to the south. Grades 1 through 6 shared the one large room and cloak-room on the first floor, and the 7-8 had identical arrangements on the second. Complete separation

44. Description of Environment and Outbuildings
The building sits closer to the road than other residences in the area. Large mature trees shade the southern and western boundaries.

42. (Cont'd) front facade features a recessed central glazed door. Another door that leads directly to the second floor. is located in the east corner of the south eave wall. Windows are double-sash replacement types with rusticated lintels and rusticated lug sills. The front windows and door are shuttered. A frame, single-story, shed-roof addition has been built onto the west wall.

According to one source, a second floor was added to the original structure. This would explain a number of unusual architectural and structural features such as the separate entrances, a difference in the course of the stone between first and second floors.

43. (Cont'd.)

was afforded by separate entrances. After the construction of Estes School (ERI-1610) and the consolidation of all the other schools, this building was converted to a residence. One of many of the early families that occupied this dwelling was M.B. Meyers. In the mid 1940's Michael and Iola Riedy bought it, retaining ownership to the present day. Michael was the son of Henry and Anna Riedy whose family history dates to the 1850's when Michael's grandfather, Paulin Riedy, came to the island with Henry Lange (ERI-1644). * After the death of her husband, Iola Riedy, a professional librarian, installed a station of the Sandusky Public Library in a small wing she added to the southwest. The library served islanders and summer visitors until 1985 when, upon Mrs. Riedy's retirement, it was moved to the basement of Estes School.

*Unlike his father and grandfather before him who were grape growers, Michael and his brother, Eugene were fishermen. Gill netters, they worked from the island's south shore, owning 2 boats, the ReneDeen & the Pal built by Arthur Beatty.
