

Dr. Sanders is amazing in his ability to diagnose. It had started with a little dizziness that I assumed was sinus. It quickly worsened. I went to the local clinic and was told fluid in the ears and sinus. Got over-the-counter dizziness medicine. I waited two days and was going through unbearable balance and dizzy issues. I went to the ER, they said "vertigo" and "give it time" and repositioning of my head was no help. A neighbor and my accountant told me of BalanceMD. Immediately told me a virus that took nearly all the function of my inner ear nerve. With therapy and time, back to normal and glad to know he is here.
